

DEDICATION

I am deeply indebted to many people, without whom many of the ideas on these pages would have died stillborn. It has been a long, long year of trial and trouble, but made easier by friends both old and new. This supplement is dedicated to them certainly and with heartfelt grat-itude, but it is also to those characters that lived, loved, and died in pursuit of loot and glory that my true dedication goes.

Koryu, leader of the forty-seven Ronin; Elric the Hell-Lost; Daniel the True Defender of the Dreaming Isles; Jothar, Champion of the House of the Rising Sun and Baron of the Realm; Kazamon, the Ring Bearer, hobbit and changeling; Benk the Benighted; Hamal Assad's Twelfth Lancers; Mithrom, bandit turned demon; Mogadore the drunken dwarf; Jorelia, ama-ton leader of the dommed Hell Raid; Lasuli, elven and unafraid; Fredrick the Bold, slayer of Smaug and Sauron; Bolo Mark Nine, destroyer of a dungeon and near slayer of an entire world; the Seven Spartans and their never broken shield wall; Talso the grim mage; all of you are forever graven in the iron legends that will forever follow your steps through allternity. To you and the shades of near four hundred dead I lift a tankard of Rumble Tummy's ale in respectful salute. Koryu, leader of the forty-seven Ronin; Elric the Hell-Lost; Daniel

Without all of you I could never have dreamed my dreams of glory, nor beheld the beauty of the Misty Mountains of Arduin.

FORWARD

About three years ago fantasy róle playing games began to become extremely popular among gamers of all types. At first it was something new and wonderful, and ideas and information flowed freely among the players.

About a year or so ago things began to change: the joyous pame was becoming <u>big</u> business. And those non-amateur game designers took on all of the trappings of things that have profit as their main motivational force: greed, secretiveness, hunger to "control the market" and all of that other garbage.

Amateurs who tried to publish their ideas were heing told to cease publication if their ideas even remotely resembled any those big business types had published. Yet those same people ripped the amateurs' ideas off quite freely, and with dismaying frequency.

This supplement is offered in the hopes that it will infuse new life into the amateur side of fantasy role playing games, and stimulate the free idea exchanges so sorely needed to keep this type of gaming alive and viable. This supplement does not seek to replace or denigrate any other fantasy role playing supplement or game, either professional or amateur. It could have been three times the size you see before you, but personal problems, finances, and lack of time required atherwise. However, if well received, this supplement twill lead to others dealing almost exclusively with hundreds of new monsters, spells, and magikal treasures, already in use in the "Arduin Universe."

This supplement is in rough form. Therefore we apologize for any misspellings and punctuation mixups, and hope you'll bear with us.

If any person,organization, company, or other entity either singularly or collectively is offended by any part of this supplement, we apologize for it now. SORRY. This supplement is basically original, and conceived by myself. I hope you enjoy it. Because of problems, too numerous to list here, our original publisher had to withdraw at the last minute. What you see here is a last-minute effort by two of my best friends, Peter Savoy and Bill Voorhees. Thanks again.

Special Note: the artwork for this supplement is the sole doing of one fine young artist: Errol Otus. I'm only glad l'11 be able to say ten years from now, "I knew him when..."

HOW TO PLAY THE GAME

It seems that most new players are uncortain as to the sequence of play in a fantasy game so here is a rundown of most play situations.

OVERLAND TRAVEL: If the route is off marked primary or secondary reads, it goes like this? Move for one hour, then rol to see if you encounter random monsters, then move for an hour and repeat the roll for random monsters. During daylight there should only be one chance in six of meeting monsters, unless you are in woods, marshes or jungle, in which case it is two chances in six. At night however, all chances are doubled. At any rate, if a monster is encountered, then the sequence of events goes as follows: Determine the distance between you and the onster (from 20-240' in open terrain, from 10-120' in semi-covered or hilly terrain, from 10-60' in thick forrest or other vision restricted terrain, and always halved at night), then determine who can see it and who can't (simple line of sight) and then determine the monster's reaction to seeing you (roll a twelve sided die using this scale of reactions: roll of 1-3, monster is frightened off, roll of 4-6 and the monster shys back a bit and appears hesitant and nervous, roll of 7-9 and the monster warily approaches the party, and a roll of 10-12 the monster launches itself in a screaming attack upon your party without regard to it's own safety. For intelligent focs the table is: roll a 1-4 and they flee, roll a 5-8 and the indecisively stand around and debate on what to do, and of course, a 9-12 is an unbesitating attack upon the party), once that the distance of the monster and it's initial reaction are determined, then it goes like this. If the monster is charging and he is less than 30' away, this constitutes a surprise attack, and your party may not react until the monster has completed his movement and attack. Thereafter it is a very simple matter of the fastest dexterity attacking first, and the next fastest next, and so on down the line. This is covered more completely in the section on combat. But a short description would be: all attacks are made, all movement is made, and then the process repeats itself. Because it is the dexterity that determines what attacks so in first it quite frequently happens that a warrior will strike his opponent just before it is struck in turn by a blast of magic, and his weapon is caught in the effects, or he himself is. Such is the stuff melees are made of.

After the batle is over, and all of the healing that is possible is done, then the movement process is repeated until the night camp is made. One point here, it is recommended that y⁶₀ have ten hours each of daylight and night, with two hours each of semi-light at down and dusk. This will be maintained year around unless you decide to do what i did nad have a set of seasons and the like, at which point you're on your own borcher:

So there you have it, move an hour, roll for monsters, and move an hour and roll, ad infinitum. The only change you may wish to add into your game is a die roll once an hour to see if you are lost (one chance in six of this happening). However, I recommend that this rule only be used in extremely difficult or overgrown terrain, or outside of the boundaries of the lands where all of your adventures take place, or in pursuit situations at night.

It is also recommended that guards be posted at night and with the party's mounts while they are down in the dungeons, because a good umpire will always bit you when you least expect it.

Expeditions inside dungeons are just the same, only it is always dark, so bring your own light.

If you are at a loss as to how you can decide just what type and how many monsters came up on the random monster roll other stellar role-playing gammes have a fart list, but your better off compiling a list of your own, and then rolling percent dice to see which kind pops up. Consider 1-3 people as a base unit for a dungeon run, and add more monsters for every three people on the run (if you have a party of three, then only one red dragon shows up, if you have 4-6, then it's two and so on). It's really very simple if you want it to be.

POINT SYSTEM

In the Arduin Universe, the ubility to advance to higher levels is frame in a cornel most and nate on acquisition of treasure. Interfore, plates are given for many invanis, but NDT for gold or other treasure. After all, it is the act of rohbery, not the amount arbien, that gives the thigh its experions.

These characteristics are only guidelines, but if you accept the responsibility and roll for them, then you must accept the results as a permanent part of your character thereafter.

HARGRAVE'S TRADER (MERCHANT) CLASS

Note: Intelligence Range: 12-18; Constitution Range: 15-18 (prime requisite). These two ranges must be met if one is to be a Trader. They progress by earning experience in "commerce." For every 1.000 g.s. value in business they earn 10 experience points. (100,000 g.s. = 1,000 pts.) Of course, they get fighter's point and the like also. However, if a Trader never caravans/sails out of his city he can never exceed 10th level.

Traders are a class that combines many facets of warriors, slavers, techno's and normals' as well as possessing their own special talents. Traders can "bargain" for reduced cost of items, can find buyers for hard to sell items (for a commission of course). He (or she) has access to all sorts of useful information (through the guild) as to the locations of cases, mountain passes, caravan routes, etc. They can be interesting and formidable characters.

Note: "Bargaining" starts at 5% discount and improves 2% per level up to 40%. Then up by 1% per 3 levels to 50% (maximum). So bargain and enjoy! The ability to "equivocate" (talk so fast, logically and convincingly that all intelligent creatures may either, a) help you; b) be so confused as to not hinder you, or c) flee in confused agitation), starts at 5% per level then goes up 2% per level to a 40% chance then up 1% per 4 levels to a 50% (maximum). They always roll on a 6 sided hit dice up to 10th level. Then up 1 woint per level.

Traders may wear leather armour only (with shield) or chain mail (no shield) and may use any non-missile (no pole arms either) weapon. Shortswords, scimitars and ocassional rapiers are favored. Traders have a bse 35% chance (up 1% per level) of knowing proper directions overland even without maps. They can also pick locks, disarm trapped chests, etc. like a thief 1/3 their own level. They also have the ability to "appraise" the value of any object with a 75% base accuracy, start upping at 2% per 3 levels thereafter. They can also read, but not use magic scrolls.

NEW CHARACTER TYPE "PSYCHIC"

General Notes

This character is a "naturally" psychic person. He can never have any characteristic higher than 12 except intelligence (prime characteristic) which is unlisticed. They are not very physically inclined, tend to be dreawy and "out of it" most of the time. They can never use magic spells of any kind. Magic items can be used (if they remember to) but more than 3 being carried at once breaks their "msychic concentration." They never wear argour. Only Men, Hobbits, Amazons, and 1/2 Eives may be Psychics. All of the "intuits" start at a base of 75% and vork up at 5% per level.

Special Note

Hit dice are always 6 sided because Psychics differ in their beliefs about what they do, they have no separate "names" for each level. Use what you like for each personality, use magna points (but use wisdom-intelligence-constitution)also.

