

PROBLEM**Bad Feeling About This**

There ain't a part of you that wants to do what you're about to do.

The next time you roll a 6, ignore the result and roll again for a new result, then discard this card.

**PROBLEM****Butterfingers**

Lose a Push the next time you use a Technical ability to gain information, and discard this card. If you have no Push, you lose the next Push you gain, and discard this card.

**PROBLEM****Bruised Knuckles**

You should see the other guy.

-1 on all General/Manual tests.
Discard the first time you suffer a Setback on a General/Manual test.

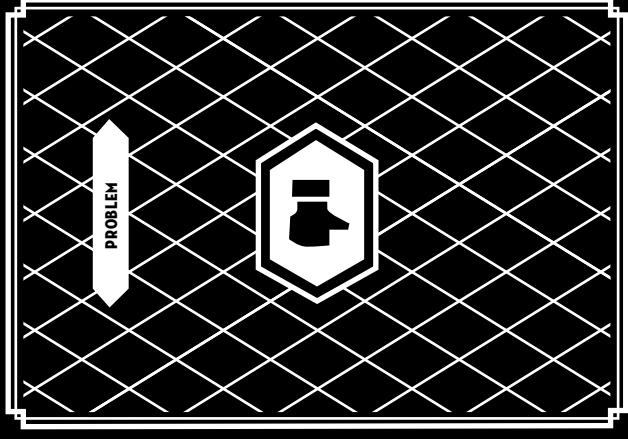

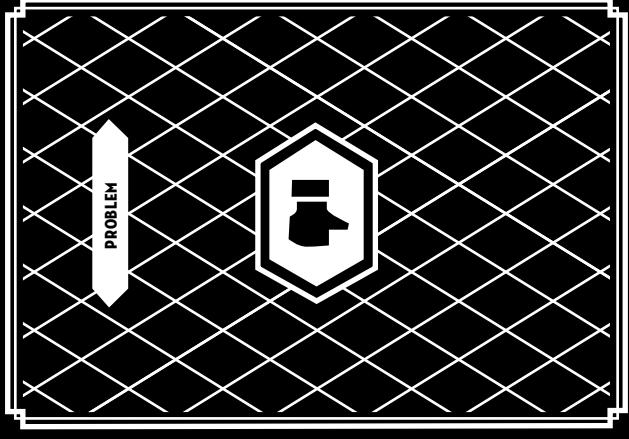

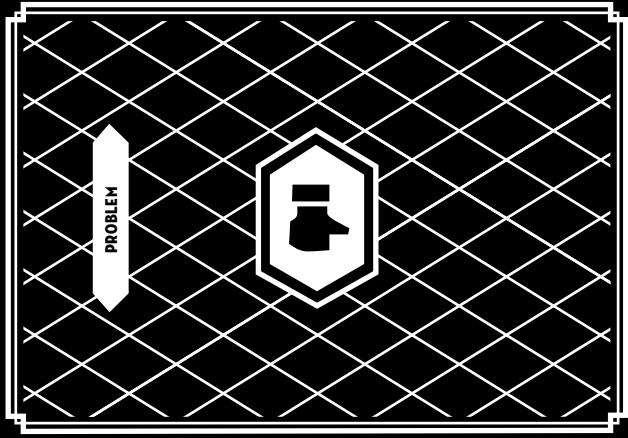

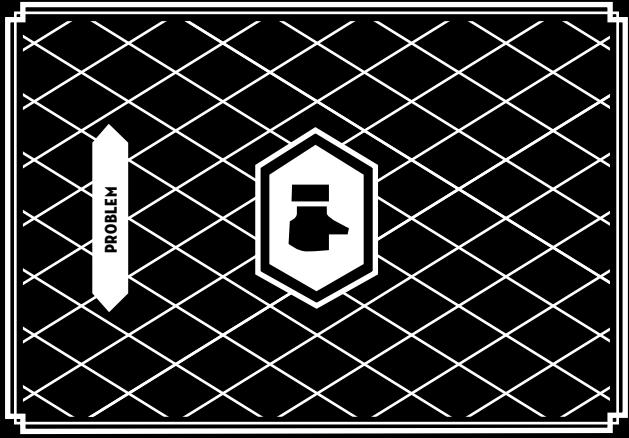

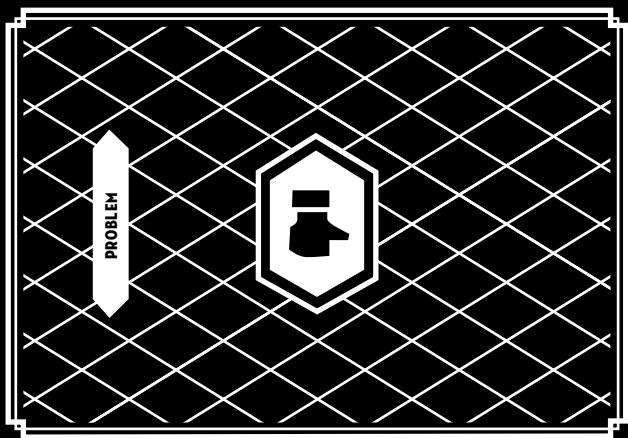

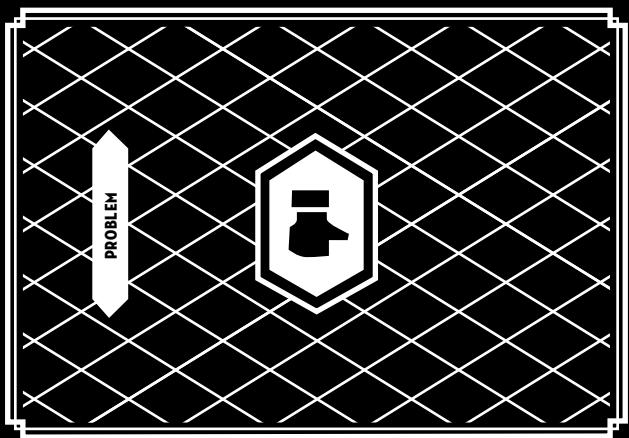

**PROBLEM****Close to the Edge**

You've been pushing yourself too hard for too long. Now the bill's come due.
All Advances on Cool tests become Holds. Counter by Taking Time to seek out someone, perhaps a Source, to lend you a sympathetic ear.

**PROBLEM****Chip on your Shoulder**

Lose a Push the next time you use an Interpersonal ability to gain information, and discard this card. If you have no Push, you lose the next Push you gain, and discard this card.

PROBLEM**Denial**

Your mind builds a wall around the terrible truth. Hope it doesn't crumble!
 After the next scene in which you gain evidence of a supernatural force or entity, lose a Push. If you have no Pushes, you lose your next Push as soon as you get it.

**PROBLEM****Empathy Hurts**

You show someone you understand their agony. But now that you've opened up, how are you going to close it all down again?
 -2 on all Cool tests. Counter by Taking Time for heavy drinking (or the indulgence of another self-destructive vice).

**PROBLEM****Guilty Conscience**

That interaction left you feeling like a Grade-A heel.
 You can't spend Pushes on Interpersonal Abilities. Counter by Taking Time to have someone remind you of your essential decency.

**PROBLEM****Driven to the Brink**

You're pushing yourself to the point where your frayed nerves have frayed nerves.
 -1 on General/Mental tests until you Take Time to calm yourself down.

