# TEGEL MANOR

## AREA BACKGROUND & ENCOUNTERS

Tegel Manor, a great manor-fortress on the seacoast, is rumored to be left over from ancient days when a charm\* was placed over it protecting it from most of the ravages of time and human occupation. The hereditary owners, whose family name is Rump, have been amiss in their traditional duty of providing protection for the market village to the west. Some have said that this failing and their bizarre eccentricities have led to their corruption. Many have found the manor and area to be a dangerous place to visit! \*This charm includes fire-resistance for the manor's timbers.

All outdoors movement (outside of village) is subject to an encounter roll every other turn. Daytime:

1. Roughneck Rump the Rotund, feared highwayman, AC -2, 6HD, 29HTK, and his band of 12 goblins AC 6, 1 -1HD, 4 3 2 3 1 2 2 3 4 2 3 1, have way-laid many a traveller, greeting same with a shrill, "Stand and deliver".
2. Special Zombies, known as the "cauldron-born" are all 24HTK, 3HD, AC 4, Move 9" Zombies enchanted by the CE Sarthoggus, Evil High Priest. These Zombies have one defect however, as they lose 1HTK for every hex distant from their creator.
3. Acolytes of Sarthoggus travel the countryside, forcefully gaining new converts to the worship of Tsathoggus, the frog-god (Sup. IV, p.46). These men dye their skin green and perform certain facial alterations for the favor of their harsh master.
4. Pirates from the coast (where they have erected a tower and base) occasionally foray inland to attack the village and travellers; Align - CE, 60% LtFt, 30% LtCrbow, 10% Hvy Crbow.
5. Stirges NA 3-30, AC 7, 1HD, bite/1-3 & 1-4 thereafter, 18" move.
6. Goblins AC 6, 1 -1HD, 6" move.
7. Baladar LG Ranger 5HD, AC 6, declared enemy of Runic the Rump (see Benevolent Character module) who left him in tight spot with a spectre in the manor.
8. Roll normal wilderness encounter table.

For encounters at Night, roll three times after the players have divided the party into three watches.

1. Ruang the Ripper, Assassin, 9HD, AC 7, 39HTK.
2. Giant Bats 1-6HD, AC 4, Bite/1-6 or 2-12 per size.
3. Dearth Monster of Derfingel Marsh, Black Dragon - sub-adult, 6HD, 24HTK, Breathes acid  $6 \times \frac{1}{2}$ " for 18 pts. of damage.
4. Giant Stag Beetles AC 3, 6HD, Move 6".
5. Skeletons - NA 3-30, AC 7,  $\frac{1}{2}$ HD, 6" Move.
6. Ghouls - NA 2-24, AC 6, 2HD, 9" Move.
7. Druid
8. Roll normal wilderness encounter table.

## BENEVOLENT CHARACTER MODULE

This new section will feature short sunopsises of wide range of medium duty character and monsters possibly sympathetic to the players and their entourages. Of course, the character will be strongly oriented to his best self interests. If strongly affronted, you may have a malevolent character module!

SIR RUNIC THE RUMP PALADIN LG 6 20 -1 8 15 5 7 11 9 17 +3 Sword Possesses +3 plate, +1 Ring of protection (in addition to his paladin's +10% ST), 255 GP, 160 SP and 24 CP. Dim-witted owner of Tegel Manor, Sir Runic constantly attempts to sell the Manor, often for unbelievable cheap prices. Also, twice lost in card games, the manor's new owners have always returned asking for their money back - often at threat of violence! In addition to being a dullard, he is reknown for his poltroonery - his morale rating being at least -3. Being nearly penniless, he has hopes for getting something out of his feared family home. He is distraught over his various relatives and ancestors various corrupt modes of living and will begrudgingly agree to help a buyer clear it out - thus putting many to rest; however, he is frightened by most family members, especially Ruang Rump the Ripper.

## DUNGEON LEVEL ONE

Most giant rat holes are 3' in diameter and all have a 20% PROB of blockage by a rock or cave in. Removing the rock will usually require a STR test (see JG J-8) and digging will take 2-8 turns.

Once down the hole, players will find that all of level one is rat tunnels, 3' wide by 3' high. At best, two humanoid creatures can crawl abreast in these tunnels. Encumbered characters, will be able to crawl 10' plate wearers 10' in one turn, heavy footmen can manage 20' per turn and light footmen 30' per turn; because of the exertion, all encumbrance types must rest twice as much. Plate wearers, as well as encumbered characters will find that they may get stuck making the turns - 16% PROB, and if they do have a 16% PROB per turn of going one way or the other; these characters will also find it impossible to turn around in one of the tunnels. Incidentally, only a dagger, hand-axe or mace can be used in the cramped space.