NEW CHARACTER TYPE

"The Barbarian"

Barbarians are uncivilized, unlettered warrior types that intensely dislike all technological ideas and itoms more complicated than a crossbow. They are extremely vulnerable to magik, believing in it too much for their own good. They dearly love to fight, and get a *5 save versus fear, as well as having a 50% chance, in any combat situation, of discarding their missile weapons and charging in glee! The only exception is against undead, which they hold in superstitious awe. They will (koll 01-100) retreat in an orderly fashion 60% of the time, stand fast but with -1 attack due to their ave 30% of the time, and 10% of the time retreat in compleat disarray. They can choose at any time during combat to go Berserk, adding +4 to

They can choose at any time during combation go berserk, adding +4 to their attack, but subtracting -3 from their defense. Once berserk, they will fight blindly for 1 melee turn for each level lesstham 20th level that they are the subtraction of the energy are dead. They for 15 also a 60% change for 15 they are they for the subtraction of the subtraction of the subtraction of the they for the subtraction of the subtraction of the subtraction of the dead of the subtraction of the only by choice.

They move 35% more silently and have 35% better hearing than civilized types. Their sense of smell is 50% better, and they climb 40% better also. They can never have a dexterity or agility of lessthan 11, strength less than 12, constitution less than 14, wisdom more than 17 intelligence more than 16, or charisma more than 16. Their egos are always at least 13, and after you have colled your character up, add +1 to his hit diffee (up to 12th level).

Human to field your character up, and to to his in to lice (up to field field). Human hind, anazons, diarves, orcs of all types (as well as all goblin types) and hobbits only can be Barbarians. Elves are <u>always</u> civilized, other types being either civilized or pre-barbarian in nature. Barbarians prefer axes, two-handed weapons, and spears, and usually wear

Barbarians prefer axes, two-handed weapons, and spears, and usually wear leather armour or none at all (a few heing rich enough to have chain mail). Never start a Barbarian with more than 60 G.S., and never allow them to know more than three languages,regardless of intelligence.

NEW CHARACTER TYPE

"RUNE WEAVER"

Rune Weavers were the original human magik users, learning their craft from the reptillian races of eld. Their magik is stronger than that generally practiced now. It is, however, slower acting, and lengthy in its con-juration. They never wear armour, but <u>do</u> carry staves and daggers. They use a 6-sided hit die, and have a "prime requisite" based on the average of their dexterity and intelligence. Then multiply the prime requisite by their level to get their mana points. <u>Do not di</u>vide as for other mages. Their spells take one melee turn per level in power of continuous rune weaving to work (with a one turn delay after completion). Modify this by subtracting 1 melee turn required per four levels in experience. Rune weavers may safely weave spells one level above the level normally available according to their They can weave spells two lovels above with a 30% failure rate, and level. 3 levels above with a 90% failure rate. Any rune interrupted when 50% or less completed simply fails to work. 51% to 85% completed and it misses fire in a random direction at partial strength. 86% to 99% and it boomerangs back on its user. For every level a Rune Weaver is greater than the level needed to use that rune, add10% to the spell's attributes.

Rune Weavers do not dispell, they "unravel"! Thus, if a Rune Weaver wished to dispell or "unravel" a 20th level spell, all he would have to do is to "unravel" it for 20 melee turns (1 turn per level), using the full dispell magik mana cost each turn. But it would work 100%, nofailure. "Detects" work similarly, but the rune weaver "follows the weave" to gain insight. For every melee turn (and full detect magik mana cost cachturn) he gets a 20% chance of success and 5% information. Thus after 5 turns he'd be 100% sure it was magik and know 25% about it. So he'd "follow some more weave" and get all the information he wanted, right up to 100% knowledge after 20 melee turns.

NEW CHARACTER TYPE

"TECHNO'S"

Techno's are specialists that disbelieve 100% in magic, and work from a strictly scientific point of view. They can "figure out" nearly any mechanical or technological item, given enough time and resources. They are constantly dismembering dragons to see where the flame thrower was hidden! Or getting eaten! They dislike intensely all forms of mages but tend to grudgingly tolerate clerics. They never wear armour unless it's something like a flack jacket. They also never carry anything except technological weapons to fight with. They think warriors are "a bunch of nea derthals". They have a 50% base chance, improving 1% per level, of "figuring out" mechanical devices, and a 10% base chance, improving 2% per level, of "figuring out" electronic devices. This means learning how they work, not why. If they choose one of the above as a "specialty", add 15% to base, but then they can only "figure out"that type of things.

NEW CHARACTER TYPE

"MEDICINE MAN"

Medicine Men are barb ian priest/mages, being somewhat akin to Druids. They can perform magik from all three categories. They never wear armour or use weapons other than their mystic war clubs and ceremonial daggers. They acquire animal "guides", usually punas or wolves, 1 per each 3 levels of experience, which do all that is asked of them, even unto death. Medicine Men are also well versed in herbal lore, and can brew poison or poison antidotes of one &-sided die in potency per each 2 levels of experience attained.

They must divide their mans three ways, using each third for clerical, mage type, and druidical magik. They cannot use any of the "true" offensive spells such as fireballs, thunderholts, magik missiles, etc. But they can use thunderclap, wind, or other "natural" spells offensively. They can, of course, use all form of defensive magik. They do not turn away undead like clerics. They can also do "drum magik", which essentially "drums a spell", taking two melee turns per level of the spell required. This has only a 20t cost in mana of what it normally would have. For every two levels over the level required for its use, the drum magik can "drum away" l level of

NEW CHARACTER TYPE "WITCH HUNTER"

Special Note

Barbarians and Witch hunters detect each other and usually fight on sight. Usually only Humans are of this type, although Amazons and Dwarves are occasionally; hobbits and Elves never are.

General Notes

These characters are religious fanatics (99% Christian) that are obnoxiously "holier than thou" in their attitude towards just about everyone and everything. They will work only with Lawful types and will nearly <u>always</u> attack neutrins (75%) or Chaotic (100%) types. They are the only non-Magician or non-Clerical type that can use certain of those type spells.

Advantages

A. They can use the following spells (but only as the appropriate level is reached): 1) Detect Magic; 2) Detect wil; 3) Protection from evil; 4) bless (on himself only; 5) REmove curse; 6) Prayer; 7) Dispell evil; 8) Detect Lycanthropes; 9) Dispell emagic; 10) Removely strength; (They are the only types that can handle cursed items safely). The can memorate these regardless of their intelligence. Note: Divide their manna points by four not three.

B. They can "sense" the un-ead (30' indoors--90' outdoors). Starting with a 20% base chance of success then building by 5% per level. <u>Nothing</u> blocks this "sense."

C. Due to their righteous self esteem and beliefs they <u>never</u> have to roll vs fear or for morale except against Greater Demons.

D. They get +3 (vs undead) saving rolls and +1 (vs magic). Their attacks vs Undead are always +1 (lst-5th level), +2 (6th-10th level), +3 (11th and above).

E. They can charge "in righteous fury" (like a Berserker or Barbarian) and add +3 to their attacks. But like Barbarians, they must run it completely out. They can only do this vo Undead or Evil Clerics.

Disadvantages

A. They will never retreat from the Undead or Evil Clerics but will stay and fight to the end (25% chance they'll charge in righteous fury).

B. They can never have more than 12 intelligence or 15 wisdom. Their charisms can never exceed 9 except with Lawful types where it's +5.

C. They will use only maces (except in dire emergency when they'll use what's at hand, but then they'll do penance afterward), and will never own or use anything but strongly Lawful magic items (limit is Ishiald, 1 armour, 1 mace and 1 other). They will give to Clerics (652 chance) or destroy (303 chance) or leave behind (32 chance) do the excess or other magical items. Neutral/chancit stuff is always destroyed.

D. They cannot (no chance) detect traps and are highly susceptible to disease (-3 saving rolls) and poison gas (-2 roll).

E. They hate technology and refuse to use anything (except crossbows) complicated.

MAGIC IN ARDUIN

In fantasy warganing thete has been continual argument about magic and how it is supposed to work. The system presented herein is one that has undergone constant revision until it has become a truly workable system. I hope you understand though that this system is a based from which to work, and that magic is i insted only by the reader's immgination.

To memorize a spell, a mage has to sit down and concentrate on his book of spella, undisturbed. The base for memorization is one hour per spell divided by the number of spells that the mage may memorize of that level. For example, using ADY ofter system, a fifth level mage may memorize a first level, 2 second level, and one third level spell. So when he sits down to memorize his spells, it takes one full hour for the third level spell, 30 minutes <u>each</u> for the second level ones, and 15 minutes <u>each</u> for the first level ones; a crand total of three hours.

During combat, a mage may "fire" a spell he has essorized every melee turn for so long as he has spells semorized. So the same mage that took those there hours to esserite his spells usuald be able to use a spell every melee turn for seven turns, whereupon he would have no more memorized spells to use, until he essorized more, or until he ran out of manna points.

Scrolls are simply pieces of paper that have the power of a spell imbued within them, and have the trigger pinzes written upon them. Therefore scrolls may be read and used <u>every other meler turn</u>, because it takes a little time to drop one scroll, pull out another, unroll it, and read the trigger pinzes.

