SEWER/BASEMENT ACCESS (SIMPLE AND COMPLEX)

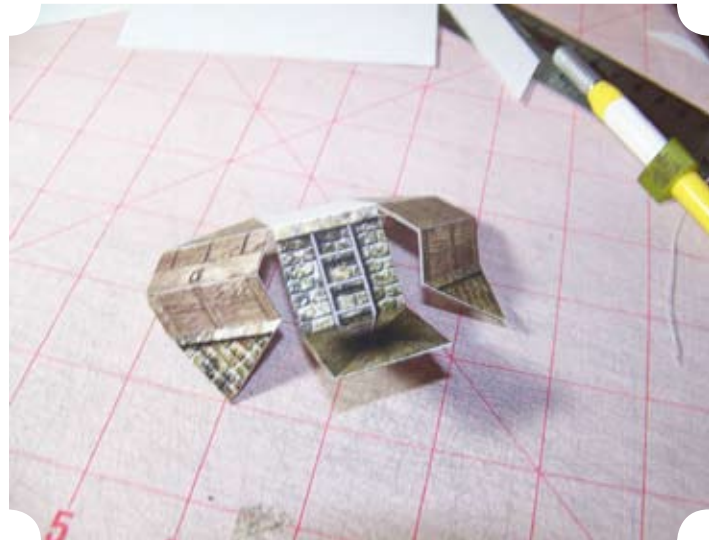

1: Cut, score and prefold the sewer access models (shown above: simple version on left, complex opening version on right.).

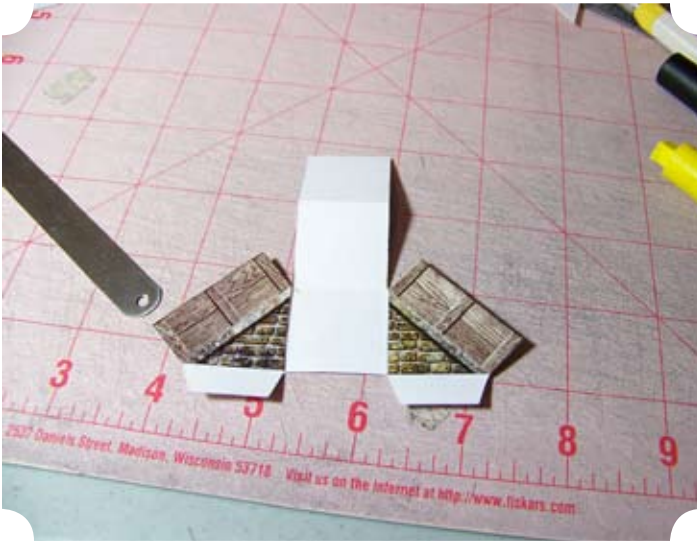

2: Glue the rear face first as shown with the tabs on the outside of the flap.

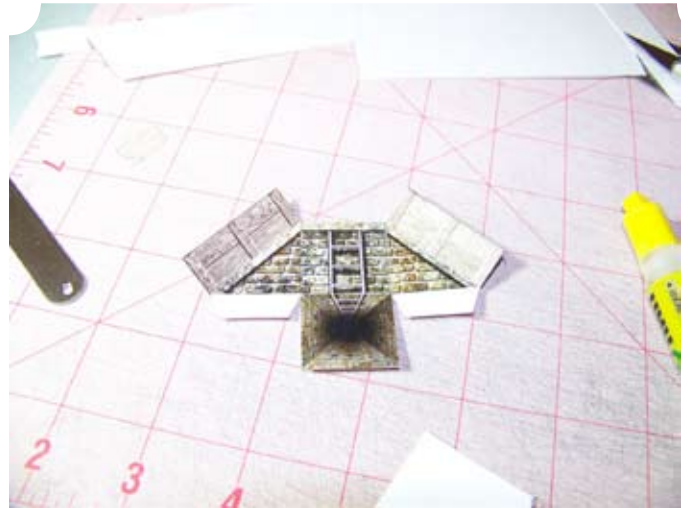

3: Glue the bottom flaps and allow to dry.

