\*2 You can move twice your normal speed.

\*\*3 You can move quadruple your normal speed.

\* Regardless of the action, if you move within or out of a threatened area, you usually provoke an attack of opportunity. This column indicates whether the action itself, not moving, provokes an attack of opportunity.

\*\* You can move when the action is defined as a full-round action, in which case you normally get a F.F. step.

† You can move up to twice your normal speed, but only before the attack! not after. You must move at least 10 feet, and the entire move must be in a straight line.

†† Most extraordinary abilities aren't actions. This applies to those that are.

## Attack roll modifiers

Consequence	Mele	Ranged
Attacker flanking defender†	+2	—
Attacker on higher ground	+1	-10
Attacker prone	-4	—
Attacker invisible	+2*	+2†
Defender sitting or kneeling	+1	-1

Defender concealed or invisible	—	—
Defender helpless (such as paralyzed, sleeping, or bound)	—	—

\* You flank a defender when you are at all on the opposite side of the defender threatening him. Rogues can sneak attack defenders that they flank.

† Stop ranged weapons don't fire while the attacker is prone, but you can use a crossbow while prone.

†† The defender loses any Dexterity bonus to AC.

†† Roll randomly to see which grappling combatant gets struck. That defender loses any Dexterity bonus to AC.

## Partial actions

<b>Movement-Only Partial Actions</b>		
Slight move	Yes	No
Partial run	<2	Yes
<b>Miscellaneous Partial Actions</b> ††		
	F.F. step	Maybe
<b>Special Partial Action</b>		
Start full-round action	No	Maybe

\* Regardless of the action, if you move within or out of a threatened area, you usually provoke an attack of opportunity. This column indicates whether the action itself, not moving, provokes an attack of opportunity. You must move in a straight line before attacking and must move at least 10 feet.

† Values shown are for full-round actions, in which case you could start a full-round action and then finish it the next round with a cast a spell action. Spells that take longer than 1 full round to cast take twice as long to cast.

†† These actions are Table 8-6: Miscellaneous Actions defined as included move equivalent actions. Miss allow a 1-foot step, though actions that are various charge actions follow the move for partial charge.

# Introduction

Faerûn is home to many creatures, and adventurers exploring the continent's dungeons and wilderness areas can encounter a variety of other beings, both hostile and benign. Heroes riding across the Shining Plains may encounter a peaceful group of pilgrims one day, a pride of hungry lions the next, and a war party of wemic raiders on the third. Wise adventurers prepare for anything when they venture forth.

## organization

This booklet consists of four major sections: Dungeon Encounters, Wilderness Encounters, Groups, and NPC Generation.

**Dungeon Encounters:** These tables are organized into dungeon levels 1st through 20th. The Encounter Level of each possible encounter generally matches the dungeon level, with some variation allowing tougher or easier encounters than expected for a particular dungeon level. Supporting tables in this section provide random dragons and dracoliches, based on the dungeon level.

**Wilderness Encounters:** These tables are organized by terrain type and climate—for example, northern hills, temperate grassland, or southern desert. The Encounter Level varies within each terrain type, although some types of terrain are populated by creatures inherently more dangerous than others. Supporting tables in this section key specific types of dragons to each terrain type, and present sub-tables for local creatures that may frequent specific examples of each terrain type.

**Groups:** The Wilderness Encounter charts frequently reference specific groupings of monsters or NPCs—for instance, orc patrols, ghast packs, merchants, and pilgrims. This section presents each group mentioned in the tables in the preceding section and defines their composition.

**NPC Generation:** This section provides tables for generating random NPCs as necessary to create an encounter with a group of NPCs. These tables include character races found in the *FORGOTTEN REALMS® Campaign Setting*, and are therefore more appropriate to the campaign than similar tables found in the *DUNGEON MASTER'S Guide*.

## MONSTER SOURCES

The tables presented below include monsters described in the *FORGOTTEN REALMS Campaign Setting* and *Monster Compendium: Monsters of Faerûn*. If you do not have these books, just roll again when the die roll indicates a monster from either source.

Throughout this booklet, the following symbols are used to indicate where a monster's description can be found.

- ◆ *Monster Compendium: Monsters of Faerûn* sourcebook.
- ◆ *FORGOTTEN REALMS Campaign Setting*.

(If no symbol is present, the monster is described in the *Monster Manual*.)

## DUNGEON ENCOUNTERS

Since creatures common to all D&D campaigns make up the bulk of the monsters inhabiting Faerûn, most random encounters will involve creatures described in the *Monster Manual*. The tables provided in this booklet simply add the possibility of encountering monsters from the *FORGOTTEN REALMS Campaign Setting* or *Monster Compendium: Monsters of Faerûn*.

