Your job is to enter the Haunted House and find the four children before your own sad demise. It is a dangerous and difficult task, for inside, one will find many ghosts, giant spiders, flesh-eating rats, traps, dead-ends, spine-tingling noises, foul odors, and other horrors of unspeakable danger. It is your duty. God speed, my friend....

VARIANTS

Addons, and new ways to play

House from hell

Begin the game as normal, only add in both jokers rather than one. Remove all queens. Now, this house is truly full on evil. No salvation shall come from kind spirits. Only from items.

The Last door

Setup remains the original setup. If one finds the four aces, before you can leave, you must battle a living door that feeds the home. Roll both dice. On an even number, you break through the door into the dreary night. On an Odd number, the door shoots spikes at you, doing -1 to your LIFE. This continues until you leave, or die!

No Hope

Setup the cards, remove all two's. This is a home already looted by troublesome teens on dares and nights of boredom. None lived, but managed to take the items to the grave. One must rely on the helping spirits, or no help at all.

HOME OF THE SLASHER

Play the game as normal. But the JOKER card will change. Now, it'll be treated as an undead slasher returned from the dead. His kidnappings a way to help his power. Stop his ritual!

Roll both dice. On an odd number, you shove him into his own altar, unprepared, demons pull him into hell. You take no damage.

On an even number, he slams you into the Altar, causing you -5 damage to LIFE. You get up and run out of the room.

THE AMAZING LIVING HOME

Setup the game as normal. Each turn after using a card, you will roll on this table. This home is pure evil, and is by its nature, possessed. It can manipulate its own doors and traps.

The living home table

Roll one die.

- 1-2 – You will draw another card and play this round as normal.
- 3-4 – You have fallen into a trap. Roll on the trap table.
- 5-6 – The house has accidentally given up treasure. Roll on the item table.

Reccomendations

The mood for such a game can easily be set. And is highly recommended. The sounds of static played lonely in the background. Or, halloween music. Dimming the lights slightly. Imagination can turn this already great game, into a very immersive game.

THE ALTERNATE REALITY

You will set up the game as normal. On the next page, you will find an alternate Haunted House deck. This will give you another whole house to play with. Feel free to either use, or not use this alternate home.

ACES

These are the children. Grab all four of them and GET THE HELL OUT!

TWO

Small monsters gibbering and clawing at you. Take -3 damage to LIFE from sharp claws.

THREE - FIVE

Rats! Every time you turn over one of these cards you must roll the dice and hope to get an Even number or get -1 taken away from LIFE due to creepy claws and biting.

FIVE – NINE

Ghosts swaying around the halls. Dodge them and hide. ! Every time you turn over one of these cards you must roll the dice and hope to get an Odd number or get -1 taken away from LIFE due to pure terror.

TEN

Creepy coffins line this room. A vampire burts forth. Flying at you. Take -2 damage to LIFE due to bites.

JACKS

You've found a safe room! Roll the dice, on odds, roll on the items list below. On Even, take a breath. You've just gotten a little rest time.

KINGS

Lookout! Traps are around this area. Roll on the Traps table.

QUEENS