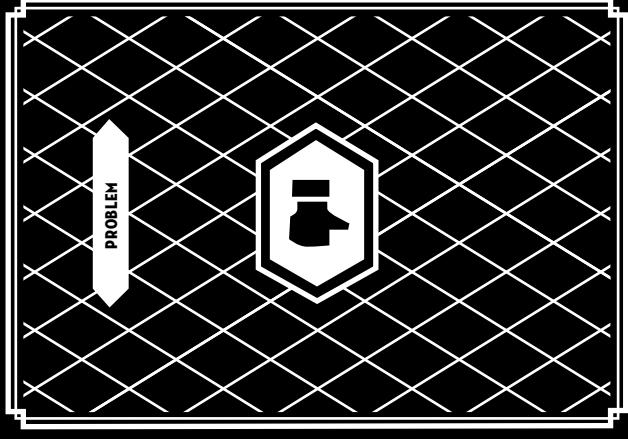

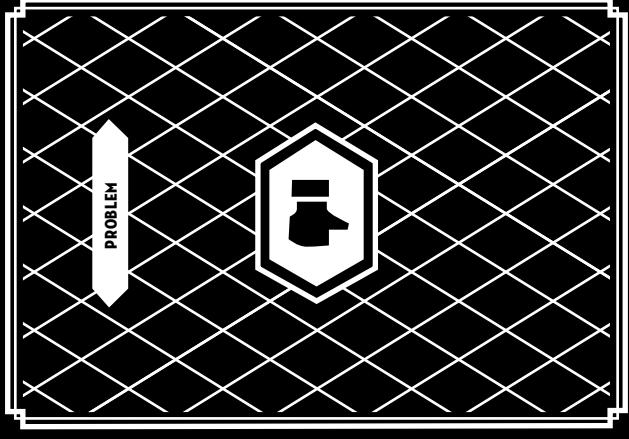

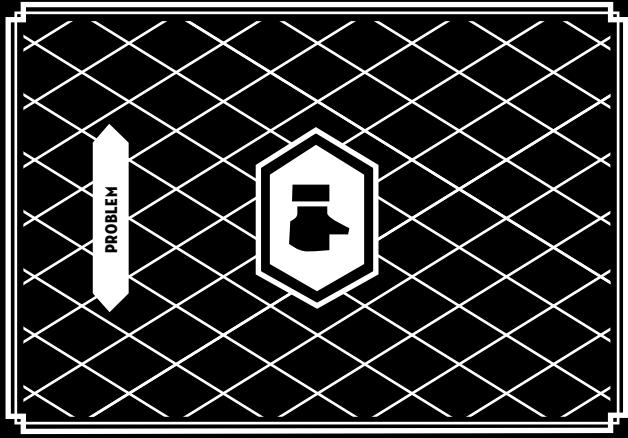

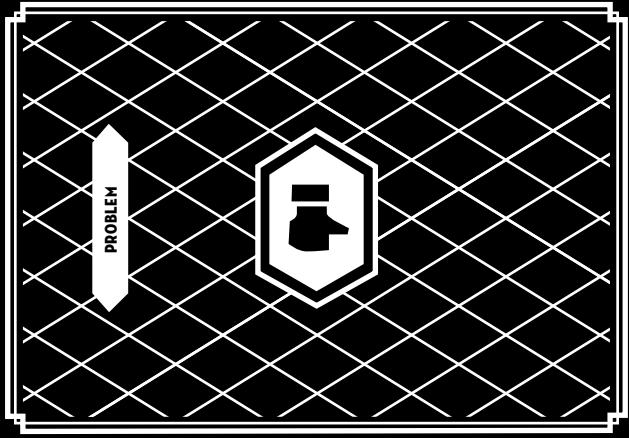

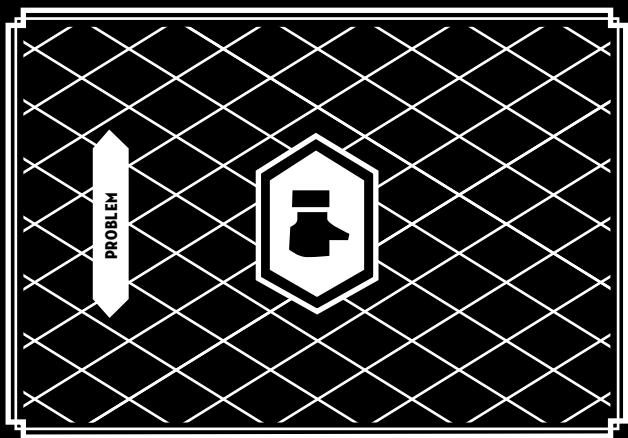

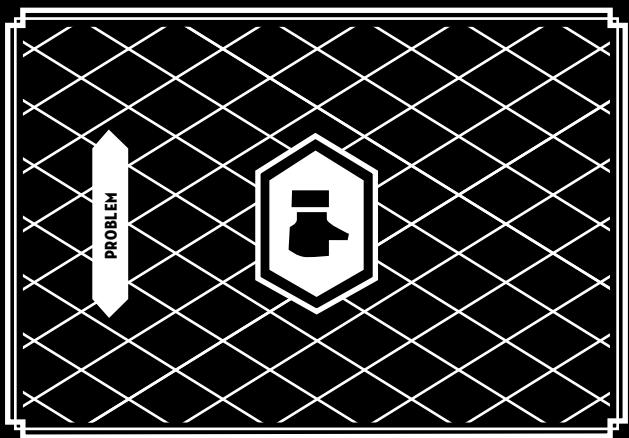

**PROBLEM****Fight, Not Flight**

To escape that scrape, you called on the terrified animal deep inside you. Desperation that stark isn't easy to forget.
 -2 penalty on Cool or Stability tests. Discard after your next Fighting test.

**PROBLEM****Heart Strain**

You made yourself do something every fiber of your being told you not to. You've flooded yourself with adrenaline and can't calm down.
 Counter by accepting a -4 penalty on any Challenge. If still in your hand at end of case, suffer a fatal heart attack.

PROBLEM**Heedless**

You never met a warning you couldn't ignore.
 -1 on Sense Trouble tests. Discard on your next Sense Trouble Setback.

**PROBLEM****Imminent Catatonia****Mythos Shock**

Rather than truly correlate the significance of what you just witnessed, your mind is about to shut itself down. Maybe for good.

**PROBLEM****Injury (Minor)**

Take a -2 penalty to your next General/Physical test and -1 to the one after that. Then discard this Problem.

**PROBLEM****Indelible Image**

You saw something you sure wish you hadn't. Now you can't get it out of your mind.
 Until Counter, -1 on all General/Mental tests.