In both cases if the mage is distrubed while saying the spell or reading the social, his concentration <u>will be broken</u>, with the result that the spell could fail entirely, partially fire, or even bomerang back upon the user. Naturally this is not exactly what the mage had in mind, so discretion is indicated for all of those situations in which the mage could be bothered.

In the universe where Arduin exists the use of magic is effected by all metale, so that mages cannot wear armour of the matal warfey and function properly. Leather armour is fine, and even shields made of only wood and leather can be used, but most mages find that this cuts down their dexterity enough that they soldow use it.

Mages generally do not need to carry weapons other than their daggers, but those of <u>fifth</u> <u>level</u> and above can use <u>magic</u> suords, and those of <u>tenth level</u> and above may use all <u>magic</u> weapons. However they may never carry once than one at a time, for the use of weapons requires a mental discipline allen to the philosophy of eagic, and so will interfere with a mage's concentration if he relays on them too much.

Magic is indiscrizing at an unit destroy friend and foe alke, so a mage should exercise great caution in combat situations, for in a molec it is all too casty to hit friends as well as encodes. Therefore, as a general rule, MAGIC SMOULD NOT BE ALLOWED IN CLOSE COMBAT SITUATIONS WITHOUT HEAVY PRACETACES OF CHANCE THAT EVER FRIENDS WILL BE HIT.

If a mage has tried a fireball against an ore, and the ore made his saving roll and took only half damage, that use same that as fir as that particular type of apall his concerned, it does not work well against that particular ore, and from that time forward, his saving to roll is automatically made against that mages fireballs. It is simply that the mage's fireball magic is not quite the right brand of magic to "cook" our ore with. This holds true for all magic, and in a situation where the spell with effects you or lawes you alone. If the saving roll is matched, then thereafter that spell will NOT EFFECT THAT SAME TAKET. The only bright spot is that when the mage progresses up a level, his entire armory of magic improves those masty fireballs. And reacher also, that the hermoses a true; fail that saving roll and thereafter you grimon essing the particular spoll bat that that mage fire, until your, baby, burn!"

MAGIC IN ARDUIN CONTINUED

Carrying this a little further, we see a mage trying to detect magic on a sword his hords friend has found. If he fails to detect on the first try, he will get up <u>second</u> chance as that avord just won't register to hig detect magic spell (until he goes up a level and my try again). I think you get the picture.

Remember also that to use a wand or staff, the user <u>must</u> concentrate in order to do so. For if just thinking about firing that wand or whatever, casually, was enough to fire it, then there would be a lot of accidental firings. And I for one do not think that mages would build magic wands that would go off in their faces, so a little concentration is needed (as well as physical contact) to fire those things.

Remember also, that rings <u>mugt</u> be rotated to activate (for the same reasons), and that samilets and the like must be fingered or cupped in the palm. All of which actions are usually very visible to a watching oppoand. And if a warrior is wearing his magic ring of flight under his armored gauntlets when he saild off the battlements, then he'd either better grow vings or hope he lands on a nice soft pile of hay, because that ring is <u>untyrable</u> under all that metal (and just try grabbing an amulet under a breast plate and gambean).

EVEN MORE MAGIC IN ARDUIN

The unwhot of all this is simple; you have to have your magical goodies where your hot <u>little hands can get them</u> at a instant's notice. And if you want to really jazz up your game, just add in a PHICKER PHACION. What's a P & P you usk? Simply put, it is a petcent for mages or whomever, to grab the wrong end of a wand or to read off the wrong spell on this scroll in his haster to slay the onruenhing purple usyls that are going to eath him. A suggested base is bOX to start, going down 2% per level attained, and modified by your dexterity (-3% per each point over 12 or conversely adding 5% per each point leves than 9).

Another area that is seldom explored in fantasy gaming is what constitutes a "hit" when the weapon you've lobbed at the monster only has to touch it to work? This is discussed in the maging section because most simple "contact" weapons are magical in nature.

When using a weapon that requires no penatration to work such as a stasis compacted green slime grenoid, just roll on the appropriate combat table, and add <u>plus</u> it to your attack. When using something like a shock wand (super cattle prod), roll and add <u>plus</u> it to your attack (you get less because you must injose and strike as in normal combat).

When throwing an area weapon like a jar of magic shrinking potion, make your attack, aiding plus 6, but then rolling percent dice to see how <u>much actually hit</u> your target (and it friends are near, roll to see if they've been hit also).

Another point to remember is that fingers of fire, cones of cold and the like <u>all</u> have a tenderot, to "splash" when they hit a solid carget. Therefore consider that 50t <u>will</u> "splash" at ten foot range or lune, dropping 10% for each 10 feet in range thereafter. The splash will be divided in quarters, one quarter each going laft, right, up and down. Therefore, if an eight dice finger of fire in fired at a gorgon seven feet away, 50% will splash this, 4 dice found de work going in each of the directions). That can have fitneds if they are in the way. Thus, once again, we see a limiting factor placed on magic.

Some controversy has also revolved around "manna" or "spoll" points and their application towards limitine magic use. In Arduin here is the formula we use: Take the mages intelligence and multiply it by his level, then if his intelligence is 8 or less, divide by four. If it is 9 to 12, divide by three, and if it is 13 or greater divide by two. Therefore, a /h level mage with an intelligence of 16 would multiply 16 x 2 = 112 and divide 112 by 2 = 56 manna points that the mage will generate ach twelve hour period of rest (of twenty-four hour operiod of activity). This is important as every spell used

requires an expenditure of mental energy by the mage, measured in units called manna points. Nost first level spells use one to one and a half manna points to want on up the line. So even though a mage could theoretically memorize twenty spells because of his level and intelligence, if he uses up all of his mental energy in the lites seven or eight spells, then that's all he can do for the rest of the time it takes to recharge himself, and all of those memorized spells are only so such empty words.

So how do you find not how many spells he can eccoric? Well, many another manchas a workshe system, but here's the one now in use in Arduin: Slaply recember what the maximum level of spells it is that your mage can now use and use up the manna points you have in any combination of spells that <u>do not</u> exceed your level's ability to perform. If you have half points don't be afraid to use them. A spell requiring, say 5 points to fire, can be fired with 2.5 points but a half power!

So you say once again how do you determine what level spells can a mage use and magain 1 say that the Dungeons and Dragons game has a nice workable system but as this is the Arduin Grimoire, here's mine: For every two levels in experience, a mage can use one level of spells. Therefore, a fifteenth level mage could use up to eighth level spells (15 plus 2 = 7, that fifteenth level throws it cover the top into the next level). However, there is a limiting factor based upon intelligence that works like this: The user's intelligence is divided by two, thus a mage with an 18 intelligence could only do inth level spells (18 plus 2 = 9), but one with an intelligence of 10 could only do fifth level spells (10 plus 2 = 5).

As there are spells up to tenth level extant in Arduin and ancient legends of spells up to 30th level in power, well, if is very obvious that mages will at one time or another have to increase their intelligence past the normal maximum of 18. Wishes are a good way to do this and some potions will also help on this. There are many more subjects I could crover, but this supplement is meant to got all of you gamers to see that the sky is the limit and that no single person, publisher or organization can have all of the answers.

So take whatever I have that you like, use the old established system, delve into Enpire of its Prela Throne, Red Moon and White Bear, and all of the other fine magic oriented games and put together what you like in a magic system. Who knows, it may end up much a good system that propel will want you to publish your supplement?

NOTES ON PLAYER CHARACTER TYPES

The classical fantasy game almost always uses a Tolkeinian type cast of character types to a greater or leaser extent. This is not in fitself bad, but it does tend to likit the scope of a game if they are all that are in the game. The people who put out D4D have put much more than that into the game, but it has been my experience that most players are highly reluctant to utilize unconventional characters. So to all of you who always seem to use eleven mages or white angle saxon protestant paladins, this paragraph is decitated. For you will never know the joys of having your Jewish Kobold run up to every dwarf he see"s and ask for a penny, no, you will never see your Phraint (insect) warrior leep fitteen feel over the heads of your more mundance coarades to get at the gint spider, nor will you ever thrill to the sight of your centaur knight being followed through the passages of a dumpenn by this Sanche Para holding a which kroon, dust pan and large sack.

Never will youn hear the complaints of the Brownie infantry squad as they white about that stupid half-ogres cheshire cat that keeps looking at them and licking his chops. And never is such a lonely word. Don't be lonely, take a roll to lunch. The world is a small place but is even smaller still in relationship to the myriad worlds of the entire Alternity (alternate eternites). Bo not be a small player from a small world, embarce the whole Almanity and give the different types a chance. I think you will find that the world your game is in will become a lot more fun if you do.

NOTES

Subtract two from the number required if the undead is of the same faith as the cleric, or subtract one if the cleric is trying his "final try". If a roll is made, the undead types will flee in the straightest line away from the cleric. The turn-away takes place in visual sight of the cleric up to 10' from him (plus 5' per each two levels). A die roll <u>double</u> or more than that required for turn-away causes the undead type to discorporate, causing 100% destruction.

*a: reduce necessary saving throw by one for each "plus" the weapon has.
 *b: like attributes give reduced saves (as each indicates, +2 vs fire, etc.) as above. If it saves 1002 versus fire, then fire can never destroy it.

inter file can never desirol file. Ac: for each power related to an attack, it receives one point of the save necessary (if it can shoot thunder bolts and fire balls, then it gets one point of each of them, etc.). At this simply means that the unpire must use discretion and the above for a base.