## HOW TO GENERATE A RANDOM DUNGEON ENCOUNTER

To generate a random dungeon encounter, follow the steps described below. The process is essentially identical to that given in Chapter 4 of the *DUNGEON MASTER'S Guide*, but the encounter tables here take precedence over the tables in the *DUNGEON MASTER'S Guide*.

1. Determine the base dungeon level. Generally, this is determined by the location the heroes are exploring.
2. Roll 4% and consult Table 2: Random Encounter Master Table, using the base dungeon level to enter the chart. This table makes less challenging and more challenging encounters a possibility, changing the encounter table you consult for the exact encounter.
3. Roll on the appropriate Dungeon Encounters table (Table 2: 1st-Level Dungeon Encounters through Table 21: 20th-Level Dungeon Encounters).
4. If the result is a dragon, roll on Table 22: Random Dragons.
5. When applicable, roll the indicated die to see how many creatures are in the encounter. If your initial roll on Table 2: Random Encounter Master Table directed you to roll on an encounter table that is lower or higher than the base dungeon level, increase or decrease the number of creatures encountered by the amount indicated on Table 2.

## READING THE DUNGEON TABLES

Each dungeon encounter table includes the following pieces of information:

4%: The result on percentile dice that will generate a given random encounter.

**Role:** A general guide to how the creature might act and how it interacts with other dungeon denizens. Refer to Role in Chapter 4 of the *DUNGEON MASTER'S Guide*.

1st to 20th: Roll the encounter on the appropriate table (Table 2: 1st-Level Dungeon Encounters through Table 21: 20th-Level Dungeon Encounters).

— Don't modify the number of creatures encountered.

>1/2: Increase the number of creatures encountered by 1/2 (or multiply by 1 and divide by 2). Round up fractions 50% of the time.

>2: Double the number of creatures.

>3: Triple the number of creatures.

>4: Quadruple the number of creatures.

>2/3: Decrease the number of creatures encountered by 1/3 (or multiply by 2 and divide by 3). Round off fractions (1/3 down and 2/3 up).

<1/2: Divide the number of creatures by 2. Round up fractions 50% of the time.

<1/3: Divide the number of creatures by 3. Round off fractions (1/3 down and 2/3 up).

**Number of Creatures and Kind:** The number and type of creatures encountered. If your roll on Table I: Random Encounter Master Table calls for you to roll on a table for a dungeon level higher or lower than the base level, modify the number of creatures encountered as indicated. (Instead of doing the arithmetic, you can use Table 4-14 in the *DUNGEON MASTER'S GUIDE*, which enables you to change the die roll rather than changing the result.)

**Treasure:** The chance that the encounter includes treasure appropriate to the dungeon level (not the Encounter Level of the monsters). Roll on Table 7-4 in the *DUNGEON MASTER'S GUIDE* if a treasure is indicated, using the base dungeon level as the level on the treasure table. A note such as "80% +2" means there is an 80% chance of finding a treasure of three levels higher than the base dungeon level.

**Example:** Steve is using random encounters to stock the 4th level of a dungeon he's designed. He begins by rolling on Table I: Random Encounter Master Table, using a base dungeon level of 4th. He rolls a 72, which indicates that he should use the 5th-level Dungeon Encounters chart. This one will be a little tougher than normal, but Table I also indicates that he should reduce the number of monsters encountered to two-thirds the normal amount for the 5th-level table.

On the 5th-level Dungeon Encounters table, he rolls a 52. This result is 1d3 gricks. He rolls 1d3 and gets a 2. Since the master table indicated that he should decrease the number of creatures encountered by one-third, Steve changes the number of gricks encountered to one. (Two-thirds of 2 is 1 1/3, rounded down to 1.)

## Generating Dragons

If your roll on one of the above tables yields a dragon, you generate the exact type and age category of the dragon by consulting Table 22: Random Dragons.

**Using the Tables:** Roll d% and read across the top row of the Random Dragons table to determine what type of dragon has been encountered. Then, read down until you find the row matching the level of the Dungeon Encounters table that generated the dragon result.

**Reading the Result:** The term appearing on the table at the intersection of dragon type and encounter table is the age category of the dragon encountered (see the *Monster Manual or Monster Compendium: Monsters of Faerûn*). If the term is in *italic*, the dragon's CR matches the encounter table's level. If the age category is not *italic*, then the dragon's CR is higher than the encounter table's level. A plus sign (+) means if you use a dragon of older than this age of the respective type, it is at least a 20th-level encounter.

**Dracoliches:** If your roll on Table 22 indicates the possibility of a dracolich, roll d% and refer to the note that accompanies the table. If the d% result indicates a dracolich, follow the instructions in the note to determine the age category of the dracolich.

**Example:** Steve rolls in Table 17: 16th-level Dungeon Encounters to generate a tough encounter for his dungeon. His roll of 25 indicates a dragon. He continues to Table 22: Random Dragons and rolls d%, getting a result of 86. This is a brown dragon. Reading down the brown dragon column until he reaches the 16th-level Encounter Table row, Steve finds that this encounter is an old brown dragon.

