Copyright ©1982 by **Judges Guild Incorporated**, R. R. 8, Box 9, 1221 N. Sunnyside Road, Decatur, ILL 62522 - 9989. All rights reserved. This product is a playing aid designed to be used with a set of Role Playing Game Rules. The contents of the product may need to be changed by the individual Judge to suit the campaign he or she moderates. No similarity between any of the names of characters, persons, and/or institutions in this publication with those of any living or dead person or institution is intended, and any such similarity which may exist is purely coincidental. Printed in the United States of America.

This product is a **Judges Guild Universal Role Playing Adventure** designed for use with all game systems. This product requires a separate rules system for its use. The categories of statistics listed here are carefully selected to be directly applicable to the majority of the published rule systems but should not be considered the only statistics open for use. Should the particular game mechanics employed require the use of an additional term or statistic not found in this format, the Judge is encouraged to add it to the list. All unused categories may be ignored. The values of the statistics given assume that the natural span of human characteristics ranges between one and twenty with the normal person averaging out at ten. Since adventurous characters are above average, their beginning characteristics are generated with 3D6 to give a range of three to eighteen. A comparison chart is provided below to permit the Judge to quickly convert values on the 1D6, 2D6, 3D6, 1D20, and %D ranges from one to the other. Interpolation may be necessary with some figures, but the Judge should keep in mind that these are suggested values only and may be modified to best suit the tone of the campaign he or she is moderating.

The basic assumptions on the rationale for Magic vary so widely from one game system to another that one set of statistics cannot cover the field adequately. Therefore, each spell or magical effect is given a general name such as *Stop Person* or *Invisibility*. Unusual effects or articles are described in the text where first encountered or in a special section at the end. The Judge can then assign an equivalent spell or effect from the specific game system being used.

During the initial reading of this product, the Judge should note the quantities and distribution of the treasure and artifacts. Each game system and even each campaign within a game system tends to run at a level of reward unique unto itself. The Judge is reminded to adjust the amount of treasure available by adding or deleting to correspond with the campaign he or she moderates.

Game "Characters" are given varying amounts of description depending upon the importance of the character to the adventure. Minor individuals are listed where first encountered in the text and have only the most cursory details given. Major individuals are listed where first encountered and have as much detail given as is desirable for their intended role. In addition to the text listing, an alphabetical listing of the characters and their game statistics may be given in chart form at the end of the product. The explanation of the complete list of possible character statistics follows in the order given.

- CLS: Class - an indication of the character's profession or main occupation. Abbreviations are explained on a following table.
- ALN: Alignment - an index of a character's predisposition toward moral or ethical choices to be made during the game. Alignment is abbreviated in descending importance from left to right. The third letter indicates only a suppressed desire.
- LVL: Class Level - an index of the experience and skill acquired in the character's main occupation or profession. The first two numbers indicate the actual class level of the profession while the last indicates the total number of occupations in which the character has gained skill.
- HTK: Hits to Kill - the number of hit points necessary to render a character unconscious when reduced to zero or to slay the character when reduced to a negative amount equal to the character's CON.
- ARM: Armor Type - a summary of the amount of damage it is possible for the character to absorb due to the protection of worn armor or clothing. Wearing a lot of armor will lower the Agility (AGL) and Speed (SPD) of the character. During normal combat, the amount of damage which can be absorbed per round is equal to one-tenth the Armor Type (ARM) with all decimal amounts dropped. For instance, ARM: 022 would provide 02 points of protection per round. The Armor Type (ARM) is the sum of the pieces of armor listed in the chart below. Each individual piece can be referred to by a three-letter abbreviation in which the first letter is the construction material and the last two letters indicate the specific item.
- PSL: Personal Social Level - an index of the social standing. The first two digits indicate the level in the area in which the character resides and the third number indicates the level of notoriety within a twenty mile radius.
- STR: Strength - an index of the character's ability to apply physical force. The first two digits indicate the actual Strength of the character and the last number indicates the number of times per day this characteristic may be tested without checking for damage due to stress.
- INT: Intelligence - an index of the character's reasoning power, learning ability, concentration, and memory. The first two digits indicate the actual Intelligence, and the last number indicates the number of times per day that this characteristic can be tested to the utmost without checking for stress damage.
- WIS: Wisdom - an index of the character's intuitive judgement and knowledge gained from experience. The first two digits indicate the actual Wisdom, and the third indicates the number of times per day the characteristic can be tested to the utmost without checking for stress damage.
- CON: Constitution - an index of the character's ability to withstand pressure and physical hardships without permanent harm as well as the recuperative or self-healing powers of the character. The first two digits indicate the actual Constitution of the character, and the third number is the number of times per day this characteristic can be tested without checking for stress damage.
- DEX: Dexterity - an indication of a character's coordination and manipulative ability. The first two numbers are the actual Dexterity rating, and the third is the number of times per day that the characteristic can be tested without checking for stress damage.
- CHA: Charisma - an index of the character's personal magnetism and persuasiveness. The first two numbers are the actual rating, and the third number is the number of times per day the characteristic can be tested without checking for stress damage.
- END: Endurance - a measure of the amount of physical stress to which the character can be subjected. The first two numbers indicate the actual rating, and the third number indicates the number of times per day that Endurance can be tested without checking for stress damage.