The item must make its saving roll whenever the host body is killed, or takes enough damage to put him down and out of the fight. However this last part holds true <u>only</u> for highly vulnerable items such as books, scrolls, and glass poilon bottles.

<u>Special Note:</u> <u>All</u> frangible (breakable) items made of a very brittle or easily resonating substance (like glass mirrors or crystal balle), must roll a 20 to save versus all sonic or vibritory attacks. ALSO remember that even though the manage was totally carbonized by the fire value. In item that he may have carried in his pack (which was <u>under</u> him when fall) may have been protected enough to rate a lower saving roll than would ordinarily be the case.

SPECIAL NOTE

The numbers shown are base numbers for 1st level types. For every three experience levels gained, deduct one from the base number (3rd level is minus 1, ninth level is minus 3, etc.). Die rolls are 01 to 20 on two 10-sided dice. Kind as opposed to class always takes precedence. An elven mage rolls under the clf column.

PRISMATIC WALLS AND THEIR USAGE

Within the realms of the various "dungeon worlds" there rages a controversy over just what a primantic wall is, and how it may be used. Therefore in order to shed nome more light on the matter, I herewith describe how they are thought of and used within the borders of Ardwin.

A prism is most often used to <u>separate</u> the colors of light, not to combine them (giving one plain white light). Because of this we see prismatic walls as <u>separate</u> colors, each with a different property and <u>magical effect</u>, thus giving rise to many different types of prismatic walls and their properties:

COLOR	EFFECT to people, etc. crossing through	NULLIFYING AGENT
Red	Stops all missiles, 12 pts damage.	Ice storm.
Blue	Stops all clerical spells, flesh to stone.	Disintegrate.
Green	Stops all "detections," poison, 4-48 pts.	Passwall.
Yellow	Stops all "breath," 6-60 pts.	Magic missiles can safely
reliow	Stops all breach, 6-60 pts.	penetrate.**
Orange	Stops <u>all</u> "death" spells, 2-24 pts.	Thunderbolts or electricity (8 dice and up),
Purple	Stops all "disintegration," 1-100 pts.	Fire of <u>all</u> types (8 dice and up only).
Magenta	Stops all time oriented spells, 3-36 pts.	Thunderballs (8 dice and up).
Cyan	Stops all undead, discorporating them,	
-,	normals are not hurt in any way. **	
Pink	Stops all lycanthropes, disintegrating	
	them, as above, normals are not hurt. **	
Silver	Stops all lesser demons, sending them back	
SIIVEI	to "hell," normals are not hurt.**	
Bronze	Stops all spells fired from wands, and does	
BIONZE	damage only to wands (they explode).**	
. .	Stops all staff fired spells as above (they	
Copper	also explode on crossing).**	
a 1 1		
Gold	Stops all greater demons as in the silver prismatic wall.**	
* *		Dennell marks and dista
Indigo	A general purpose force field, freeze solid.	Dispell magic and disin-
		tegrate simultaneously.
Violet	General anti-magic shell, insanity.	Clerical continual light.
Rose	Stops <u>all</u> "fire," 5-50 pts.	Cold of all types (8 dice
Lavender	Stops all "cold," 4-48 pts.	"Wind" spells of cyclonic
		intensity.
Black	A wall of "timestop"!!! <u>All</u> is stopped!	Demons (all types) <u>only</u> may cross it. **
Black & Silver	Stops <u>all</u> "psychic" activity, mindwipe!!!	Thunderclap or high intensity sound.***
Black & Gold	Colem (all types) deactivation field, nor-	
	mal types are not effected in any way.**	
Red & Blue	Stops all liquids (acid, slime, etc.),	
	dry out.	As above for normals.**
Green & Yellow	Stops <u>all</u> dragon attacks, paralyzes them.	"Trigger" speils. Normals <u>not</u> hurt.****
Purple & Silver	Stops all "etheral," gaseous, non-cor-	
	porate from passing (10-100 pts), normals	
	not hurt. **	
Green & Gold	Can be "keyed" to stop any single type of	
	magical attack, 6-60 pts damage.**	

PRISMATIC WALLS AND THEIR USAGE (con't)

*Special note: Prismatic walls, when looked upon, have all of the capability to hurt, etc. as outlined in Dragons and Dungeon's first supplement, "Grey hawk."

**Indicates that the only way to nullify that particular form of wall is to have a "dispell magic" of equal or greater level than the level of the mage putting the wall up!

**This means that the entity trying to penetrate this wall psychically must himself save versus psychic attack or suffer "mindwipe." And, dear readers, mindwipe is exactly what it asys: The luckless person has his entire memory, ego, sum of himself, sucked from him and <u>utterly</u> and permanently destroyed. He (or she or even it) become complete and total <u>non-thinking</u> beings. They can never again be anything but a mindless robot responding to other people's commands (and even that capability takes 1-6 months per each command "learned" (and never more than 10 command-<u>limited</u> responses be learned)).

****This means that <u>all</u> dragon attacks, whether physical, "breath" or even magical <u>will</u> <u>fail</u>. The only magical attack that the dragon could make effectively would be the aforementioned "trigger" spell.

One further note: Anyone seeing a prismatic vall with "true sight" has a 32 chance per level less than 20th of going permanently insang, and even if he does not, he will be "psychically stummed" for 2-20 gonths and will stand around staring, incapable of voluntary speech, movement or even coherent thought!

<u>Special Note on Life Level (undead drains, etc.)</u>: Experience earned levels that are magically or othervise blasted away <u>may not be regained</u> in any way except by: a) wishes; b) earning more experience.

Life levels lost to blood drains (or lost by unintelligent creatures from any cause) may be regained by <u>absolute rost</u> at the rate of one level per month. If that rest is broken for any reason, the healing process stops and may <u>never</u> be restarted for those particular lost levels?

Item:JAVELIN OF DEVASTATION Value: 5,000 to 15,000 G.S. Looks: 5' long lavelins of writhing, cracking black flame <u>Range</u>: 90' <u>Effect</u>: When thrown it becomes a 3' wide, 12' long bolt of black lightning. Depending on its power it attacks at +1 to +5 doing 4-24 to 8-48 electrical damage <u>and</u> blasting 1 to 3 life levels.

Item: OIL OF INSTANT IMMOLATION <u>Value</u>: 5,000 G.S. per vial <u>Locks</u>: Like quickslver/mercury <u>Effects</u>: Spread it on anything, and 3 minutes after exposure to air it bursts into super hot flames that do 6-60 fire damage and cover 3 square feet per vial. It burns 1-3 melee turns (roll) and will melt 1" thick steel per vial used.

Item: OIL OF INSTANT IMMOBILITY Value: 5,000 G.S. per vial Looks: Like golden quicksilver <u>Effects</u>: Spread it on anything and a finates after exposure to air it hardens into a steel-hard metal (immobilizing all movement) shell that only the strongest giants can break. One vial covers 3 square feet.

Item: OIL OF INSTANT OBEDIENCE, <u>Value</u>: 5,000 G.S. per vial <u>Looks</u>: Like metallic green quicksliver <u>Effects</u>: Spread it on any object and 3 minutes after exposure to air the object thus coated will "dance to your tune"! Chairs, rocks, people, all move as you command! No save and for 1 hour. One vial covers 3 source feet.

Item: WEIMSEY WINE <u>Value</u>: Varies wildly <u>Locks</u>. Like ordinary wine <u>Effects</u>: When drunk <u>anything</u> can happen. The user might become basted, or iurn blue! The dungeon master should have a "whimsey chart" with 20 or more things that can happen, and roll on it.

Item: DOOM FIRE WAND <u>Value</u>: 5,000 G.S. plus 100 G.S. per charge <u>Charges</u>: 1-100 Looks: A smokey grey crystal wand 18" loom <u>Range</u>: 60' (5' wide cone) <u>Effect</u>: The green fire does 6 dice damage plus causes fear. Saving rolls versus both are required.

NOTES ON ALIGNMENT AND PLAYABILTLY

For whatever reason, many people also are afraid to use Chaotic characters in a game. This was almost too silly to think about, or so I thought until I saw so many people who never used anything but lawful types.

Investigating, I found the most frequently given reason to be this: the old rule about what percent of the treasures were what alignment. Well, the simplist way to fix that was to make the reasures 302 lawful, 302 neutral, 302 chaotic, and 103 amoral and/or unaligned. Still i saw people literally afraid to venture on an expedition with a chaotic party. So here for all of those people is a little "reality" concerning alignments:

Law does not mean good and chaos does not mean bad, and neutral certainly does not mean deliberately inbetween.

Law is a state of mind that has many meanings to many people; the only sure meaning being that <u>its order</u>. That is to say, those that are lawful, adhere to a set of rules and regulations that are generally (but not always) laid down by a seat of power, either political or religious. And as it is to the benefit of that power for there to be peace, order and servitude maong those whose they oversee, those rules generally prohibit mutder, mayhem, rape, armon, augging and the like. And in fact, those laws usually try to maintain equammatiy among the people, either by strict equality for all as in socialist Sweden here on earth, or by strict class distinction as in feudal England, also here on earth. One must also remember that in Nazi Germany there were strict laws and that the German people as a whole were what you had to call lawful, so too were the inquisitors of the holy Roman church during the reign of terror in Europe in the 16th century. So when you use a "lawful" character in the future think about just what that means and in what context as far as the game is concerned.