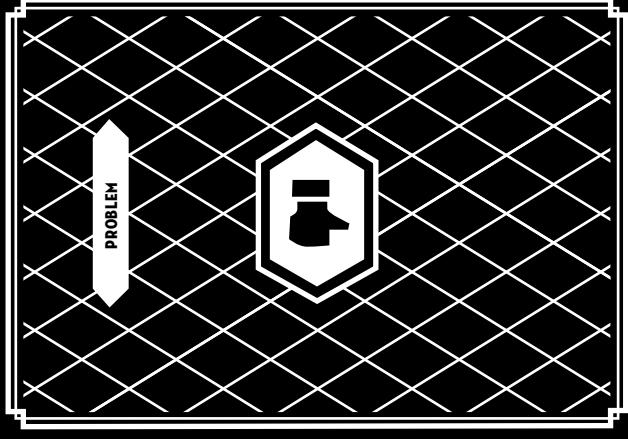

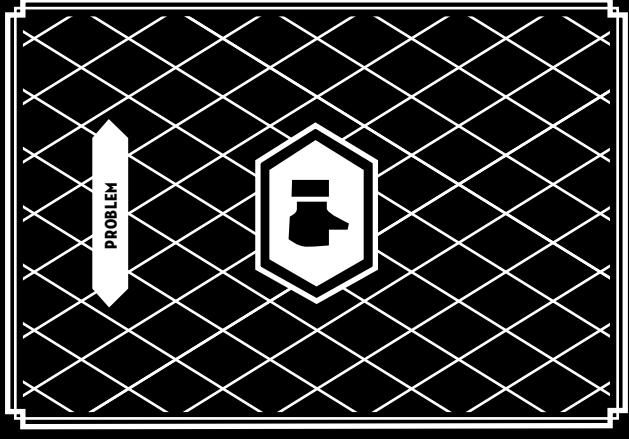

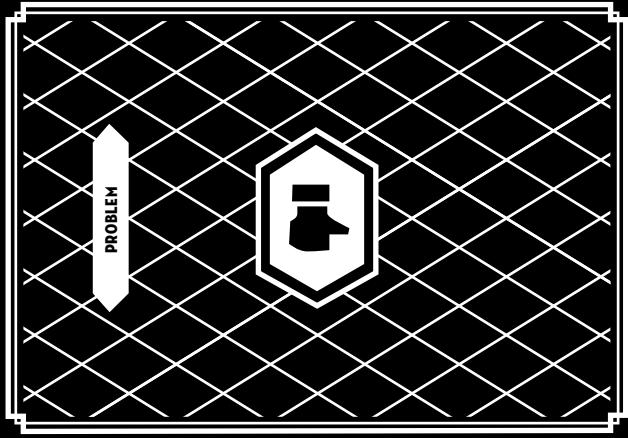

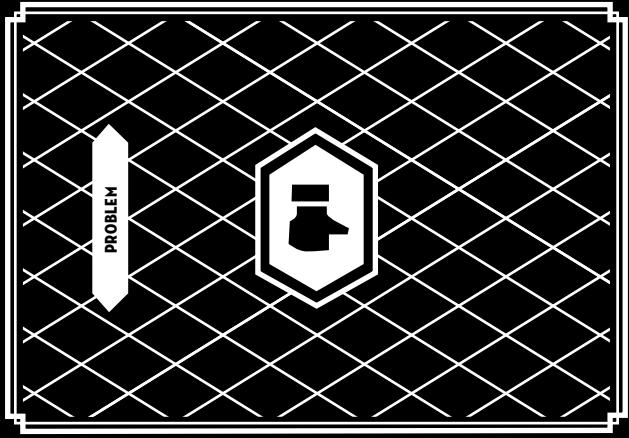

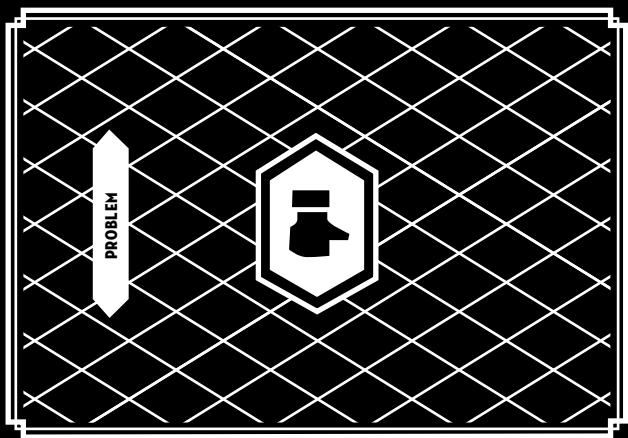

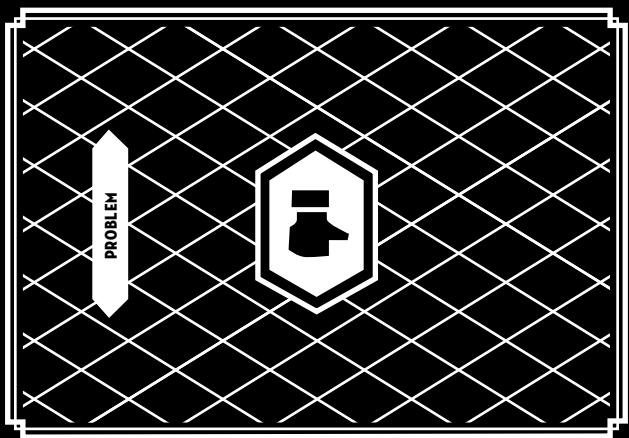

**PROBLEM****Injury (Bad Beating)**

You've been beaten within an inch of your life.
 Until you Take Time to recuperate, all General tests result in automatic Setbacks. Even after that, all General/Physical tests take a -1 penalty. Discard at end of scenario.

**PROBLEM****Injury (Off-Putting)**

Sometimes a bruise, cut, or slash isn't a badge of honor. It's a reason for others to slowly back away.
 Discard after two days pass in the fictional game world. Until then, you can't make Bargaining, Intimidation, or Reassurance Pushes.

PROBLEM**Injury (Life-Threatening)**

-3 to your next General/Physical test;
 -2 to all subsequent tests until
 Countered. Counter by Taking Time
 at a hospital or doctor's office. If you're
 still holding this at the end of the
 story, you die of internal bleeding.

**PROBLEM****Insolent**

The next time someone tries to get
 under your skin, make a Cool test,
 Advance 5+. Except on an Advance,
 you get lippy with them, and they
 decide to make trouble for you.

**PROBLEM****Not So Fast**

*Bad memories have a way of coming
 back on you.*
 When you Counter a Problem
 that penalizes any General/Mental
 ability, roll a die. On an odd result,
 regain the Problem.

**PROBLEM****Injury (Weird)**

*That inhuman creature did more
 than wound you — its venom, germs,
 or psychic effluvia left you suffering
 symptoms of sickness.*

You can't spend Edges that
 grant any advantage or bonus to
 General/Physical tests. All bonuses
 to General/Physical tests granted by
 Edges you keep in hand are reduced
 to 0.

