

Elven Buildings: These are strictly my interpretations of what elven buildings might look like. I am in no way trying to duplicate GW High Elf buildings.

These go together the same way as regular buildings, except the roofs come in two pieces, not one. Glue the two roof sections together at the top (the bit with the unicorns), and score & fold along that line. The top is rather difficult to cut out, so here are some tips:

- Use an Exacto or hobby knife to cut out the tricky parts.
- Glue the two roof parts together, let them dry, then cut the tricky parts out together (that way if you screw up, it looks like you MEANT to screw up)
- Cut off/ignore the tricky bits if you don't want to deal with it.