# wilderness encounters

Travelers abroad in the wild areas of Faerûn may encounter all kinds of creatures, ranging from harmless fellow-travelers to terrifying monsters. Tables 23 through 60 list encounters by fourteen terrain types (hills, low mountains, high mountains, clear, grasslands, forest, marsh, swamp, moor, barren/badlands, glacier, desert, river/lake, ocean) and three climate ranges (northern, temperate, southern). Table 61 is a special table for the Underdark. The large map

of Faerûn from the *FORGOTTEN REALMS Campaign Setting* indicates changes in terrain in some detail—clearly, if the heroes are crossing the Shaar to travel from the Great Rift to the Lake of Steam, they're in grasslands.

Climate zones are not indicated on the poster map, but here is a general set of guidelines:

**Northern:** Anything north of a line beginning at the mouth of the River Delimbiyr and continuing upstream to the Graypeak Mountains along the lower reach of Ansaloch and then up along the Desertsmooth Mountains to the Boedri Forest, east along the River Tesh to the Moonsca, then southeast to the Rasilinswood, Lake Mulsantir, and

The twains yielded on this table are age categories (see the *Monster Manual*). Ific age categories indicate where the dragon's CR matches the encounter table's level. If the age category result is not in italic, then the dragon's CR is higher than the encounter table's level. A plus sign (+) following an age category result means that if you see a dragon of older than the age of the respective type, it is at least a 22th-level encounter.

\*There is a 1% chance that the dragon encountered is a drachick of that type. To determine the drachick's age, refer to the table one two levels lower than the base that produced the result. For example, an 11th-level shadow dragon encounter is with an adult; if this encounter is with a shadow dragon drachick, move up to the 10th-level shadow dragon table, which yields a young adult result. The 11th-level drachick encounter is with a young adult shadow dragon drachick.

\*\*As above, but there is a 10% chance that the dragon is a drachick.

the Sunrise Mountains to the Mountains of Copper and the Great Wild Wood.

**Temperate:** Most land in the middle third of the map, as bounded by the northern and southern lines.

**Southern:** Anything south of a line beginning at the Starspire Mountains in Tethyr and continuing due east to the Lake of Steam, the Firesteap Mountains, the Uthangol Mountains, the Lake of Salt, and then to the Giant's Belt mountains in Durpar.

## HOW TO GENERATE A RANDOM WILDERNESS ENCOUNTER

As a party of characters travels across Faerûn, there is a chance per hour of travel that they may run into a wilderness encounter, as shown below.

Terrain	Normal Travel	Cautious Travel	Hiding
Desolate/wasteland	7%	3%	5%
Frontier/wilderness	9%	4%	2%
Villaged/civilized area	10%	7%	2%
Heavily traveled	12%	6%	3%

Parties that are camping in the open or moving with unusual caution (half their best possible speed or lower) may use the Cautious Travel encounter chance. Parties that are camping in secret or otherwise laying low may use the Hiding encounter chance. A party camping with a fire is never considered to be hiding.

Each wilderness encounter table includes the following pieces of information:

**d%:** The result on percentile dice that will generate a given encounter. Use the Day or Night column, as appropriate.

**Encounter:** The type of creature(s) encountered. Some of these may be groups, such as an orc patrol or pilgrims.

**Number Encountered:** The number of creatures encountered. If the term "see Groups" appears here, refer to the section following the tables for the exact composition of the encounter.

## LOCAL CREATURE OR NPC'S

This result indicates that the party may have encountered creatures known to reside in the area in large numbers. Local creatures for specific regions in Faerûn follow most of the wilderness encounter tables. NPC parties may be found in this same table entry.

When a wilderness encounter roll produces the "Local creature or NPCs" result, roll d% again. On a result of 01-50, continue to the Local Creatures table following the main encounter table. On a result of 51-100, treat this result as an encounter with a group of NPCs. To generate the members of an NPC group, consult the NPC Generation section of this booklet.

acters make up the group, and then go to Table 63: NPC Alignment to determine whether the group is good, neutral, or evil in alignment. Once you know the group's alignment, proceed to Table 64: NPC Class to determine the class of each character in the group.

Finally, roll for each character on Table 65: Good NPC Race or Kind, Table 66: Neutral NPC Race or Kind, or Table 67: Evil NPC Race or Kind (depending on the character's alignment) to determine the race or kind of each character in the group.

## RANDOM WILDERNESS NPCS

To create a group of NPCs based on a wilderness encounter table result, follow the procedure outlined under Random Dungeon NPCs. However, you need to determine the characters' levels first. Wilderness encounters vary in Encounter Level within the same terrain type, so a group of NPCs encountered in that terrain may vary in power level, too. Begin by rolling on Table 62: NPC Level to determine the level range of each character in the NPC group. Then continue through the NPC generation process described above.