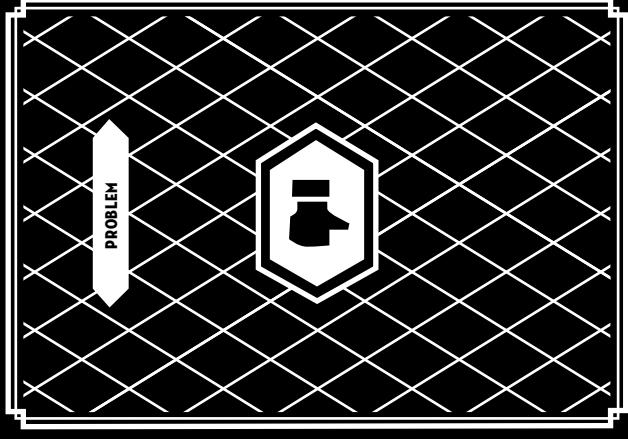

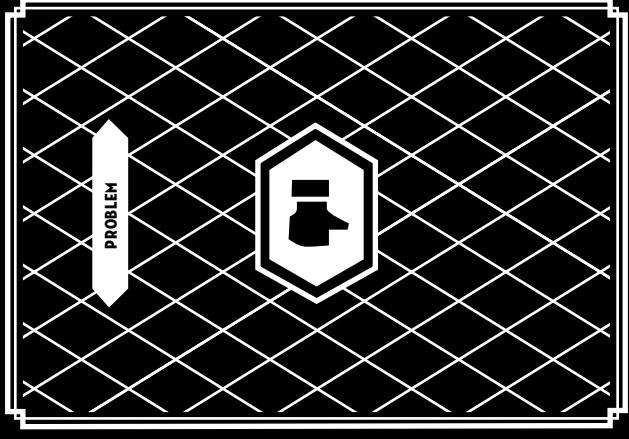

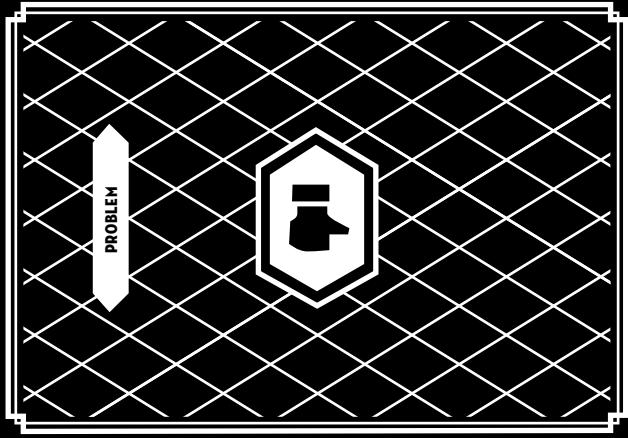

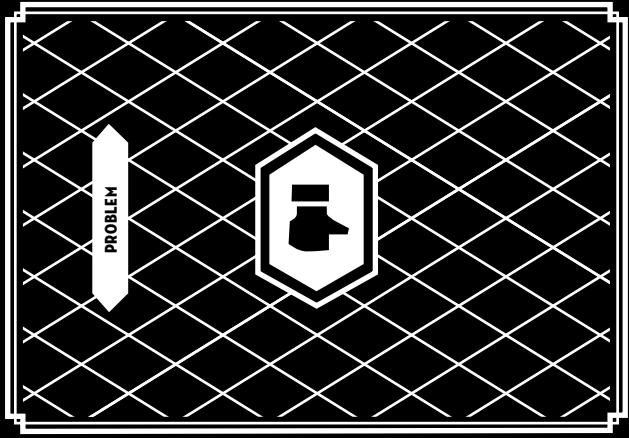

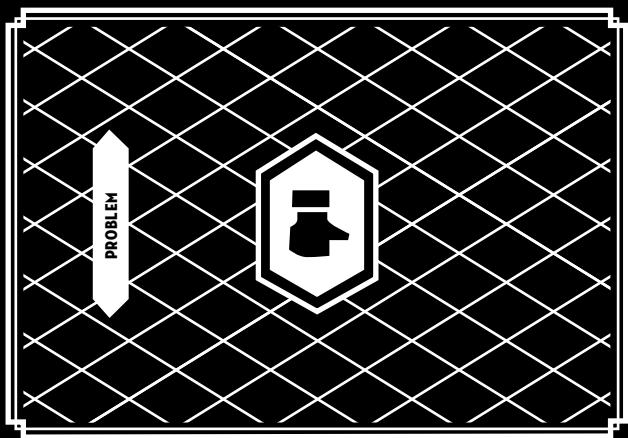

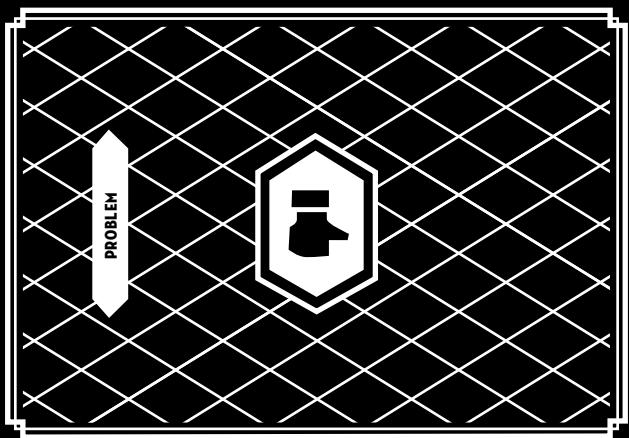

**PROBLEM****Mental Fatigue**

Lose a Push the next time you use an
 Academic ability to gain information,
 and discard this card. If you have no
 Pushes, you lose the next Push you
 gain, and discard this card.

