WARHAMMER

AMENDMENTS

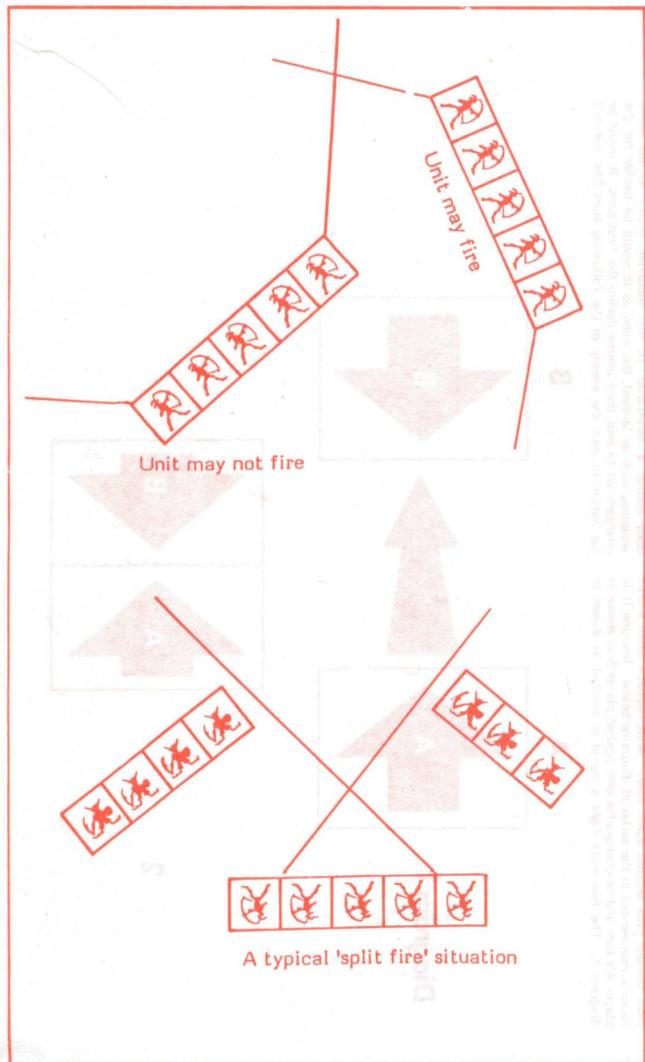

Although we are all very pleased with the new second edition Warhammer, one or two niggly errors managed to creep into the printed copy. The main problem was with sections of correction actually physically falling from the pages before the printing plates were prepared! Must remember to use stronger glue next time.

This manifested itself most alarmingly on the page reference numbers - the numbers simply fell off, so we have many references to page 'x'. Whilst this is irritating it in no way affects the playability of the rules themselves.

Some of the other corrections **do** effect the rules, and you will find it worth while to note them down and remember them

COMBAT VOLUME

- p12 Final paragraph p x. should read p 38.
- p15 Left hand column, final paragraph p xx. should read p 20.
- p18 **Firing by Units.** The diagrams are not as clear as they might be, and although the diagrams are not essential to the rule, players might like to refer to the diagrams below.

p19 **Measuring Distances.** On the diagram at the bottom of the first column write **maximum range** next to the line as drawn. On the diagram on the top of the second column write **short range** next to the line as drawn.

p22 **Who Can Fight.** Note that the shading was missed off the diagram. All front rank models can fight except for the large model on the extreme left hand side.

p24 Left hand column, final paragraph p xx should read p 29.

p26 Left hand column, second paragraph page xx. should read page 27.

p28 Right hand column, third paragraph page xx should read page 31.

p34 Right hand column final paragraph. Delete **Animals which are used as mounts for champions and minor heroes cost +10 extra points.** Animals which are to be used as mounts for other characters cost +20 extra points.

Instead substitute:-

Arms and Arms modifiers apply to mounts in exactly the same way as to weapons and armour. Creatures with a basic PV of more than 10 will have to pay extra points for their mounts, this will invariably include some champions, and all heroes and wizards. The PV of the mount and any arms and armour can be added together, and a suitable modifier applied to the total.

p38 Final paragraph page xx. should read p 34.

p45 Note that the diagrams have actually been positioned wrongly. The diagram on the right hand side should occupy the position top left. The diagram top left should occupy the position bottom left. The diagram bottom left should occupy the position top right. In all cases **unit A** is at the top of the page, and **unit 1** is at the bottom of the page.

p51 **Stone Thrower Profile.** BS is given as 3, but note that the BS is not actually used to determine hits anyway.

BATTLE BESTIARY

p14 **Dwarfs - World Distribution.** ...remaining New World should read ... remaining Old World of course. There are a few Dwarf adventurers in Lustra and the South Coast, but they are small in number compared to the relatively numerous Norse and Old Worlder humans.

Dwarfs - Special Rules. Insert:-

Dwarfs are a hardy people, well able to carry heavy loads without obvious signs of stress. Dwarfs **never** suffer any Movement Allowance reduction for shields and armour that they wear. So a Dwarf wearing full plate armour can still move at his full 3". See **Combat** p 15.

p28 **Troglodytes - Special Rules.** Note that the strange and unpleasant smell emitted by Troglodytes is known as **Nausea**, and the -1 'to hit' penalty imposed on foes is known as -1 for Nausea.

p43 **Swarms - Special Rules.** Note that a Swarm represents 100 creatures not 1000 as given.

p44 **Warhorses - Basic Points.** We have arbitrarily decided that the points cost of the Warhorse works out as far too cheap compared with normal horses. The Basic Points is therefore increased to 5 + 5 if used as a mount, a total of 10 points.

p46 **Lesser Demon - Basic Points** value is 66 points not 32.

RICK PRIESTLEY —GOES— IN PURSUIT

The rule in question concerns pursuit. This is described in the Warhammer (second edition) Combat book on page 27. If you have a copy of Warhammer, and if you're at all interested in this dead fascinating and thoroughly educational rules rep, then I suggest you read through this section again now. What happens when a unit retreats is represented in the series of diagrams below. Imagine it is player A's turn and he charges his unit against player B as shown in diagram 1. The two units fight a round of combat as shown in

turn) so that during pursuit it is the pursuers own turn, and the player fails to successfully halt a pursuit or if the player's routers cannot get away.

So as they stand the rules do not allow for the situation where a body of fast, well armed and mobile troops (such as cavalry lancers) route a slower, more clumsy enemy, and then pursue them entirely into the ground. Obviously this is not a good thing - anything that gets fat in the way of slaughter, death and carnage cannot be a good thing. So, when my winged commanders pointed out the need for a new rule on pursuit I had to agree. I had to agree because I already suffered being beaten about the head with a half eaten chapeau, and someone was reaching purposefully for the Chicken Vindaloo.

The new rule allows for pursuers to continue moving as the routers move - during the router's own turn. Pursuers move at double rate, the same as chargers. To continue in this way the pursuers must be able to move at least as quickly as the routers. If they cannot do so then the rules apply as before.

All routers move away from pursuers during their turn the pursuers have the option of continuing the pursuit or not. If the player decides not to pursue then the hunt against his leadership and if successful the pursuers are halted and become **contested** until the next turn.