By simple reversal we then see that chaos is merely lack of order, and as such is not inherently bad. Imagine a truly democratic society, and you have the archypical chaotics. And as for neutrals, well they have some rules but not a lot, and are open to maggestion and equitable to change. They adapt to all situations.

But if you insist on a hard and fast rule, go by this little story: A party of three went into a dungeon. One was chastic, one neutral, and one was lawful. During the course of the expedition they caught a troll and were discussing what to do with him. The lawful gys said, "Tie him up and let's now on," The noutral said, "No. Let's put a rope around his neck and let him be our point man and open all the doors and test for all the traps," and the chaotic said, "Bhom is the out of the obors where there is some treasure," at which point an amoral spider came around the corner and ate all of them.

Just remember, though, that it is never that cut and dried, as each character will have limiting and delimiting factors which will probably change with dismaying rapidity during the course of a few expeditions.

Evil is a measurement not of how bad a person is, but of what the prevailing society says is bad, and societies change with time and with geographical distances. If your government says pornography is evil and you believe in what your government says then to you that is evil. Remember, too, that at one time it was evil for a person to be a Christian. At least that's what the Romans believed.

And besides, wouldn't you really like to go on a run where, if you really get fired of that torkey cleric had mouthing your goosing the mamzon, you could step up behind him and pop his lights out with your family heirloom, genuine nickle plated warhammer? Try it, who knows, you may like it. The use of characters that are chancil or exotic is just another way to put life back into a game that could get boring if played too cautiously and similarly all the time. So be a litch adventurous and take at trol to junch today!

GENERAL NOTES ON MONSTERS, COMBAT AND THE LIKE

The question has often been raised as to what can hit a mythological or magical monster and what cannot. Berevith is how it is done in Arduin: Nagic wapons can hit anything as can technological <u>emergy</u> weapons (pistols, etc. cannot his <u>undead</u> types), and silver weapons (or bullers) can hit all undead types. <u>Normal</u> words and the like will have virtually no effect on animated metal or stome monsters because of the fact that they are usually magically animated anyway and because it is just simply too hard for avords to do more than chip stome or scratch metal. Also, fireballs and lickstuff won't do more than varm a stome golem up, even though it is magic fire, but if the mage is mant enough to hit that golem with a fireball one turn and a blast of cold the next, the expansion/constraction vill be equal to both of the ht dice of the blasts and the damn thing will probably shatter! And I would suggest that the mage low, because the fragmentation effect in a confined space would do an eight inch artillery shell justice!

All mythological/magical creatures can <u>glways</u> hit all other creatures, regardless of the fact that the intended target can go gaseous, ethersal or whatever (and they can always see each other). Mhereas normal creatures cannot even scratch anything other than other normal types. Yes, that <u>does</u> sean that a 20 dice glant spider (of normal mutational birth <u>cannot</u> even touch the 3 dice glow) that is slowly picking it apart with his junior woodchuck pocket knife. However, that little ghoul <u>can</u> be shoved aside by augerior strength, webed and the like by that big spider, or better yet ourrun.

Also, undead (not including combies or skeletons) can always see invisible objects simply because they live a little on this plane and the etherest plane at the same time. So don't figure on hiding from the vampire that way or you may find yourself an unwilling blood doner!

Another point that has come up, that needs clarification: YES! an invisible person in a thick fog or mist or rain or even macke cloud <u>will</u> be visible by his <u>outline</u>. No exceptions to this rule should ever be allowed, because it is simply physics.

Another sore point with some players/umpires is the use of potions and other things that make the body perform unnaturally. The answer is simple, for if a person is hasted and moving at double his normal speed, then his body is working twice as hard, aging twice as fast, tiring twice as fast, and, well, you get the point. If a person has awallowed a giant strength potion, that's fine, but that same person's bone structures not changed to compensate for the increased muscular power, and broken bones, weapons and the like will result unless the user is dame careful.

There has also been some debate about what constitutes a "kill" in battle for the purpose of giving out points. Here is how we do it: If the monster has been killed, hurt to within 10% of its <u>full</u> hit value whereupon it then flees or if it has been immediately teleported away, then that earns the defenders full point values. If the monster takes up to 80% damage then flees, then give out 75% of the points, up to a 50% damaged and fleeing monster earns 40% point value und less that and yearns 10%.

Here are a few odds and ends that are of interest:

 If a cleric fails to turn away an undead creature, he can try once again by channeling all of his strength into his vision, but it will leave his weak and unable to fight for a number of melee turns equal to his strength, so it had better succeed that time or it is curtains for his?

2. Undead will be repelled only by the signs and signels of <u>their own</u> religion, so don't try to turn away a jewish wampire with a cross of gold or the such like, and by the same token, mosles vampires ored to see the actual name of Allah in order to be turned away, and so on and so torth.

NOTES ON COMBAT (con't)

NOTES ON COMBAT (con't)

 Remember, that vampires in classical history do not like full sunlight, but can generally survive short exposures to it, and have no need to sleep during the day and could wander far and wide if they use a closed coach or some such contrivance to keep the direct light may from themselves.

4. Beasts that stone people can themselves only be stoned by those of their own kind.

5. Symbols that are of magical import, must either be seen or if invisible, touched to be effective. This holds true for pentagrams of power, magic circles and the like.

5. All fireballs and other offensive area effect weapons, have their damage points divided among all of those that are cought inside its limits. That means that if there are a people caught in a 6 dice fireball that does 20 points damage on the dice roll, then each of the four takes 5 points damage if they fail their saving throw, and 3 points 2-1/2 rounded up) if they make their save, NOT 20 point each!!!

7. All melees are fought as outlined in other sections, but remember that monsters move after the players have moved their pieces, so that unless the piece that the monster moves behind was in actual combat with that monster the turn before, it must make an emergency turn to try to face its new opponant (and must make its agility roll). Those that vere in combat with it have the ability to maintain a proper facing with it as it is their opponant.

8. All monsters have the option of who their opponant will be and may break off combat at will. If they are unintelligent, then roll a twelve sided die at the end of each meles turn with the following results: roll of 9-12 means maintain present opponant <u>even if deceased</u>; roll of 5-8 means go to a new target (roll an eight sided dice to see in which direction it will go); and a roll of 2-4 means pull out of melee for one turn to get its bearings. A roll of 1 indicates retreat.

Fantasy gaming has a tendency to bog down during the "combat" phase of the play. The following notes and tables have been built after much play testing and observation of "real" combat as practiced by the Society for Creative Anachronism. Inc. (which I might add is as close as one will ever come to the real thing, this side of a time machine).

Cenerally speaking combat takes place in a series of "melee turns," these turns being six seconds in duration and ten of which constitute one regular movement turn. However, instead of only one tenth of the movement of one movement turn being the distance moved in a melee round, the <u>full</u> distance is moved in one tenth the time. This is because all normal movement turns are predicated on the characters moving at a very alow valk, searching diligently for traps and secret doors, whereas a melee turn is at <u>full speed</u>. So remember, one melee turns movement is one normal move distance but at full speed.

Having play tested and watched "real" combat, I came to the conclusion that certain things should be incorporated into fantasy combat. Here they are:

Only two warriors may fight side by side in a ten foot space at <u>full</u> efficiency, or only one man with a two handed weapon. If two two-handed weapons or three regular weapons are wielded within that space, then -2 is taken off the die rolls of these warriors. Although it is nearly physically impossible to get three three-handed weapons into use in such a marrow way, four normal weapons may be wielded, but at -4 on the attack, unless the weapons used (all of them) are spears, for they may be wielded phalanx fashion. Carrying that one stop farther, if there are three spearem with shields fighting together in that ten-foot wide corridor, them add plus 2 to <u>all</u> of their defenses, and if there are four of them, add plus 4 to their defenses.

Speaking of spears and other long weapons, the longest weapon in any melce will always

strike first <u>regardless</u> of opposing desterifies. On the other hand, because of the unvieldliness of spears, and the strike the initial combar, the spearman will lose -2 off of his attack <u>if his</u> he spearman in in one of the aforces him to shorten up on his shaft, unless, of course, the spearman strike him and forces him to shorten up on Shields play a real role in combar, one which most fantasy rules fail to explore fully. So here are used as no labor to combat.

On any melec turn, a warrior with a shield may elect to strike with it instead of with his weapon. Because the striking area of the shield is so large, plus 4 is added to the attack. The shield will do 1 point of damage plus one additional point for every point over 15 of the warrior's strength, and in any case will cause a "push back," of any similar sized opponent, and has a 2% chance per experience level of knocking him down.

Shields cover the front of the warrior and the side on which it is carried, but the side with the weapon is <u>uncovered</u> and does not count the shield in its armour class adjudication, <u>unless</u> a facing movement is made by the warrior to cover that side, <u>before</u> combat.

Also, when sttacking diagonally across one's shielded side takes -1 off the attack, as the arm has to travel in an armour restricted direction, and over an obstruction (the shield).