**PROBLEM****Numb to It All**

*To avoid cracking up, you're just going
 to start ignoring certain implications.
 -2 to your next Sense Trouble
 test; -1 to all subsequent such tests.*

PROBLEM**Only a Matter of Time**

Push all those fears deep down inside you. You can deal with them later; when there's time.

If you haven't Countered this Problem by the end of the case, you do something crazy and/or self-destructive during the denouement.

**PROBLEM****Rattled**

Your confidence just took a major hit.

Until you counter by Taking Time, take a -2 penalty on all Cool and Stability tests.

**PROBLEM****Seething**

Even a baby could tell you're bubbling with barely suppressed anger. In this state you're not the sort of person people want to cooperate with.

Until you haul off and clock someone, you can't spend Pushes on Interpersonal Abilities.

**PROBLEM****Psychic Vertigo
Mythos Shock**

You can't help it. Something deep within you recoils at the sight of a being that neither history nor science can properly account for.

In scenes where one or more Mythos creatures are present, treat any even-numbered die you roll in a test as a 1.

**PROBLEM****Restless Continuity**

Your unconscious instinct to protect yourself goes into overdrive. You lose the ability to relax.

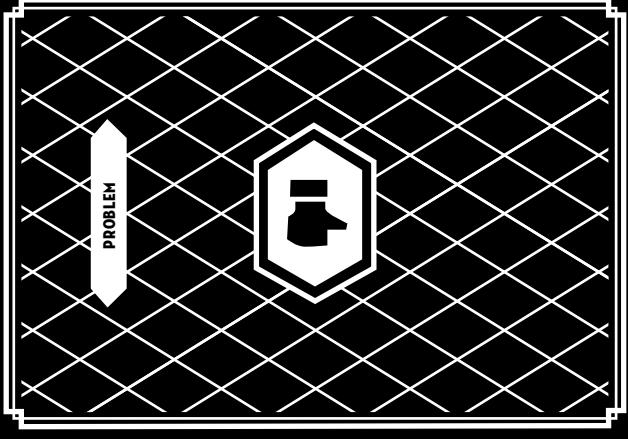

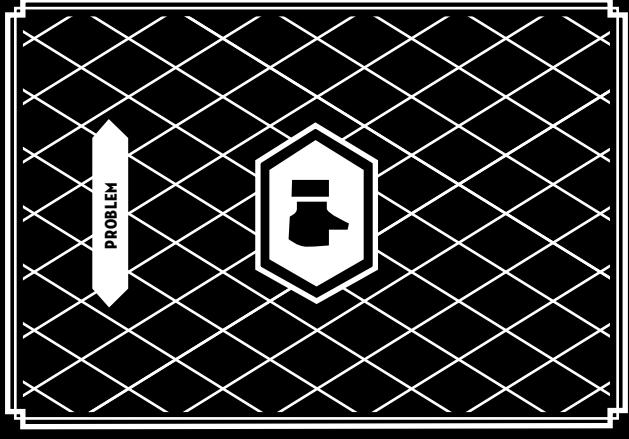

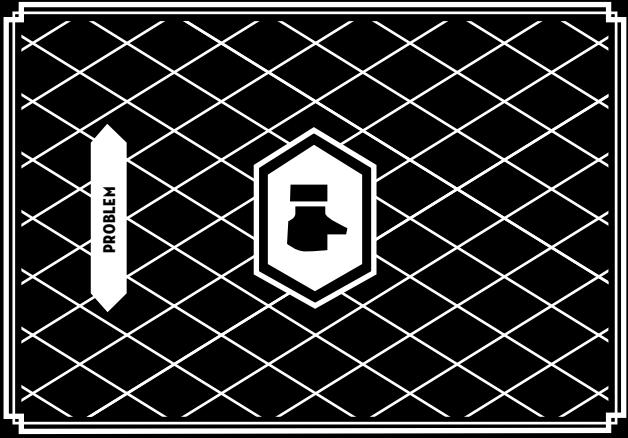

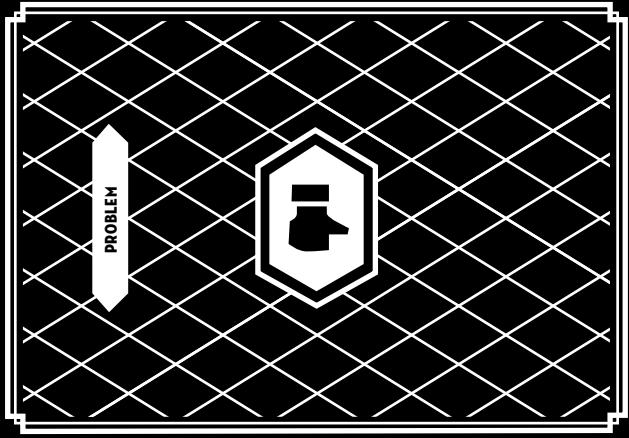

