USEFUL INFORMATION

- Golden Advice -

Think about what the monster wants and ensure its actions play to that—monsters are not fodder to be easily dealt with.

Be creative when naming monsters—avoid using stated monster names.

Describe monsters using smell, sound, touch, and taste—not just by sight.

Most monsters are intelligent—they will leave if facing tough opposition, and be cunning in their actions.

The monsters are unknowable—their motives and actions do not always make sense to humans, and do not always need to be explained.

Some monsters can use magic to avoid melee confrontations, and reduce their risk of harm. Useful spells inc. *Appear Human*, *Barrier of Pain*, *Cloud Memory*, *Dominant*, *Entrhall Victim*, *Implant Fear*, *Shrivelling*, *Wither Limb*, and *Wrack* (among others).

- Combat -

Attacks are shown as:
Regular (Hard/Extreme)

Where an entity has 100% in an attack form, it means it only misses with a result of 100 (“00”).

Monsters with multiple attacks take all of their actions at the same time in

the round (this may vary with certain monsters), although the Keeper may choose to spread multiple attacks through the DEX order. Single monsters with multiple attacks may “Outnumber” an opponent.

- Build -

Target is 2 builds smaller:
it can be thrown.

Target is 1 build smaller:
it can be lifted with ease.

Target is of equal build:
it can be carried for a brief time.

Target is 1 build larger:
it can barely be lifted.

Target is 2 builds larger:
it cannot be lifted but might be unbalanced or disarmed.

- Immunities -

Mundane Weapons:
earthly weapons, fists, knives, bats, swords, arrows, bullets, and so on. Damage is halved, or at minimum, or negated entirely.

Elemental:
fire, water, chemical, biological, and so on. Reduced or no damage whatsoever.

Special/Other:
if specifically stated as immune, no damage is suffered.

Combat

Attacks per Round: 2 (claw, bite, crash)

My strike with claws or crash into its victim.

Bite and Hold (mnvr): if bite strikes home, byakhee remains attached to the victim and can drain their blood. Each round the byakhee remains attached, including the first, blood drain subtracts 3D10 points of STR, until death occurs (at STR 0). The byakhee remains attached until the victim is drained of blood, unless victim can make a successful opposed STR roll on their turn. Escaping death, the victim regains blood at up to 1D10+5 points of STR per day. A Byakhee may hold only one victim at a time.

Combat

Attacks per Round: 1D8 (bite)

1D8 faces bite per round (divided among numerous targets); roll to bite for each face—additional attacks vs. same target invoke outnumbered rule. Successful bite clamps down, pulling and holding victim to the chakota. Opposed STR roll to break free, but at an automatic cost of +1 point of damage per set of clamped teeth (each bite has STR 5, total the number of bites attacks against the same target, using sum in opposed STR roll). When first bitten, victim automatically loses 1D10 Sanity points (no Sanity roll). Usually, a chakota seeks to devour its first target before turning to a second, with each victim taking only 1D6+1 rounds to ingest.

Fighting 40% (20/8), damage 1D3 per face + 1D10 Sanity loss
Dodge 7% (3/1)

Combat

Attacks per Round: 1 (varies)

Determine the nature of the plant and how it attacks and consumes its prey. The simplest option is for the plant to strike out; otherwise, some form of trap may be appropriate. The trap may function like a combat maneuver, allowing the prey to avoid being captured with a Dodge, fight back, or maneuver of their own, or the trap is static and relies on the prey stumbling into it. If static, call for a Spot Hidden, Stealth, or a Luck roll to determine if an investigator stumbles into the trap.

Trap (mnvr): escape may be possible with opposed STR or Hard/Extreme DEX roll (if a sickly trap). Cutting free may be an option (presuming the plant isn't fighting back). Person is held/consumed—either slow (1D4 damage per day) or fast (1D6 or DB per round).

LARVAE OF THE GREAT OLD ONES

char.	roll	average	
STR	(6D6+7) × 5	140	Avg. Hit Points: 21
CON	(6D6+6) × 5	135	Avg. Damage Bonus (DB): +2D6
SIZ	(4D6+2) × 5	80	Avg. Build: 3

POW	6D6 × 5	115–120	

Special Ability: each larva has a 50% chance of possessing a power (determined by Keeper); example follows.

Aura of Pain: (3 MP cost per round) sends out waves of pain to all within 5 yards/meters (1 damage per round); plus, each round of proximity, movement is halved and physical skill rolls suffer increased difficulty or a penalty die for combat (does not apply to Dodge rolls).

Combat

Attacks per Round: 1D6+1 (varies: claws, bite, tentacle, etc.)

Each is unique; determine its form and attacks (e.g. sharp spines, claws, crushing).

Fighting	45% (22/9), damage DB
Dodge	45% (22/9)

Skills

Varies; determined by Keeper & based on larva's form (suggest skill range of 40%–80%)

WORM THAT WALKS

char.	roll	average	
STR	(4D6+2) × 5	80	Avg. Hit Points: 14
CON	(4D6+2) × 5	80	Avg. Damage Bonus (DB): +1D4
SIZ	(2D6+5) × 5	60	Avg. Build: 1
DEX	4D6 × 5	70	Avg. Magic Points: 13
INT	(3D6+4) × 5	70–75	Move: 9
POW	(2D6+8) × 5	75	

Combat

Attacks per round: 2 (claws, bite) or 1 (feed)

If in disguise, while the monster is still using its claws or teeth, the illusion is so complete as to seem as though a human is performing the attacks (punching, biting, using a knife, etc.). If killed while in disguise, the illusion ceases and the worm's true form is apparent.

Feed: bites, sucking out POW at the rate of 5 per round. Worm aims to win opposed POW roll, granting it psychic dominance over the victim; worm can still feed if failed, but must succeed in a Fighting attack to latch on (if uncontrolled, the victim may break free with opposed STR roll).

Fighting 50% (25/10), damage 1D6+DB
Dodge 35% (17/7)

Skills

(Human form) Charm 50%, Fast Talk 50%, Intimidate 50%, Persuade 50%, Spot Hidden 40%, Stealth 50%.

SIZ	(2D6+4) × 5	55	Avg. Build: 0

INT	(2D6+6) × 5	65	Move: 6 / 20 flying
POW	(2D6+4) × 5	55	

Combat

Attacks per Round: 2 or 4 (claws) or 1 (proboscis)

On the ground, uses two arms for claw attacks; if flying, uses arms & legs for four clawing attacks. May forgo such attacks and use its proboscis.

Proboscis: shoots out caustic acid (range of 1 yard/meter), which dissolves opponent's flesh (1D3 damage + APP loss equal to damage rolled). Then uses its proboscis to suck the melting flesh. Acid inflicts damage until washed off and eats through most materials; armor reduces damage (if armor is cumulatively reduced to zero, the acid has eaten its way through the material).

Fighting	45% (22/9), damage 1D4+DB
Proboscis	50% (25/10), damage 1D3 + APP loss
Dodge	40% (20/8)

Shoggoth **Control:** if

shoggoth-twsha is killed, shoggoth is set free; each half-hour, shoggoth-twsha must win opposed POW roll (automatic success if POW is 50+ points higher than the shoggoth's). A controlled shoggoth accepts simple mental commands (see entry for full details).

Combat

Attacks per Round: 1 (shoggoth as weapon, spell)

May use any ordinary deep one attack, although due to constraints, it is preferable to use a controlled shoggoth to attack opponents, as well as cast spells (see Shoggoth entry for its forms of attack).