Based on the level of difference between the defender and the attacker, there is a fifteen percent chance per level difference that the attacker vill manage to get past the shield in his attack, so that it <u>cannot</u> be counted in the defender's armour class. Those of coull level laways have a five percent chance of getting past an opponent's shield, and of course those of a lesser level than those they attack, have <u>no chance to do so</u>. Enough on shields. Here are a few more ideas on combat in general.

In movement and combat, the more armout one years, the more restricted one is. Armour class 2 or 3 takes three off dexterity and agility, 4 and 5 takes 2 off, and 6 and 7 take 1 off each. These penalties are always substrated before combat.

In combat it is the person with the fastest dexterity that attacks first if the weaponry is close to equal. It is also possible to get more than one attack in a melee turn, but it also depends on the superior speed or dexterity. For example, an orc has a dexterity of seven and he faces an elf with a dexterity of seventeen. The elf attacks first at 17, and ordinarily the orc would attack next at 7, but because the elf is more than twice as fast, his second attack comes in at 8-1/2 (half of his dexterity of 17), so in effect he attacks twice before the poor orc can even attack once. Another example, an amazon sith a dexterity of eighteen and carrying a rapier engages a pirate carrying spear with a dexterity of nine. The pirate by virtue of having a longer weapon will attack first, but the amazon by virtue of a faster dexterity can elect to parry instead of using her "first" attack, and then counter-attack with her "second" attack. You will note the pattern of these combats. If a person has at least twice the dexterity of his opponent, then he will get two or more attacks depending on the actual desterity. It is even possible to get three or more attacks in a turn if you are that much faster than your opponent. The timing of those attacks is ascertained by dividing the number of attacks into the dexterity (opponent's dexterity is six, your is eighteen, so you get three attacks, divide three into eighteen and you get six, therefore your attacks will come in every six dexterity points or at eighteen, twelve, and at six, at which point the enemy attack comes in).

You will also note that a superior desterity can always elect to party instead of instead of attack, and to adjudicate if you were usuesaful or not just roll your normal attack roll and if a "hift" is indicated, you successfully partied the attack. In the case of langs and claws instead of vegonos, here is how it works. A dragon normally gets two

MOVEMENT OF MEN AND MONSTERS (con't)

NOTES ON COMBAT (con't)

claws and a bite (or breath) <u>each</u> meller turn, so his attack is already broken up into three phases by the single virtue of having two separates claws and a head. So if his dexterity is ten and yours is fifteen, you attack first and there is no vorry, but if his deterity is sitteen let's asy, and yours is only eight, the head is first claw strikes at sixteen, his second at around eleven, then your attack goes in at sight, and his bite follows at about five or no. The pattern will hold for all nonters regardless of the number of appendages they use in combat. Just divide that number into their dexterity and you have the pattern of their attack.

Also a shield can be used to block a <u>specific</u> attack much in the same vay you parry against a weapon. If your dexterity is faster, and you do not want to risk the cockatrice hitting you, you roll your normal attack. Just because of the size of the shield, and if you hit you blocked the attack. But remember this is <u>in lieu of your</u> <u>normal attack</u>.

One further note, full elves only have the option each and every melee turn of moving and then stacking, stacking twice (regardless of destrictly differences), or of moving twice (100% of his normal move each time). So as you see an elf could move his normal movement turn, then decide that his opponent might jurt eat his and so elect to "Keep on trucking" and move again, thus covering <u>twice</u> the distance as his non-elf friends. One of the real problems of meless is that there is alway one turkey that hollers. "I's firing my crossbow" at such and such, totally ignoring the fact that nine of his friends are in the way. Well here is how we discourage auch didocy: for every person or enemy in a given ten foot area that the dummy fires into, there is a 25% chance of hitting the wrong target. Roll that percent first, then determine (randor roll excluding the intended target), who he actually hit. After he has killed off a few of his friends, the turkey will normally set the mesage.

A factor in any malee is the combatant's shilty to force his opponent <u>back</u> so that he may trip over some obstruction (his deal friend for example), or fail down some stairs, stc. Therefore, consider any stlack that is <u>one</u> less <u>than is meeded to hit</u> as a push back, amounting to three feet.

MOVEMENT OF MEN AND MONSTERS

One of the big drawbacks of the most often used system of movement is its inscorracy. If you take their listed movements as true speeds, you will find that dragons flying at 24" per turn are flying at about .56 mph. This figure is arrived at by taking the fact that if your dunces not an end of the start of the start and that each square represents 10", then you have a movement of 240" <u>per turn</u> so listed in their books. The first problem is that they never tell you if they mean one of their 10 sinutes or one of their 5 minute turns, both of which tye use in their game. But taking the 5 minute moves as base (which makes that 24" per turn *turce* an fast than if we used the 10 minute moves as base (which makes that 24" per turn turce an fast than if we used the 10 minute moves as base (which makes that 24" per turn turce an fast than if we used the 10 minute moves as base (which makes that 24" per turn ture or an or of their 10 minutes of the multiplicing that figure by 60 minutes we come up with 7940" per bour? And the 's figure 11 moves on the 11 move by 60 minutes we come up with 7940" per bour? And the 's that 's how fast: It is now obvious that a new system is needed to compute realistic workered in our fanctary mage.

The simple way is to make each movement turn only one minute long thus that dragon now moves at 200 per sinute or (60 dinutes time 200) at 14400° feet per hour. Now that only comes out to 2.74 eph which is not really fast. So once again we will have to upgrade the speed and may may a rule that the listed moves are actually five times those listed. That will give our friendly dragon a speed of 13.70 mph in steady level fight, and taking the listed speed of 60 per turn for men, that works out to 3.04 mph we find that a man will move 300° per adinute fit he wilks at a fast steady pace. This will be reduced if the is wering armour at the following rates: A reduced if the is wering armour at the following rates is armour class is reduced if the is wering armour the following rates is traduced if the set of the set of

it 15%, AC 7 a further 10%, AC 6 another 5%, AC 5 another 10%, AC 4 another 5%, AC 3 a full 20%, and AC 2 another 5%. So, a man wearing full plate armour with a shield (AC 2) could only move at 40% of normal speed or 120 per turn. These speeds are further reduced if , you are tapping the floor, ceiling, etc. as you go along, so that fully armoured man would only cover 60° a minute if he did that. You can adjudicate your own partys depending on the heaviest armour class in your group using this system.

Another factor is that in combat a person's (or monster's) body is running pumped full of adrenalin or its equivalent. To take that into account, just assume that all men or humanoid types can operate at five times normal speed (combat speed) for then full melee turns, at two thirds that for another ten full melee turns and then at normal full speed for an additional ten full melee turns, thereafter losing 10% efficiency each and every melee turn with the has to sit down and treet from exhaustion.

Monsters will fight at the same fast pace but based on a full, three quarter, one half, one quarter, then full normal pace and then loosing 15% per molee round thereafter.

Now this means that the men in full armour can travel the full 120' each and every <u>full</u> melee turn, <u>so long as</u> he is operating at his peak adrenalin induced efficiency.

So how long is a mclee turn you ask? They are six seconds each, ten to every one minute movement turn. That's very fast, but mclees are just that rapid. Don't worry about people ripping our of sight during meles in dungeons, because I guarantee you that people neither think that fast during the game nor can they get turned around and past their slower comrades fast enough to get away. They'll have to fight in most cases or get gobbled up from the rear as they try to turn and split. And even if they do manage to get a thus rate in your row, and can still run them down?

There will be further restrictions that will be illustrated on the page showing the bex grid system of movement and the facing costs.

MELEE CHART

To compute falls, add the Character Agility and Dexterity, multiply by 3%, and then subtract the % shown below on the hex side of direction of impact. To determine if weapons, etc., are dropped, simply multiply the character's Dexterity y 5%, and that total subtracted from 100% give the percent chance on a die roll of 100% of not dropping said weapon, etc. In both cases, if the percentage of difference is notical, then the character falls or drops whatever he is carrying (roll for each immerried, if more than one is being carried). In both bases, a six-sided die is rolled to ascertain the number of melec turns it then takes for the character to get up, or retrieve the dropped item.

Unarmoured person

NOTES

If a person has chain mail and a magik +3 shield, his armour class would be 4+3, not adjusted up to 2+1. Also, for practical purposes, no armour class greater than 2+7 is allowed. Whenever a 20 is required to hit, it is not a critical hit. A 2nd roll can then try for one. Clerics and the like always use the column back from their real level and mages and magikal types use the column two columns back. They're just not as good.

81-85	twist ankle	lose first attack, and one half of agility/
		5 min.
86-90	hit wrong target	three-quarters normal damage
91-92	hit yourself	lose next attack and take on-half damage
93-94	magic weapon breaks	100% for +1, decreasing 25% per "plus."
95	as above but for +3 and below	100% for +3, etc., etc.
96-97	hit and stun nearest ally	one-half normal damage and stunned for 1-10 melee
98	critical hit nearest ally	just as it says
99	critical hit yourself	yep, you did it
100	roll three times on above table	accept all three roll results

These rolls are made when the attacking player rolls a double one on the dice, and all results are final and irrevocable.

This chart will put realism into the game like nothing you have ever seen, unless you have ever been to a society tourney and seen the novices clobbering everyone but those they're supposed to hit!

One suggestion, though, as "COD," you can adjudicate according to level of character by giving the players with characters over say eighth level a lover percent of damage taken/given, and melee time lost. That however, is up to the individual "COO."