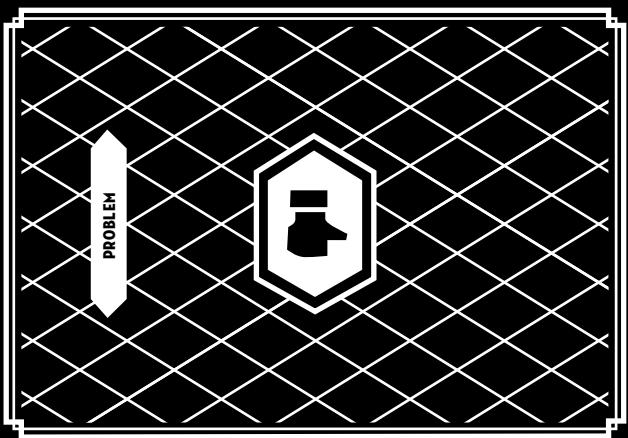

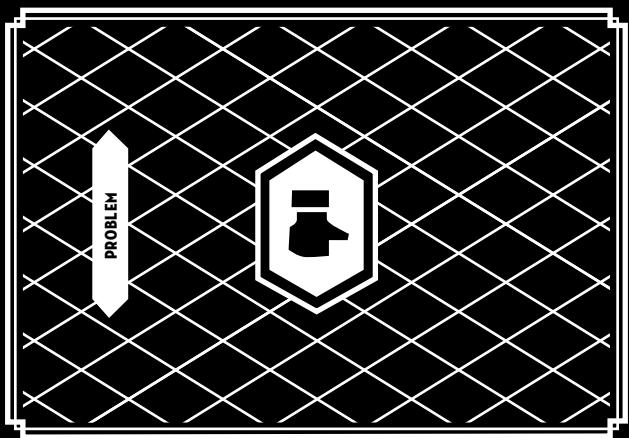

Before Taking Time to Counter any other Problem, you must Take Time to Counter this one.

**PROBLEM****Shaken**

You just saw something you wish you hadn't, and you can't stop shaking.

Treat your next Advance as a Hold, then discard.

PROBLEM

Sleep Deprived

You've been working this case too hard without a break.
-1 on General/Mental tests.
Counter by Taking Time to find a safe place to nap, and then getting a few hour's slumber.

PROBLEM

Swirling Possibilities

Maybe it's the weirdness. Maybe it's just all the missing puzzle pieces. Either way, you're letting this case get to you.
If you have an Edge granting a benefit to any General/Mental ability, discard it and this card. If not, wait until you get such an Edge, then discard it and this card.

PROBLEM

Winded

You went all out to prevail, but it will cost you.
-1 on Fighting tests. Counter by Taking Time, or spending an Edge that benefits Fighting or General/Physical Abilities.

PROBLEM

Stiff Drink

This calls for the throat-burning distraction of cheap bourbon.
Fortunately, you carry a flask in your jacket pocket for precisely this sort of occasion.
-1 to General/Mental tests.
Counter by spending 24 hours without drinking.

PROBLEM

Tempted

Resisting that old vice of yours took more out of you than you'd prefer to admit.
-2 penalty on all Cool and Stability tests until you Take Time to indulge this or another weakness.

