

Eskaron

Eskaron, the fourth moon of Genarius, was at one time habitable. The moon contained, in addition to the common minerals found in the other moons of Genarius, a rare metal of dubious value in construction. The metal served as the primary source of nutrients for a species of gigantic space worms. Eventually their tunneling and feeding led to the moon's destruction due to structural instability, and the worms moved on to other food sources.

The tunnels run through the diameter of the moon, crisscrossing and connecting many times. Riboga the Hutt began sponsoring starfighter races through the tunnels some 40 standard years ago. Nirama has continued the tradition. Teams have formed to compete in these races, and the sport has caught on. Visitors watch the races or observe practice sessions. Nirama takes a cut of most of the race revenue and bets heavily on the racers. While not officially owning the moon, Nirama maintains control of the activity there. No one questions his right to do so.