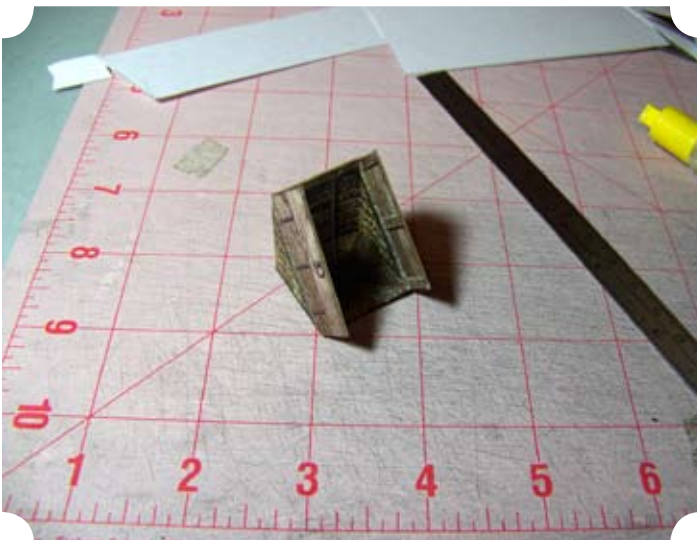

4: The complex version takes a little more patience, but it is worth it. Prefold as shown above.

5: Glue the doors and inner wall flaps in half.

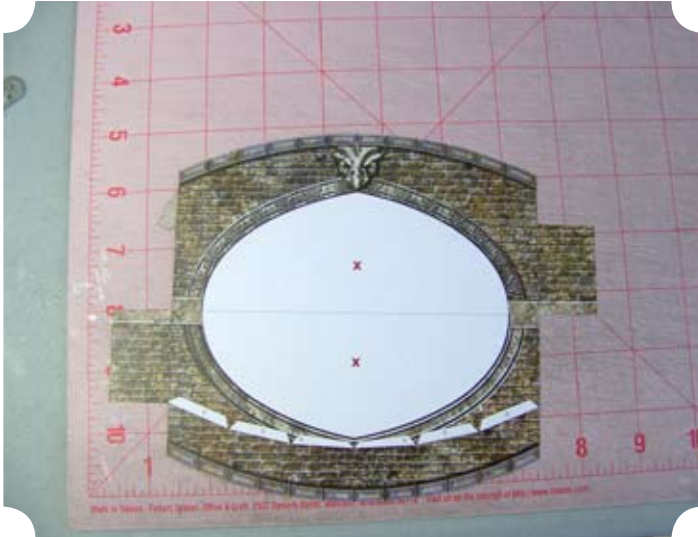

6: Glue the rear center flap in half as shown.

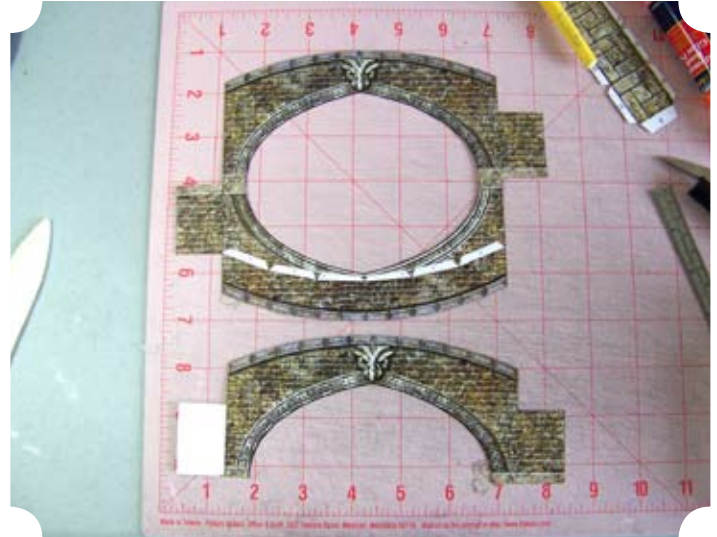

7: Glue the bottom flap to the side tabs and allow to dry.

