

GAME RULES

TUCANA, a group of little known islands filled with peculiar creatures and signs of ancient cultures. The players will be planning a network of trails across the islands to help villagers travel between villages, and let them visit as many sights as possible. May the best planner win!

Age: 8+

Players: 1-8

Time: 15 min.

In **TRAILS OF TUCANA**, each player is given a map showing villages, sights and various terrains. Every turn, two terrain cards are revealed. All players draw a trail between those two terrains somewhere on their own map. You score points by connecting matching villages and by connecting sights to villages. The game ends when the deck of terrain cards has run out twice, and whoever has the most points wins the game.

COMPONENTS

8 PENCILS

13 SET-UP CARDS

27 TERRAIN CARDS

8 x
Desert

7 x
Forest

6 x
Mountain

4 x
Water

2 x
Any
terrain

10 BLUE BONUS CARDS

5 RED BONUS CARDS

Only used in Variant:
Special Bonus
(see page 7)

1 SCORING PAD

Front side (Isla Petit):

Back side (Isla Grande):

Only used in Variant: Isla Grande (see page 7)

PREPARATIONS

1. Return the **Red Bonus Cards** to the box (only used in **Variant: Special Bonus**).
2. Each player takes one **Pencil** and one sheet from the **Scoring Pad**, which is placed in front of the player with the **Isla Petit** side facing up.
3. One player is appointed **Mayor**. *This player will draw and reveal terrain cards throughout the game.*
4. The Mayor shuffles the **Terrain Cards** and makes a deck in front of him-/herself with the terrain sides facing down.
5. The Mayor then shuffles the **Set-up Cards**, and draws one card that is put face up in the middle of the table.

The Mayor loudly announces all ten letters on the card – one by one – starting with the letter on top and continuing clockwise.

All players write these letters in the circles next to the villages. To make sure each player gets a unique village layout, the Mayor starts with village 1 (indicated by the small number), while the second player (sitting to the left) starts with village 2, the third player with village 3, and so on. Write the letters, one by one, going clockwise around the island until you have written down all ten letters.

Then, return **all Set-Up Cards** to the box.

6. Depending on the number of players, place the following **Blue Bonus Cards** face up in the middle of table and separate the cards by letters (A-A, B-B, and so on):

- **2-4 players:** Use all cards marked “#1” in the upper-right corner. Return all cards marked “#2” to the game box.
- **5-8 players:** Use all cards. Put the cards in five stacks of matching letters, with the cards marked “#1” on top.

Setting up the villages

The Mayor starts reading the letters: “D, C, E, A ...”

All players write the ten letters in their villages, going clockwise around their island.

Mayor starts in village 1

2nd player starts in village 2

Mayor (first player)

Second player

HOW TO PLAY

1. The Mayor takes the **top** two terrain cards from the deck and puts them face up in the middle of the table. Then, the Mayor loudly announces the shown terrains (the two terrains may be the same). *Example: "Desert and Water!"*
2. Each player simultaneously draws one trail:
 - The trail segment must be drawn from center to center between two adjacent spaces that match the two drawn terrain cards. The trail segment may, but does not have to, connect to previously drawn trail segments.
 - If a card shows **Any terrain**, each player decides for themselves which terrain they want this card to represent.

After all players are done, the turn is over. Then, start the next turn by repeating step 1 and 2. In each turn, cover up the cards from previous turns. Continue like this until there is only one card left in the deck (see Round End).

Rare case: *If there are no remaining connections on your map for the current combination of terrains, you do not draw a trail.*

Examples:

CONNECTING SIGHTS TO VILLAGES

Whenever a player connects a **sight** (obelisk, book, toucan, yeti or sea monster) to any of the ten villages, the player draws a circle around the **left** score value for this sight in the **Sight Scoring Box**.

Whenever a player connects the **second** sight of the **same type** to any village, he/she circles the **right** score value and **immediately** (in the same turn) draws **one bonus trail segment** anywhere on their sheet between **any** two adjacent spaces (of any terrain).

Adam connects an obelisk to a village and circles the 1.

In a later turn, Adam connects the other obelisk to a village. He circles the other score value and immediately draws a bonus trail segment anywhere on his sheet. He chooses to draw the segment between two adjacent mountain spaces.

Note: A player may connect a sight to ANY village, even if another sight (of same or different type) has already been connected to that village. If a trail segment triggers several sights to score at the same time, score the connected sights in any order.

Chain reaction: If a **bonus trail segment** connects the second sight of yet **another** type, the player immediately draws another bonus trail segment. A chain reaction may occur several times during a player's turn.

CONNECTING VILLAGES

Whenever a player connects two villages with the same letter ("a pair of villages"), he/she circles the score value of this letter in the **Village Scoring Box**. A player can only score each pair of villages once.

Blue Bonus Cards: The **first** player to connect a specific pair of villages, also receives the bonus points shown on the corresponding bonus card. Write down the bonus points in an empty space in the **Bonus Scoring Box**. The bonus card is then discarded. If more than one player connects the same pair of villages **during the same turn**, all tied players get the bonus.