BRAWL CHART

BRAWL CHART

<u>KEY TO ERAVL CHART:</u> <u>2 - Double Hit = 2-8 points (Kick =2-12 pts) Temporary (Brawl Period) damage, plus 1 point per strength</u> over 14; 20% chance permanent

1 - Full Hit = 1-4 points (kick = 1-6 pts) Temporary (Brawl Period) damage, plus 1 point per strength over 14; 10% chance permanent

 $\frac{1}{2}$ - $\frac{1}{2}$ Hit = 1-2 points (kick = 1-3 pts) as above, but 5% chance of permanence

1 - 1 Hit = 1 point (kick = 1-2 points) as above, with 1% chance of permanence

0 - Miss = No Damage

SEQUENCE OF PLAY FOR BRAWLING:

Bach person secretly writes his move (faster Dexterity attacks first), then Umpire calls for 'brawl' and the orders are shown. There are at least two parts to each moles as the fastest attacks at slower defends, then slower attacks and faster defends. Remember, hits are cumulative and those who lower all points are unconscious.

NOTE: Use double normal Hit Points for Brawl Points

Remember, for every strength point over 12, add +1 attack and for every dexterity point over 12 add +1 to defense; also, for every Agility point over 12 add 5% chance of <u>not</u> falling when hit. Finally, double Dexterity means double attack!

All those who fall down are down 1-3 melee rounds

*Haymakers turn the body one full facing for the return blow, and facing cannot be changed until move turn.

(a) - Blinded 1-10 melee Turns

(b) - Stunned 1-10 melee

(c) - Double Full Hit, with 20% chance Kill

Missed Kicks are -30% on agility fall rolls and all kickers are -10% when receiving return hit

<u>SPECIAL NOTES:</u> <u>In Mountain Terrain</u>, consider only 1-25 as "no change", the additional numbers thus available should read "very cold (20-40 degrees), <u>Heavy</u> fog (visibility 1-10 feet), directional discrimination". Roll dice twice each day.

In Desert Terrain, consider 1-75 as "no change", 76-90 as "hot & dry", 91-96 as wind 10-20 MPH (some blown sand), 99 as "leaser sandstorm" with visibility of 20"-40' (winds of 21-40 MPH) and 100 as a "Great Desert Sandstorn" with zero visibility and winds of at least 50 MPH. All in party take 1 point of damage per minute in the open. Roll die every other day.

<u>In Jurgle Terrain</u>, 1-75 is "no change", 76-88 is "very hot (80 plus degrees)', suggy, damp, etc.; 89-95 is "noderate rain" (as in 52-83 regular chart), 56-98 is "Reavy rain" (84-85 same chart), 99 is "severe rainstorn" (66 same chart) and 100 is typhcon/hurriscians. Roll dice trice each day.

NOTES

There is a 10% chance per level of dungeon that there is polson on the spear points. That means 10% chance on the lat level or 50% on the 5th. All polson or actid does one 8 sided die damage per level ie. 3 dice on the 3rd level, 7 dice on the 7th, etc. 1.

2,

All poison or doin does one o sheet the manage per level let bit the jud level, furthe on the function of the period. For acid that is per males turn. For every 10' of fail there is a 33 1/36 chance of inpalement (for double damage) and ± 2 on the spear "attack" as well as 1-6 points damage just from caid fail. A six aided die is rolled to see if a trap has sprung. The number starts at one on the lst level and increases l each two levels thereaster. So that on theft level only a roll of 5 or 6 fails to spring the trap. All monster rooms have monster (s) commensurate with the level of dungeon it's or. Spider webs with tenants 3. 4.

5.

All mouster rooms nave monstor (s) commensurate with the level or dingeon it's or. Spicer wees with tenants are real four attention grabbers! All magic floors disappear from 1-10 seconds (roll) <u>after</u> lat person steps on them. That way half the party can pass over it before it springs! All rays, beams etc. cover the exact size of the ceiling trap on the floor. 6.

7.

MOST MALIGNANT & MALEFIC MISERIES KNOWN

E USUALLY CONTRACTED		SYMPTOKS AND EFFECTS
Swamps	The Scarlet Screaning Sickness	The vicin turns bright scalett and feels, literally like he's on fire! S he screams. It is not fatal, but the pain is so had there is a 10% chance per day (it lasts 5-10 days) that the vicin will go permanently erary.
Swamps	The Green Ague (or The Green Shakes)	The person turns dull, oplotey green and shakes uncontrollarly with brief muscle knotting spans every few minutes (1-12/hour). tsually not fatal, geople have a 10% chance/day (lagis 1-10 days) of G-106% persanent para/ys1
Swamps	The Melting Sickness (The Slime Sickness)	The periods these becomes fort's runs owill' the well's way, until the is safety of the second start is a safety of the safety of the second start is a safety of the second start is a safety of the second start is a safety of the
Moors	The Steaming Doom (Smoking Death)	The person begins to lose body water in the form of perspiration & stear. He loses 10% body water/hour until he dies all dehydrated & withered like an "apple doll" or a raisin, It's painful, ugly & ennently fatal always.
Desert	The Grey Rot (Crumbling Doom)	The person has 5% of his body/hour turn grey & crumbly like dry mold (it flakes off) & will literally "crumble to death" in 20 hours unless healed. In fact after 12-15 hours most have already died (body still crumbles away
Desert	Curse of the White Eyes (The White Blindness)	The victim has hot & cold chills & his eyes lose all vision (and turn pure white) at the rate of 5%/hour, After it's run its course (20-25 hours) th bindness has a 99% chance of permanence (less 3%/consistion point).
Desert	The Bursting Sickness (The Exploding Ague)	The victime stomach begins to swell with gas (he farts & burps constantly) until he is screaming in pain. In $4-6$ hours he swells so much he bursts like an overrips grape & dies. It is very painful & very faial,
Desert	The Spiraling Death (The Doom Spiral)	The victims motor/nerve/stability centers malfunction & he walks in an eve smaller spiral (he sees it as a straight line). It lasts 3-30 days & is n fatal in itself. It has a 3% chance/day of becoming permanent.
Mountains	The Angry Fever (The Red Rage)	The victim froths at the mouth, creams incoherently & flys (unpredictably) into berserker rages & attacks all near him in eye rolling fury (1-10/day) It lasts 1-10 days & has a 10%/day chance of permanency.
Mountains	The Stumbling Mania (The Laughing Sickness)	The victim stumbles (his depth perception is off 1-100%) & wanders aimless laughing helplessly. He cannot stop laughing, nor wandering around until drops in exhaustion, It lasts 1-20 days but the victim usually dies after 8-12 days from sheer exhaustion.
Forest	The Red Sleep	The victim becomes pale red & falls into a deep, trance like sleep that cannot be broken. It lasts until cured or until the victim starves to death (8-15 days). This is a rare and solution seen sickness,
Forest	The Withering Wake- lessness (or The Grey Sleep)or The Munmy's	The victim slowly becomes old & withered & cannot sleep. It lasts 3-30 da & withers 3 years/day (permanently). There is a 5% chance/day more than 7 of insanity (10% chance permanent/day) due to sleeplesences.

Hargrave's

DEMON LORE

General Data

- I. All demons have infra-vison good to 120' or more
- II. Demons hear everything within 120' regardless of obstruction.
- III. Demons have saving rolls equal to double their hit dice, on the most favourable table (i.c., a 6 dice demon rolls like a 12 dice monster).
- IV. Lesser Demons roll hit dice points on <u>10</u> sided dice, Greater Demons roll on <u>12</u> sided dice, Major Gods use <u>12</u> sided dice and <u>3</u> pips per die.
- V. Lesser Decomons are 90% chaotic and 10% neutral, but Greater Demons have no such restrictions, they are whatever they desire to be.
- VI. Demons <u>cannot</u> be frightened and usually attack everything on sight (90% chance) including others of their own kind (75% chance).
- VII. Conjuration of demons requires that those doins so be of equal level to the type <u>called</u>. Chance of control is: at Parity, 10%; plus 1 level, 15%; plus 2 levels, 200%; plus 3 levels, 25%; plus 4 levels, 30%; plus 5 levels, 40%; and up 10% thereafter. However the % of control probability is halved vis-a-vis Greater Demons. Maintaining control requires 200% concentration.
- VIII. Remember, once concentration/control is broken, it <u>cannot</u> be reestablished, <u>BY ANYONE</u>: <u>for 24 hours</u>. De-controlled Demons are mad Demons.
- IX. Demons never check morale and although preferring to be alone, they will tolerate their own (demon type) kind, if, and only if, they are conjured together (still 20% chance of fighting), otherwise section VI previals, and Katey bar the door!
- X. All demons regenerate as trolls but 502 faster (lesser) and 1002 faster (greater) and they cannot be killed, only dissipated (all points gone and constant bombardment/ attack for 6 consecutive melee turns so they can't regenerate, then they dissipate back to "bell"), unless, after having all points destroyed, a <u>successful</u> exorcism is carried out by the appropriate level circi. The only exception to this rule is <u>lesser</u> Demons hit by nuclear explosions, phasers or other <u>technological</u> energy weapons (including power whips) for points lost that way are un-regenerateable!
- XI. Only magic vespons hit demons, the only monsters that effect Demons are Dragons and Balrogs (or other demons, etc.), and the "storting" effect of medusames only, or shadow fitans hits (don't drop life levels, just does hit damage). [Eismentals, Djinns, Effect hit at one-half attack value, Colems at one-quarter.]
- XII. Greater Demon treasures are: 250,000 to 500,000 Gold, 100,000 to 1,000,000 electrum, 500,000 to 5,000,000 Silver, 10,000 to 100,000 platimum, 1,000 to 10,000 mitchil coins, 100 to 3,00 gens, 50 to 500 jevelry and 10 to 30 Lesser and 1 to 10 Greater, magical
- items as well as 1 to 3 artifacts--Lesser Demons generally have 10% to 20% of the above listed treasure.
- XII. Demons always get 100% of hit dice points (like ancient Dragons), you just roll to see how many dice it is!

