

# 2400 ZONE

LO-FI SCI-FI RPG • JASON TOCCI

# RULES

**PLAY:** Players describe what their characters do. The GM advises when their action is impossible, requires extra steps, demands a cost, or presents a risk. Players only roll to avoid risks.

**ROLLING:** Roll a d6 *skill die* – higher with a relevant skill, or d4 if *hindered* by circumstances, injury, or carrying more than 1 *bulky* item. If *helped* by circumstances, roll an extra d6; if helped by an ally, they roll their skill die and share the risk. Take the highest die.

**1–2 Disaster.** Suffer the full risk. GM decides if you succeed at all. If risking death, you die.

**3–4 Setback.** A lesser consequence or partial success. If risking death, you're maimed.

**5+ Success.** The higher the roll, the better.

If success can't get you what you want (*you make the shot, but it's bulletproof!*), you'll at least get useful info or set up an advantage.

**ADVANCEMENT:** When you return from the Zone, roll any skill. On a 5+, roll on *Alterations*; on a 1–4, increase the skill (*none* → d8 → d10 → d12).

**DEFENSE:** Say how one of your items (or robotic limbs) *breaks* to turn a hit into a brief *hindrance*. *Broken* gear is useless until repaired.

**HARM:** Clear injuries and stress with time and/or treatment. If killed, make a new character to be introduced ASAP. Favor inclusion over realism.

**TRAVEL:** Assume characters move through the Zone slowly, tossing washers to check for anomalies. Test *luck* (below) if moving quickly.

**GM:** Lead group in setting lines not to cross in play. Fast-forward, pause, or rewind/re-do for pacing and safety; invite players to do likewise. Present dilemmas you don't know how to solve. Move spotlight to give all time to shine. Test *luck* periodically to check for encounters or anomalies – roll d6 for (1–2) trouble now, (3–4) signs of trouble. Offer rulings to cover gaps in rules; on a break, revise unsatisfying rulings as a group.

# CHARACTERS

► **Your team explores an area on Earth where reality broke. Choose your specialty.**

**SCAVENGER:** Increase (d8) any two skills from *Climbing, Navigation, Running, or Stealth*. Take a *rugged outfit* and roll d20 for something *for sale in town* (below). Sometimes smugglers, sometimes employed as Zone guides by the Lab.

**SCIENTIST:** Increase (d8) any two skills from *Biology, Physics, Psychology, or Technology* (or increase one to d10). Take a *vacuum-sealed sample case* and a *splash-resistant coverall*.

**SOLDIER:** Increase (d8) any two skills from *Hand-to-hand, Intimidation, Shooting, or Stealth*. Take a *rifle (bulky)* and *armor* (break as *defense*).

► **Choose your character's origin.**

**LOCAL:** Lived here in town before the Event. Take a *Contact* who owes you a favor, and two d8 skills from your old, mundane career, like *Cleaning, Computers, Delivery, Labor, Repair, or Service*.

**OUT-OF-TOWNER:** Came to work in or near the Zone. Apply 3 increases among your skills.

**REFUGEE:** Escaped the Zone before lockdown. Take two d8 skills from old jobs (as a *Local*, above), and roll for an *Alteration* you try to hide.

► **Start with €2, a chunky mobile phone (unreliable in the Zone), and washers (throw to detect anomalies). Most items cost €1. Ignore micro-credit transactions like a knife or a meal.**

## NO ONE KNOWS WHAT CAUSED THE EVENT.

Alien visitors? Collision with another dimension? Whatever it was, it sundered an area on Earth from the laws of nature. And it left wonders behind.

Whether you're on an authorized expedition or breaking quarantine to make some credits, be careful out there: Come back not-quite-human, and the Lab will insist you visit indefinitely.