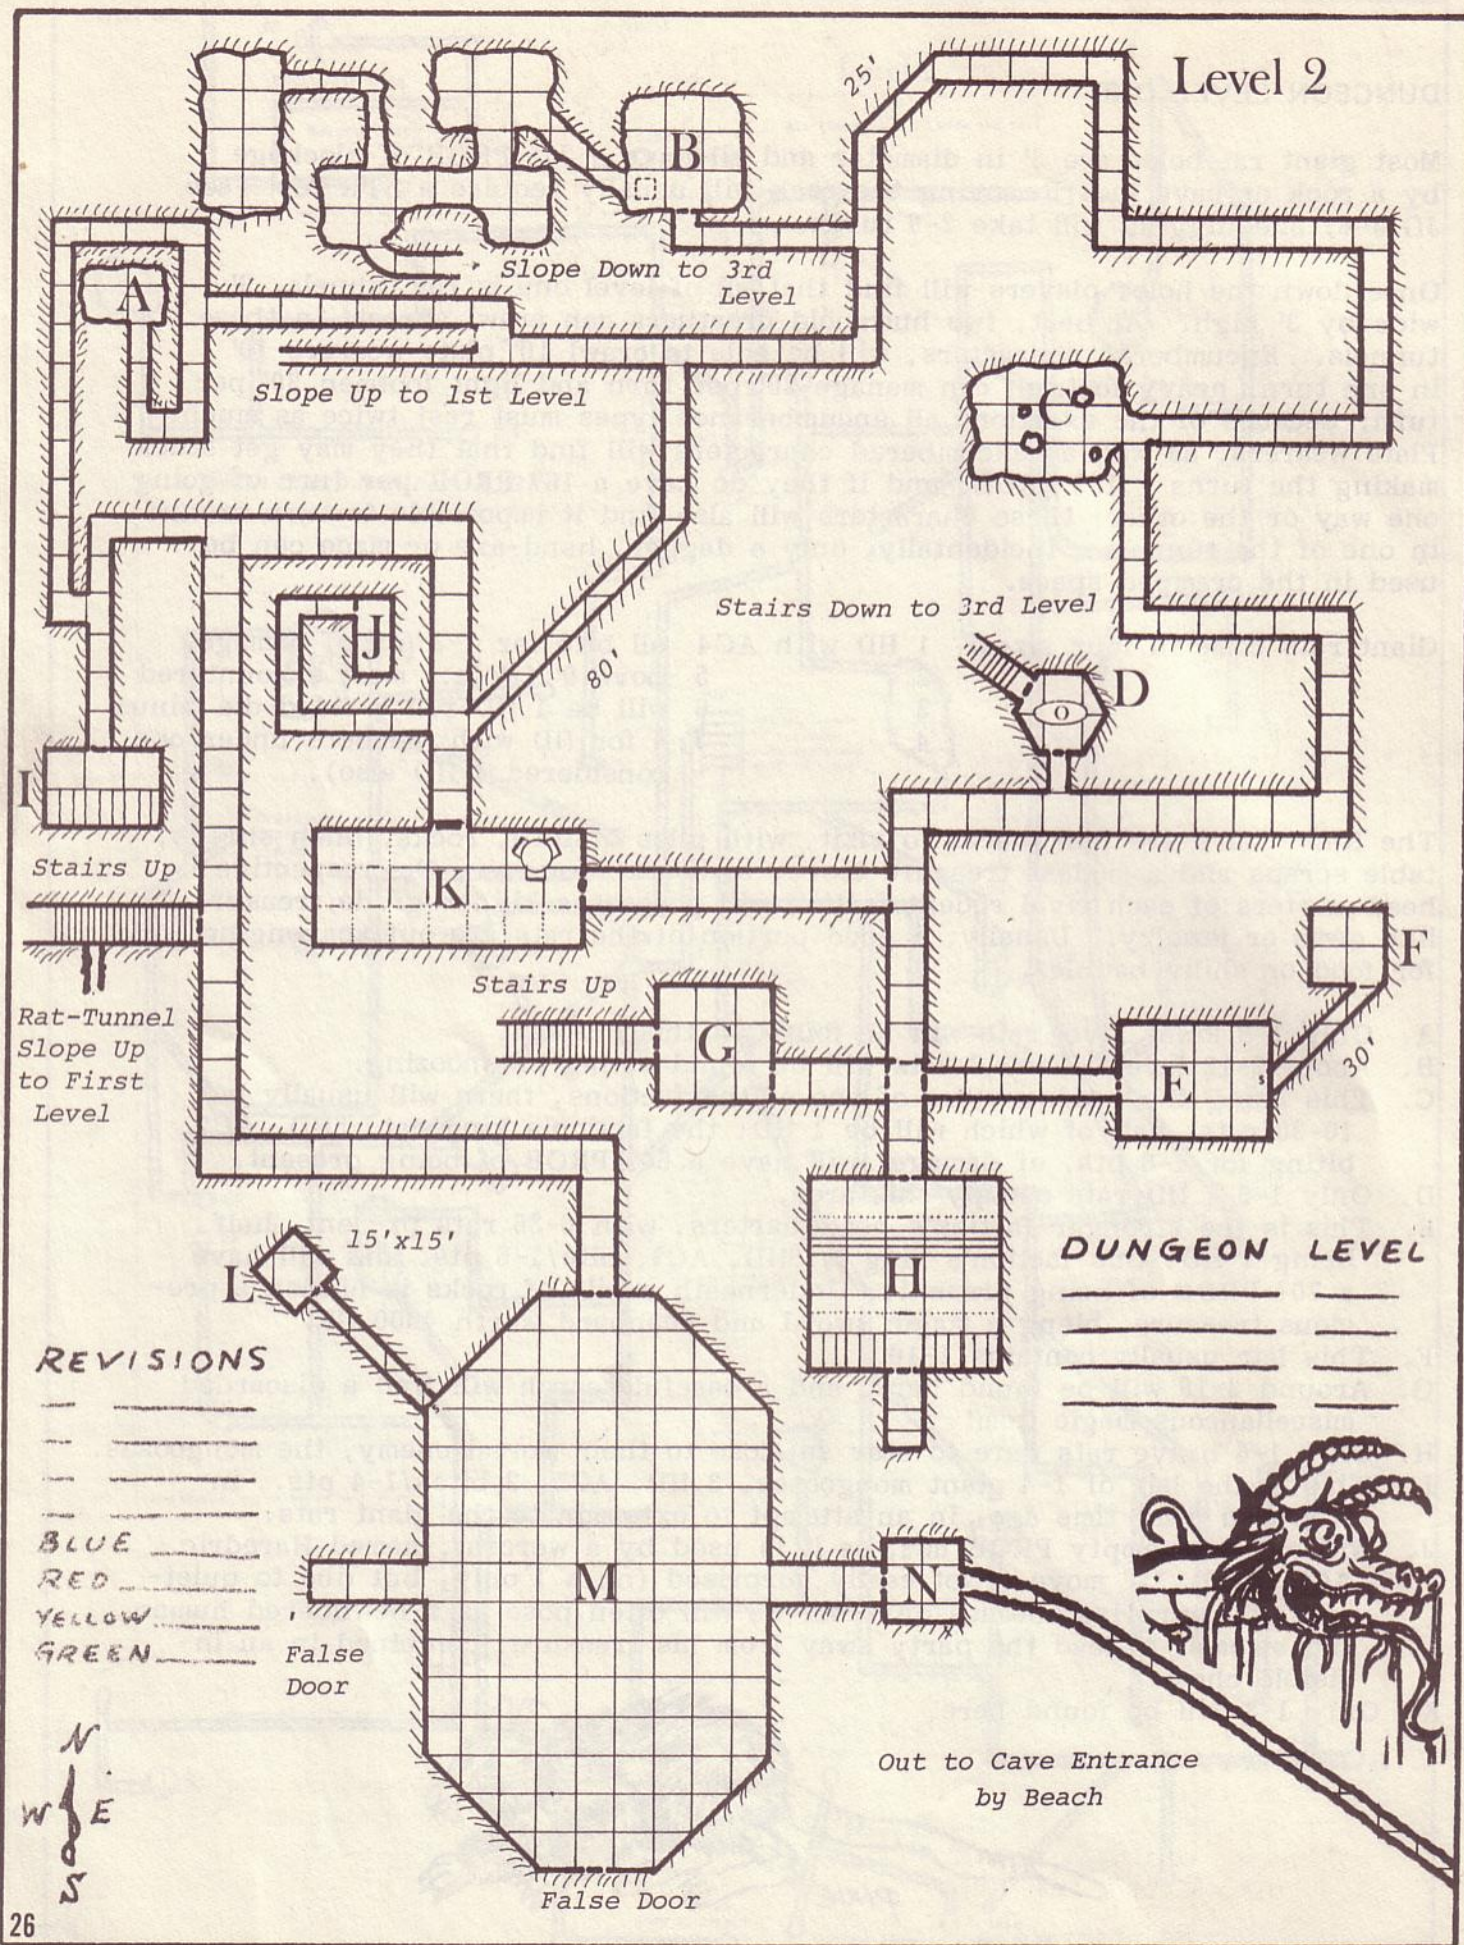

Giant rats come in four sizes: 1 HD with AC4 all bite for 1-3 pts of damage,  
2 5 move 9' (Note: most encountered  
3 6 will be 1 HD-roll 8-sided die minus  
4 7 4 for HD with numbers under one  
considered 1 HD also).

The Rats' Lairs are foul places to visit, with piles of filth, rocks, linen shreds, table scraps and a modest treasure trove, to boot! However, the respective headquarters of each rival rodent faction will possess a higher grade treasure, like gems or jewelry. Usually, a good portion of the rats are out scavenging for food or shiny baubles.

- A. Only 1-8 lower level rats will be found in this outpost.