In a game with 5-8 players, there are 2 bonus cards of each letter. The first time someone connects a certain pair of villages, they score the value shown on the top card. This card is then discarded. The next time someone connects the same pair of villages, they score the points shown on the bottom card. Then, this card is also discarded.

Note: When there are no more bonus cards of a certain letter, other players can no longer score bonus points for this pair of villages (but they still score normal points for connecting this pair).

Mary has connected villages D to D and scores 11 points.

Mary David

Both **Mary** and **David** connect D to D in the same turn. Therefore, they both score 6 bonus points.

Then, the top bonus card is discarded.

Alice

In a later turn, **Alice** connects D to D. She scores 4 points and discards the last bonus card.

ROUND END

The round ends when there is only one card left in the deck. The leftover card is not used. All players now add together all circled values for their **sights** and write this sum in the first space ("I") in the Final Scoring Box.

All terrain cards are then shuffled (including the leftover card), and the second round begins.

Note: *Sights are scored twice, at the end of round 1 and 2, while points for connected villages and bonuses are only counted at the end of the game.*

After the **second round**, all circled values for sights are added together again, and the new sum is written in space "II" in the **Final Scoring Box**.

Note: *Sights that you manage to connect to a village during the first round will be worth more, as they are scored twice.*

Example: After round 1, Alice has connected sights with a total value of 10. She writes this number in the "I" score box. These sights will be scored again at the end of round 2.

GAME END

The game ends after the **second round** (after the deck has run out a second time) and all sights have been scored again.

All players sum up their points and write down their scores in the **Final Scoring Box**:

Total points for **sights (after round 1 and 2)**
 + Total points for connected **villages**
 + Total points for **bonuses**
= Final Score

The player with the highest final score wins the game. In case of a tie, the tied player with most points from **bonuses** wins. If it's still a tie, the victory is shared.

Alice scored 10 for sights after round 1. During round 2, she has connected some more sights, and at the end of the round, she scores an additional 22 points.

During the game, she connected villages A-A, B-B and D-D. Her total score for villages is 38.

She scored 8 bonus points.

*Her **total score is 78.***

← Final Score

VARIANT: ISLA GRANDE

Play as described above with the following exceptions:

- Each player uses the **Isla Grande** side of their map sheet.
- Play **3 rounds** instead of 2. After each of the 3 rounds, score all sights you have collected so far. After round 3, write the sight score in space "III" of the **Final Scoring Box**.
- There are **3 sights of each type** on the sheet (instead of 2). When you connect a sight to a village, circle the leftmost available number for this sight in the **Sight Scoring Box**.
- You only get to draw a **bonus trail segment** when the **3rd** sight of the same type is connected to a village.

Mary has connected the 3rd yeti to a village. She immediately draws a bonus trail anywhere on her map.

Mary scored 8 points for sights in round 1; 24 in round 2, and 33 in round 3.

VARIANT: SPECIAL BONUS

Play as described above with the following exceptions:

- During **Preparations**, shuffle the **Red Bonus Cards** separately. Depending on the number of players, draw a number of random cards from this deck and place them face up beside the **Blue Bonus Cards**:
 - **2-4 player game:** Draw **1 Red Bonus Card**
 - **5-8 player game:** Draw **2 Red Bonus Cards**
- The first player(s) to make a connection between two of the shown **sights** score the shown bonus points. Write down these bonus points in a **Bonus Scoring Box**. Then the card is discarded.

In the same turn, Alice and Adam both manage to connect a yeti to another yeti. They both score 6 bonus points. Then, the bonus card is discarded.

MORE SET-UP OPTIONS

If you want more variation in the set-up, here are some optional rules:

Random Starting Village: Before revealing the **Set-Up Card**, the Mayor announces a random number from 1-10. The Mayor must write the first letter in the village of the announced number. Other players start writing in the following villages going clockwise. *Example: The Mayor starts in village 4, the second player in village 5, and so on.*

Counter-Clockwise: Write the village letters going counter-clockwise around the island (still read the letters clockwise on the set-up card).

Symmetry: If you prefer a 100% symmetric game, each player writes the letters in the exact same villages.

SOLO GAME

To play the game solo, follow the standard rules but with the following changes:

- During **Preparations**, use only the **Blue Bonus Cards** marked “#2”. Return bonus cards marked “#1” to the box.
- When connecting a pair of villages, you score bonus points as long as the corresponding bonus card is present. However, after **round 1** when using **Isla Petit**, or after **round 2** when using **Isla Grande**, shuffle all **Blue Bonus Cards** that are remaining on the table. Draw 2 of these cards and place them face up in the middle of the table, and return any remaining cards to the game box. In the last round, there will only be 2 bonus cards in play.

Rare case: *If you have completed at least 3 bonus cards before the last round, any remaining cards will remain in play (they are not shuffled, and no cards are removed).*

- Try to get as high score as possible. Use the table below to see how successful you were. *You may also use this table in a multiplayer game, but scores may vary with the number of players.*

Achievement	Isla Petit	Isla Grande
You're better than a yeti, at least	50+	110+
You get a day off on the beach	60+	125+
Dinner at the Mayor's house	70+	140+
Your name is engraved on the obelisk	80+	155+
Even the sea monsters are shocked	90+	170+
Too good for Tucana	100+	185+