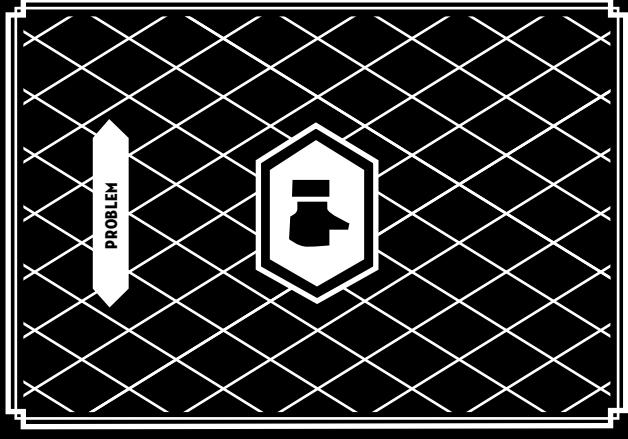

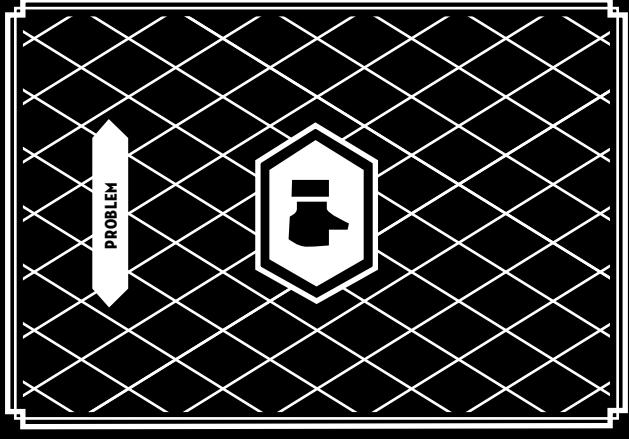

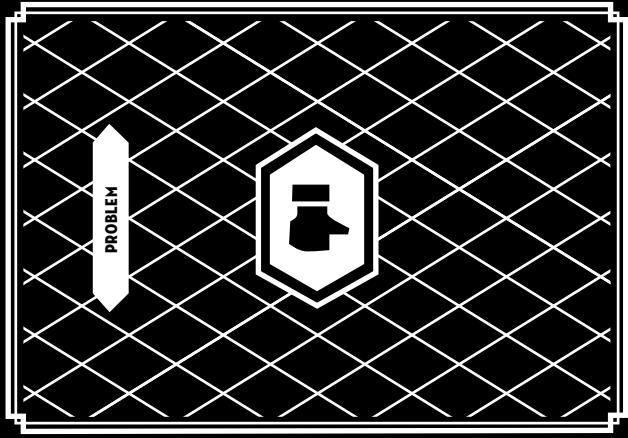

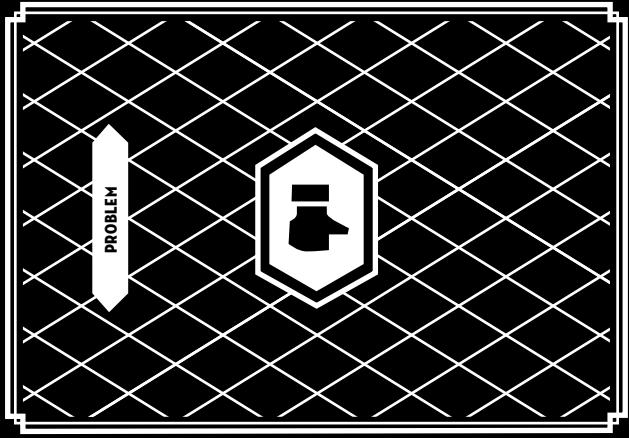

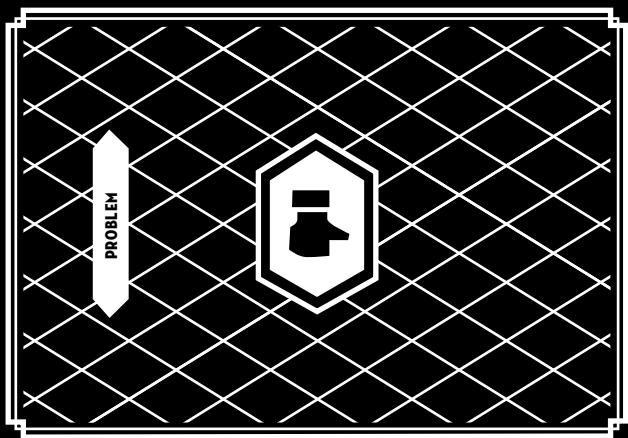

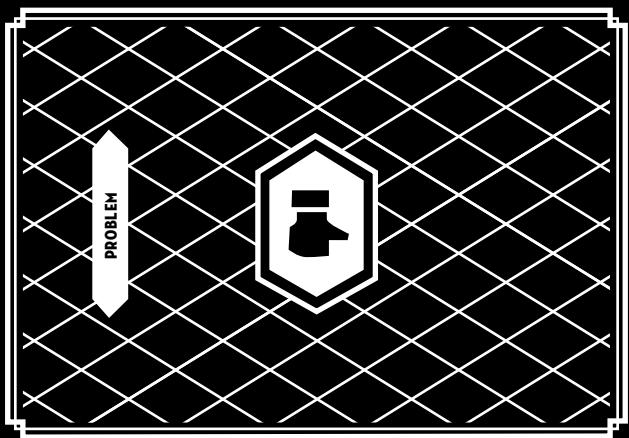

PROBLEM

Vengeful

You're not one to nurse a grudge. You're one to put it up in an expensive hospital with a round-the-clock team of doctors to give it constant care and attention.
Determine which GMC in the current scene most deserves your wrath. Unless you do something to lash out at this character, any codas in which you survive must feature a scene where you self-destructively lash out at him.

PROBLEM

Yellow-Bellied Rat

Running out on that hug was smart, not cowardly. But you let a whole bar full of loudlifes see your ungraceful exit, and that stings.

You can't spend Pushes on Interpersonal Abilities. Discard the first time you score an Advance on any Challenge.

EDGE

Bedrock Skepticism

The supernatural? Malign deities? What a load of hogwash! You'll never fall for that bunkum.

Spend to Counter a Mythos Shock Problem.

EDGE

"Dr. Freud Gave Me This Watch"

+2 on Hypnosis tests. Or get an automatic Advance on any Hypnosis test, gaining a Push and discarding this card.

EDGE

Against Horror

You're sick of the madness and violence bubbling up from beneath the city streets. If you don't put a stop to it, who will?

Spend for an extra die on any test. If spent on a Stability test, roll a die. On a 1, regain this Edge.

EDGE

Coming Up Shamrocks

It must be your lucky day.

Spend for a Lucky Break (when available). After getting the break, roll a die: on an even result, this card returns to your hand. If at the end of the scenario no opportunity for a Lucky Break arose, spend to Counter any non-Mythos Shock Problem you can justify resolving with a stroke of good fortune.

EDGE

Eerie Feeling

+1 to Sense Trouble tests. Spend for an extra die on a Sense Trouble test.
