

Axis Walker Weapons

Cut out WWII Walker
15mm / 1:100 Scale

Instructions: Print out paper and paste to a 1mm or .040 thick sheet of cardboard. Score all the dashed lines. Cut out all the pieces marked with an X. Cut out all pieces following the grey lines, starting with the slits. Fold and assemble the pieces according to the schematic.

Additional Instructions:

The parts included on this page are the reverse sides of some of the smaller parts, like turrets. First, make sure that the first page is glued to the card. Cut out the black rectangular box on the front side, then cut out the matching box on the second page. Glue the back side piece to the back of the card, making sure that both sides line up, and leave to dry. Once dry, cut out the piece following the grey lines, starting with the slits.

Teppoyari Lance Torpedo: The iconic (and disposable) weaponry of Japanese walkers can be represented with a simple toothpick. Simply fix it to the arm with some blue tack.

Feel free to colour!

Weapons:

GrossePanzerFauste

GrossePanzerShreck

Teppoyari Lance Torpedo

Grenade Launchers

1.8cm KwK 77

3.2cm KwK 77