AGL: Agility - an index of the character's ability to maneuver the entire body. The first two digits are the actual rating, and the third is the number of times per day this characteristic can be tested without checking for stress damage.

LED: Leadership - an index of the character's ability to command the respect of subordinates, motivate others, and boost morale. The first two numbers are the actual rating, and the third is the number of times per day that this characteristic can be tested without checking for stress damage.

LCK: Luck - an index of the character's relationship with the forces that control that character's fate and his relationship to the fate of all others. The first two digits are the actual rating, and the third is the number of times this characteristic can be tested without incurring the "wrath of the gods."

PSY: Psionic Ability - an index of the character's ability to channel and use psionic powers. The first two numbers indicate the actual rating, and the third number indicates the number of times per day this ability can be tested without checking for stress damage.

WPN: Weapon - an indication of the weapon commonly carried and most likely to be used in combat. Abbreviations are explained on a following table.

Game "Monsters" are given only a cursory treatment where first encountered in the text. Individual variations in statistics or equipment are also given here. The total game statistics are listed in the special section at the end of the product where a typical monster is described in detail. The information given, in order, is:

NAP	NUMBER APPEARING	ARM	ARMOR TYPE	SPA	SPECIAL ABILITIES
NIL	NUMBER IN LAIR	PF%	PERCENTAGE OF FEMALES	WPN	WEAPON
HIT	HIT DICE	PY%	PERCENTAGE OF YOUNG	RAD	RADIATION RESISTANCE
HTK	HITS TO KILL	INT	INTELLIGENCE	POR	POISON RESISTANCE
NOA	NUMBER OF ATTACKS	GES	GESTATION PERIOD	HAB	NATURAL HABITAT
DPA	DAMAGE PER ATTACK	GRP	GROUPING NAME	FOD	FOOD OR PREY EATEN
SPD	SPEED	CLS	CLASS	LIF	NATURAL LIFE SPAN
SIZ	SIZE	LVL	CLASS LEVEL	COL	PREDOMINANT COLOR
ALN	ALIGNMENT	PSY	PSIONIC ABILITY	DOM	DOMICILE OR TYPE OF LAIR
		MRT	MAGICAL RESISTANCE		

Not all of the above characteristics will be applicable to a given monster, and, in addition, any or all of the Character Statistics may be included as well (PSL, STR, WIS, CON, DEX, CHA, END, AGL, LED, and LCK).

BODY		HEAD		CONSTRUCTION MATERIAL		REINFORCEMENT MODIFIER	CONSTRUCTION METHOD	
1	SHOULDER GUARDS	3	HOOD	1	Silk, Linen, Cloth	---	0	Open
2	BELT	4	TURBAN	2	Soft Leather, Soft Wood	---	1	Ringmail
4	GIRDLE	5	CAP	3	Felt, Light Fur	---	2	Chainmail
6	BREASTPLATE	6	HELM	4	Wicker, Heavy Fur	+1	3	Formed Plate
8	TUNIC	9	BASINET	5	Hard Leather, Clay	+1		
10	COAT	11	HEAUME	6	Hard Wood, Horn, Bone, Onyx	+2		
				7	Gold, Copper, Marble, Jade	+2		
				8	Electrum, Silver, Bronze	+3		
				9	Platinum	+3		
				10	Iron	+4		
				11	Steel	+4		
				12	Adamantite, High Chrome Steel	+5		
				Method: Add all to obtain each piece of armor and total for the whole:				
				EXAMPLE:				
				Tunic made of Gold Ringmail		8 + 7 + 1 =	16	
				Heaume made of Steel w/Visor		11 + 2 + 11 + 3 =	27	
				Sleeves on Tunic		6 + 7 + 1 =	14	
				Tower Shield made of Iron		12 + 10 + 3 =	25	
				TOTAL:			082	ARM

 way; illumination needed

Random Generation of Caves, Caverns, and Burrows

These tables should be of use to the Judge looking for a quick and easy method to create lairs, hide-outs, or any type of habitation located underground. Please note that the Judge should shift, alter, or otherwise change any results from these tables that he or she feels does not quite fit in with his or her plans. These are, of course, only guidelines for the Judge. Note also that, since the surface of a cave or burrow is usually highly irregular, the dimensions given are for the highest or widest point only; the actual dimensions would probably vary at least a little. How much they vary is up to the Judge.