Special Information

- XIV. 20th level Patriarchs have a 10% chance of turning away Lesser Demons; and that goes up 2% per level thereafter.
- XV. Soth level Patriarchs have a 5% chance to turn away Greater Demons and that increases 1% per level thereafter.
- XVI. Greater Demons always have at least 5% chance of not turning away!
- XVII. Below are the known Demon (Lesser) types
 - a. Wind Demons
 - b. Sea Demons
 - c. Fire Demons
 - d. Earth Demons
 - e. Ice Demons
 - f. Night Demons
 - g. The Demon Locusts

DEMON LORE (con't)

- h. There are of course, single (non-typed) Lesser Domons (Boak is an example). XVIII. All types 4th level and below (3rd level for Clerics) automatically flee in terror from lesser Deemos (roll save us fear, fail and run, make save and be paralyzed with
- from resser venues (off may us real, this me fun, make save and be paralyzed wit four or pass out for fright) XIX. All types 8th lavel and below (6th level for Clerics) flee, etc. as above in XVIII when confronting freater Desons.
- XX. Demon attacks, like saving rolls, are under the table that is <u>double</u> their hit dice (6 dice demon = 12 dice attack table!).

LESSER DEMONS

(HD indicates full 10 sided dice values)

Type: WIND DEMON; HD: 8 to 10; ^{1}AC : 2: Speed 9' (36' (lying); bext: 16 to 20; Numbers: 1 to 4; Attacks: 4 class at 3-18 each: Looks: 7' to 8' tall, smoothe skinned bumanoids a bright electric blue color with hatwings of pale, translucent gold, and four silver eyes equidistant around the head. When angry, tiny sparks crackle all over him; Notes: 100% invulnerable to all djinn attacks, takes 1/2 damage from lighting, wind, etc. They get a +3 save versus confusion, +2 versus flash/blindness, and +1 versus disintegrate. They can use 1st level magik and their greatest enemies are carth demons, which get +1 attack and defense against them. Their favorite food is olf meat, which they love dearly.

Type: ICK DENON; HD: 8 to 10; AC: 2: Speed: 8" (10" flying); Dext: 10 to 15; Numbers: 1 to 6; Attacks: 2 claws for 2-20 each plus 1-10 intense cold damage, and 3 times/minute they can breathe a 3-36 cone of cold 30'N(0'; Looks: Smoothe, snow white, 7' to 8' tall humanoids with translucent. 1ce-like hat wings and 3 cyes like chips of ice in a pyramid formation over their long-tanged mouth; Notes: 100% impervious to cold, paralysis, and slow spells. They take 1/2 damage from acids, but fire does 50% more damage. They can create walls of ice at will, use 1st level mark, and can drop the air temperature 20⁶ per turn to a -180° maximum in a 30' diameter area around them. Inside that area, or in other intensely cold places, they get +2 to all their attributes. They hate titans and war constantly with them. Their favorite food is amagon meat.

Type: FIRE DEMON; HD: 9 to 12; AC: 2+1; Soeed; 12" (24" flying); Dext: 17 to 20; Numbers: 1 to 3: Attacks: 2 claws for 4-24 each plus 2-12 fire damage: Looks: 7' to 9' tall reptillian-looking humanoids, bright scarlet, bat-winged, twotailed, horned and befanged, with two eyes like pits of deep space and violet flames dancing over their bodies; Notes: The air is 200° in a 10' radius around them. They can use up to 3rd level magik, and create 10 double-sized walls of fire per day in any number from 1-10. They are 100% fire and sonics proof. Lightning and acid do 1/2 damage, but cold or water do 50% more damage. Every third melee turn they could breathe a 30'x10' cone of fire for 3-36, but very seldom do (die roll of 18 to 20), their egos demanding they physically slay their foes. They can also throw 5' diameter. 8 dice fireballs every other melee turn, and do so occasionally (die roll of 14 to 20), and can leap 35' in any direction. They can create mirages (illusion) at will, and heat the air in a 30' diameter area around them 20°/melee turn to a 400' maximum. They hate all other fire-based beings (salamanders, efreets, etc.), and attack them on sight. Their favorite food is elf hearts.

Type: EARTH DEMON; HD: 10 to 12; AC: 2+2; Speed: 6" (24" through the earth); Dext: 8 to 13; Numbers: 1 to 6, Attacks: 4 claws for 3-30 each, and all hit rot at 1 per melee turn thereafter; Looks: Mottled earth colors, lumpy headless boulder-shaped body with 4 legs and 4 arms, about 8' tall. There are eight irregular copper-colored eyes at random on its body. W-tes: 100% imperious to sonics, fire, cold, and confusion. Lightning and acid do 1/2 damage, but water causes him to "melt" at 1 die per 100 gallons of water. They can use up to 2nd level magik, and when in contact with raw earth or rock, all attributes are +3! Clerical magik gets +2 attacks on them, so they hate clerics most of all attacking them on sight. Their favorite food is ent hearts.

LESSER DEMONS

(Cont'd)

Type: SEA DENON, HD: 8 to 10; AC: 2; Speed: 6" (36" in water); Dext: 13 to 16; Numbers: 1 to 8; Attacks: 2 claws for 2-20 cach and 1 bite for 1-8 plus 4-24 points of venom which paralyzes all but elves and undead, which it <u>dissolves</u> at 2-15 per melee turn; Looka: 7' to 9' tall, fish-like humanoids, <u>deep emeration</u> at 2-15 per melet turn; Looka: 7' to 9' tall, fish-like humanoids, <u>deep emeration</u> with irridescent dorsal spines and webbing between claws and toes, with two buge pupilless white eyes; Notes: 1005 impervious to poison/venom, acid, paralysis, and confusion. They take 1/2 damage from cold, but lightning and swnics do 50% more damage. On dry land they lose 1 of all attributes every 6 melee turns until unconscious. They are frequently accompanied by sharks so much they will do anything to get them. Their favorite food is mermaid meat. They irrequently use magik up to 37d level.

Type: THE DEMON LOCUSTS; HD: 6 to 10; AC: 2 (body), 4 (head); Speed: 9° (18° (1); ng); Dex1: 7 to 12; Numbers: 1 to 10,000; Attacks: 2 claws for 2-12 each, 1 bite for 1-5 plus 4 dice poisson and 1 sting for 1-4 plus 8 dice poisson that bilands and paralyzes all but hobbits, which are not affected in any way. Looks: \cdot to 18' long, vaguely locust-shaped, silver and gold-banded bodies with beautiful, long-blond-haired and blue-eyed human heads. They smell like putrescent meat; Notes: Once committed to an attack, these near-brainless demons do not stop attacking until their target is 100% eaten! They are 100% immune to fear, stoning, and poison/venow. They take 1/2 damage from fire, lightning, and acid, and cannot be paralyzed or slowed. They are highly susceptible to confusion (-4 save), and cold does double damage to them. They belong body and soul to the great demon "Abbadon", and "gate" to him at his command. All those he or the locusts kill become locusts themselves! They are true omnivores, and will eat anything from flees hot seel!

Type: NIGHT DEMON; HD: 10 to 12; AC: 2+4; Speed: 12" (24" flying); Dext: 16 to 20; Numbers: Always alone; Attacks: 2 claws for 4-24 each, 1 sting for 1-8 plus blasts 4 life levels (only 2 if save versus poison is made), and every third melee turn it can breathe a 15'x3' black flame that does 6-60 points, blasts 2 life levels, and causes those hit to rot at 3 per minute thereafter. If hard pressed, thrice daily they can exude a 60' diameter cloud of 100% opaque (except to them) black poison gas. It does 10 dice damage and lasts 30 minutes. While inside this cloud the demon gets +3 on all attributes; Looks: 9' to 12' tall, ebony-skinned humanoids with batwings and eyes like glowing pools of fire, with a long, barbed tail, and fangs and claws of pale translucent violet: Notes: They are 100% immune life drains, lightning, paralysis, and stoning. Cold, acid, poison/venom and fire do 1/2 damage, but they get -2 save versus disintegrate. They can, and do, use up to 4th level magik, and fear "holy water", for it burns them like acid for 1-8 points of unregenerateable (except at 1 point/day) damage. They hate and attack clerics on sight, and can leap up to 33' in any direction. Their favorite food is virgin's blood. All slain by them become spectres under their control. They are 100% invisible at night or in shadows or dark places. It is rumored that one Night Demon has ascended to "God" status.