- B. About 2-12 level 1 thru 3 rats will be found eating or snoozing.
- C. This being the headquarters of one of the factions, there will usually be 10-30 rats, half of which will be 1 HD; the faction's king rat, 5HD, AC7, biting for 1-6 pts. of damage, will have a 60% PROB of being present.
- D. Only 1-6 1 HD rats occupy this area.
- E. This is the stronger faction's headquarters, with 6-36 rats present, half being 1 HD; this faction's king is 6HD, AC7, bite/1-6 pts. and will have a 70% PROB of being present. Underneath a pile of rocks is hidden a precious treasure, being a magic sword and scabbard worth 4000 GP.
- F. This lair usually contains 1-10.
- G. Around 3-18 will be found here, and a careful search will find a discarded miscellaneous magic item!
- H. Only 1-6 brave rats dare to stay so close to their mortal enemy, the mongooses.
- I. This is the lair of 1-4 giant mongooses, 3 HD, AC5, 2 bites/1-4 pts., introduced some time ago, in an attempt to exterminate the giant rats.
- J. Will often be empty PROB 60%, as it is used by a wererat, named Haredric AC7, 3HD, 12" move. Not easily surprised (on a 1 only, but due to quietness will surprise enemies on 1-4), he will often pose as a bewildered human and attempt to lead the party away from his treasure, contained in an invisible chest.
- K. Only 1-3 will be found here.