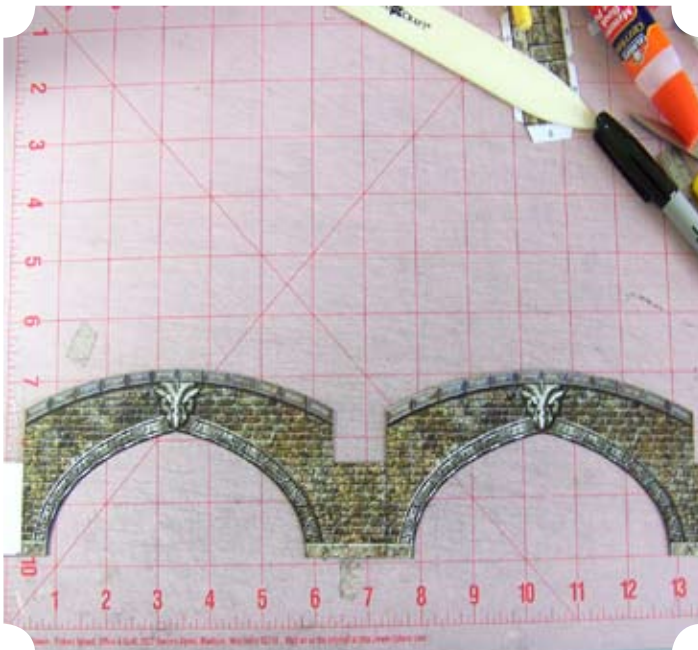

FOOT BRIDGE

1: Cut and score the foot bridge side wall as shown.

2: Cut out the center portion and glue in half. Repeat for the second side wall.

3: Glue the two side wall ends as shown.

4: Glue the opposite ends together.

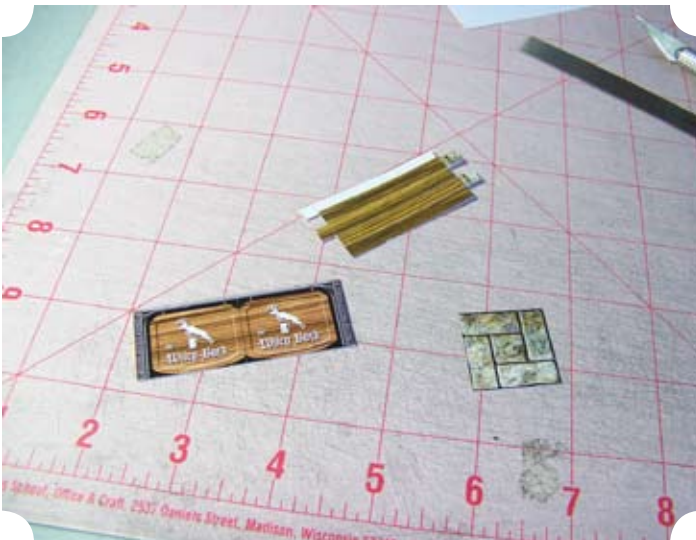

5: Glue one end of the walkway into place and allow to fully dry before proceeding.

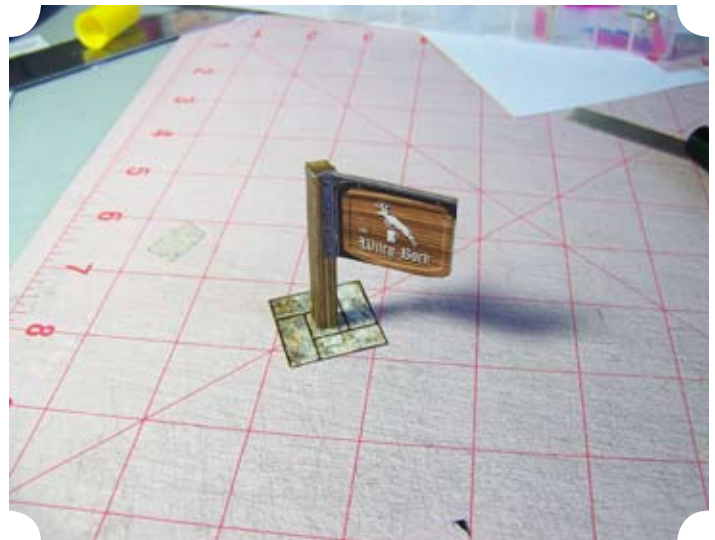

6: Finish gluing the strip into place.

SIGNS

1: Signs can either be mounted to the freestanding pole or directly on to buildings. The customizable signs page allows you to type your own names onto the signs. As different computers may not work with all of the PDF fonts, open each of the pages and try them on screen to see which looks best on your system.

6: Mount the post onto the base section, and the sign onto the post.
