ASL SCENARIO PP2

Scenario design : Laurent Cunin

Between DARDENNES and LES MOULINS, FRANCE, 20 August 1944: Company Vieules had received orders to attack Village des Moulins. Stubborn German resistance had stalled the attack for three hours. The defenders held a large villa which dominated the entire valley as well as the road to Toulon. First Section had taken up positions to block the road at Dardennes which had been captured earlier in the day. The FFI of Group Bartolli had routed a German demolition team wiring the Moulins Bridge and were in the process of removing the charges. The Pioneers of *La Poudriere*, supported by three light tanks, shifted to the attack in an effort to relieve and resupply the beleaguered Dardennes Garrison.

5. German 5-4-8/2-3-8 MMC are Assault Engineers (H1.22). The German AFV represent salvaged French Hotchkiss tanks. Use French H39 counters to represent these AFV. These AFV are considered to have radios and are not subject to captured use penalties (A21).

6. There is a German Set DC in the 12E9 bridge location. A successful Set DC Clearance attempt (B24.75) "secures" the bridge for Victory Condition purposes. The Set DC must be recovered (A4.44) prior to any detonation attempts (A23.7). No other DCs may be Set during play (A23.7).

AFTERMATH: Lt. Vieules' Algerians concentrated their fire on the Hotchkiss' tracks and hatches. The .50 caliber MGs and heavy mortars also laid down tremendous fire on the lumbering German tanks. But it took a well-placed round from an artillery piece, positioned on the heights, to halt the lead tank less than 200 meters from the bridge. Another round found its mark and stopped the second tank. The third quickly withdrew, leaving the bridge in Allied hands. The German resupply mission had failed, but the fighting in Dardennes would continue for another 24 hours. Units of Company Peretti would eventually recapture the village on the 21st of August.