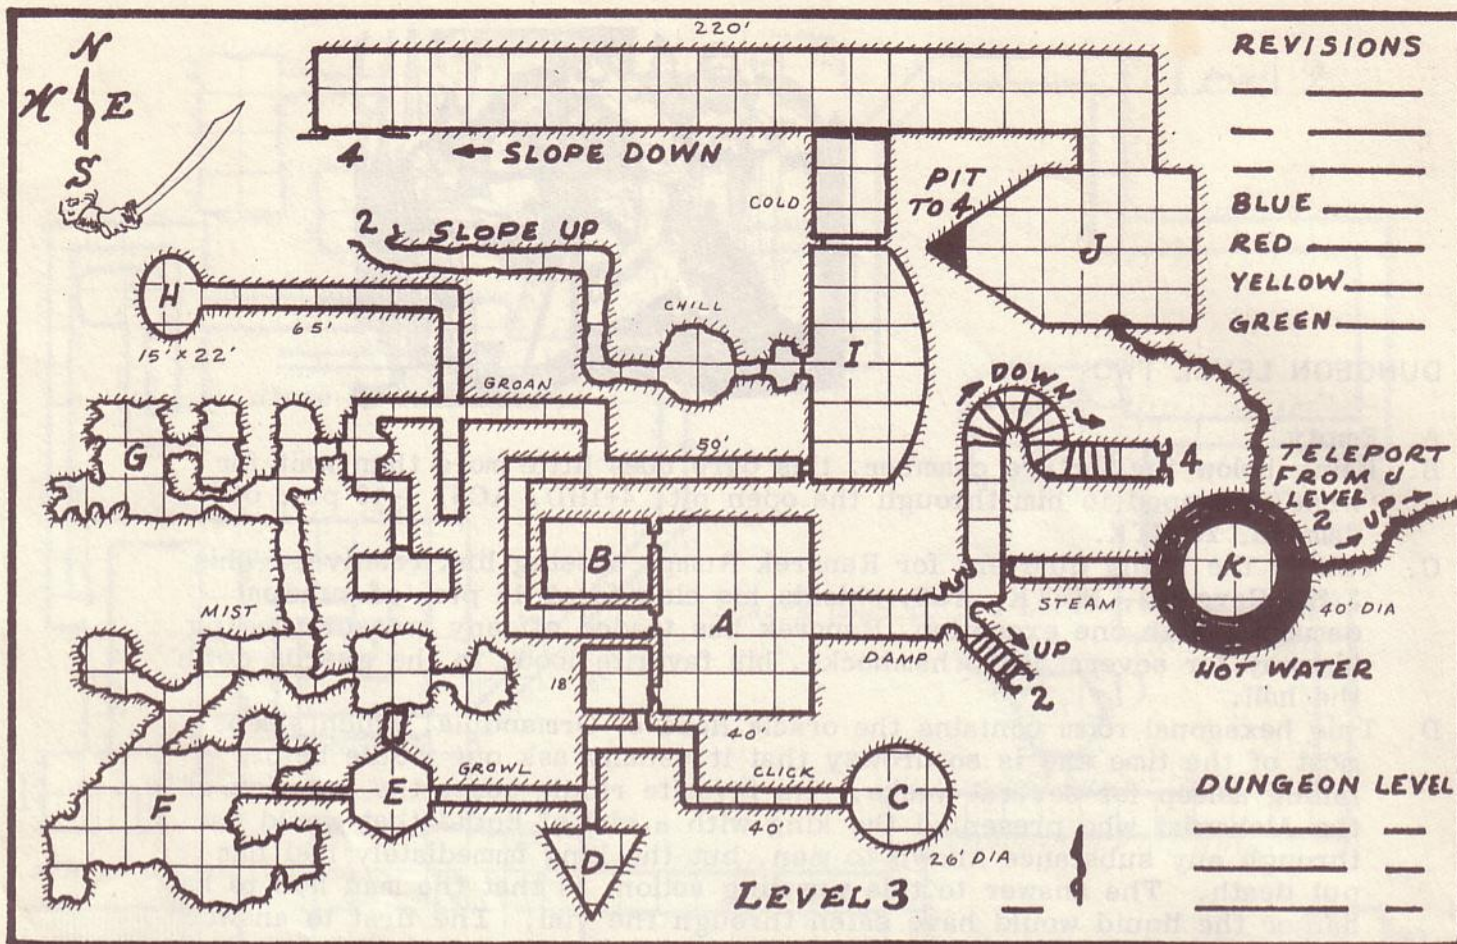

## DUNGEON LEVEL TWO

With one exception, Ranorek has traded off any treasure coming his way for several large hamhocks, his favorite food, to the guards down the hall.
- D. This hexagonal room contains the oracle Head of Ormandula, which sleeps most of the time and is so drowsy that it usually ask one riddle before falling asleep for several weeks. Its favorite riddle poses the question of the Alchemist who presented the king with a vial of liquid that would eat through any substance known to man, but the king immediately had him put death. The answer to this puzzling action, is that the man had to be liar or the liquid would have eaten through the vial, The first to answer correctly will receive one (random) characteristic raised by one. Any character touching the oracle must make his saving throw for stunning; persisting a second time and the stun will cause a coma if the saving throw vs. 7-70 pts. of damage is required.
- E. Empty most of the time PROB90%, being the incoming teleport room for the Liche.

Line B	Right Arm	Left Arm	Right Hand	Left Hand	Right Leg	Left Leg

All losses in line A cause a one-third reduction in charisma. All losses in line B cause a one-third reduction in Dexterity and disallow the player the ability to fight more than one enemy, and in the case of upper limb losses, disallow the use of missile type weapons. All losses are permanent.

Scar results must heal in the normal manner (1 point/day) and applies directly to healing of the scarred part. The point total of healing necessary to restore part is equal to half the points victim received below his '0' point total. These healing points are separate from his normal 'Hits to Kill' point total. Until the affected penalty is healed properly, the permanent penalty listed above is applied.
