

To print your Sooth Deck, set your double-sided printer to **short-edge binding** and print on a cardstock material. Then, with a sharp utility knife and a very steady hand, use the white line as guides to trim the cards apart. If you can find a cylinder with a 3.5" diameter—a can, a pipe from a hardware store—you can use it as an edge to cut around.

If you don't have a double-sided printer, print the pages individually and then glue them back-to-back with a thin, even coat of adhesive. Before glueing, hold the back-to-back sheets up to a light source to ensure they are lining up correctly.

The gutters between the cards give you a little bit of leeway if the two sides do not line up exactly.
