HARNTM

THE DAWN OF A NEW FANTASY WORLD

STATE OF THE ART

HARN is a breakthrough in FRP play aids. More than five years of R&D has gone into creating the most detailed logical comprehensive, and consistent fantasy world yet published; an authentic "medieval" environment of unsurpassed quality, specifically designed for fantasy gaming.

HARN is compatible with any rule system you may now use. You can now create and plan your campaigns, adventures, and quests within a complex and realistic background, confident that this world will unfold as it should.

HARN is a time-saving machine! Veteran gamemasters know how much time and effort is needed to develop a detailed, consistent campaign world. Everyone who desires the best possible environment for fantasy role playing, needs HARN.

HARN gives vast scope to your creativity; it is not a programmed adventure module, leading you by the nose. Your creative efforts will be supported with a series of expansion modules, each providing additional consistent material, and each a carefully crafted part of a larger **ENCYCLOPEDIA HARNICA**.

MASTER MODULE

REGIONAL MAP A beautiful full colour map (22"x 34") of Harn, an island approximately the size of Madagascar. This is a useful and detailed technical map, with a 1cm (3/8") hex grid, and a location grid for easy reference.

MAP SECTION (SAME SCALE)

HARNVIEW A 32 page overview of Harn including a historical narrative plus gamemaster tables on birthing characters on Harn, weather generation, and hazards/encounters.

HARNDEX A 64 page alphabetical reference, describing almost 1000 entries on the history, geography, religions, cultures, politics, and economics of Harn. Harn dex also includes numerous maps and illustrations.

EXPANSION MODULES

The first two expansion modules for Harn are now available. We must stress that these are not programmed adventure modules. They are re-usable environment backdrops which allow the gamemaster to add custom adventure details within a consistent framework. Gamemasters should also note that Harn is both a "magic-weak" and "money-tight" world where non-stop "hack and slay" is discouraged in favour of creative and realistic adventuring.

CITIES OF HARN A module detailing the seven major human cities of Harn: Aleath, Cherafir, Coranan, Golotha, Shiran, Tashal and Thay. Included in this module is a full colour map of each city (keyed and described for gamemaster use), a B&W player map of each city (unkeyed with permission to photocopy), and a 48 page gamemaster guide to the cities of Harn, including floor plans (scale: 1mm = 1 foot) of the most important buildings.

ENCYCLOPEDIA HARNICA A monthly publication designed to be kept in a standard three-ring binder. Each issue contains text, maps, charts, interior plans, etc. on a wide variety of Harnic subjects. **ENCYCLOPEDIA HARNICA** will gradually build into an impressive reference work for gamemasters.

IVINIA

THE ULTIMATE FANTASY WORLD CONTINUES...

Lying to the northeast of Harn, Ivinia is a harsh land of rock-walled fjords, towering snow-capped peaks and forested valleys. It is the homeland of the rebellious and warlike Ivinians. A hardy seafaring people, Ivinian raiders in their swift dragon ships plunder and pillage along the coasts and waterways of western Lythia. Clan vendettas and the constant strife between the rival kingdoms of Ivinia can be equally hazardous to all who journey in this rugged land. Ivinia is not a land for weak-kneed adventurers.

Release date: Spring, 1985