Another use of these tables is in the occurrence of a random encounter. Instead of simply stating, "You see a large, grey Dragon 80 feet in front of you," the Judge can quickly generate a lair for this monster, thus adding an extra dimension of adventure to the encounter. In fact, random encounters can often be transformed from an ordinary "hack and slash" episode to a mini-adventure in this way.

Of course, in addition to generating lairs, dungeons can also be generated using the tables. Again, the Judge should feel free to adjust the dimensions or content to suit the encounter or the campaign in question.

Type of Cave Encountered (1D20)	Major Terrain Type in Hex						
	Mountains	Hills	Swamp	Jungle	Clear	Sea Coast	Desert
Burrow	1 - 3	1 - 4	1 - 4	1 - 4	1 - 4	1 - 4	1 - 4
Abandoned Mine	1 - 3	5	---	---	5	5	---
Active Mine	4	6	---	---	6	6	---
Sea Cave	5	7 - 8	5	5	---	7 - 12	---
Stream Cut	6 - 8	9 - 10	6 - 8	6 - 9	7 - 8	13 - 15	---
Lava Tube	9 - 12	11	---	---	---	---	---
Limestone	13 - 14	12 - 15	9 - 15	10 - 15	9 - 15	16	5 - 12
Dungeon or Constructed Area	15 - 16	16 - 17	16 - 17	16 - 17	16 - 18	17 - 18	13 - 17
Geothermal	17 - 18	18	18	18	19	19	18
Talus	19 - 20	19 - 20	19 - 20	19 - 20	20	20	19 - 20

Type of Cave Entrance						
Type of Cave Encountered (1D20)	Entrance Type					
	Sinkhole	Constructed	Stream*	Deep Water*	Breakdown of Rock	Pit
Burrow	1 - 5	6	7	8	9	10 - 20
Abandoned Mine	---	1 - 10	---	---	11 - 18	19 - 20
Active Mine	---	1 - 10	---	---	11 - 18	19 - 20
Sea Cave	1 - 2	---	3 - 4	5 - 12	13 - 18	19 - 20
Stream Cut	1 - 2	---	3 - 10	11 - 12	13 - 18	19 - 20
Lava Tube	1 - 6	7	8	9	10 - 17	18 - 20
Limestone	1 - 6	7 - 8	9 - 11	12 - 13	14 - 16	17 - 20
Dungeon or Constructed Area	1 - 2	3 - 15	16	17	18	19 - 20
Geothermal	1 - 6	7	8 - 9	10	11 - 13	14 - 20
Talus	---	1 - 2	---	---	3 - 19	20

* Can only be reached from below the surface. Otherwise, the same as Breakdown of Rock entrance.

Note that Sinkholes and Pits require the use of ropes or some other method of descending safely. In the case of Burrows, the term "Pit" is used to represent a Burrow Hole and may not require the use of ropes since it may not be a vertical descent opening.

Size of Cave Entrances

Type of Cave Encountered	Size
Burrow	1' - 20' DIA / 3' - 12' H, 3' - 12' W
Abandoned Mine	3' - 12' H, 7' - 12' W
Active Mine	3' - 12' H, 7' - 12' W
Sea Cave	1' - 20' DIA / 3' - 18' H, 3' - 18' W
Stream Cut	1' - 20' DIA / 3' - 12' H, 3' - 12' W
Lava Tube	1' - 20' DIA / 3' - 18' H, 3' - 18' W
Limestone	1' - 20' DIA / 3' - 18' H, 3' - 18' W
Dungeon or Constructed Area	1' - 20' DIA / 3' - 18' H, 3' - 18' W
Geothermal	1' - 20' DIA / 3' - 18' H, 3' - 18' W
Talus	3' - 18' H, 3' - 18' W

The numbers before the slash mark (/) represent the size of a Sinkhole or Pit opening, and the number following the slash mark represent all other types of openings. Sinkholes and Pits have a depth of 1' - 100'.

• Roll 1D6 to determine whether tunnel veers: 1: veers left 60 degrees; 2: veers left 30 degrees; 3 - 4: straight ahead; 5: veers right 30 degrees; 6: veers right 60 degrees.

** PROB shown is chance of pit leading to an additional entrance. 1 chance in 6 per 10' fallen of 1D6 points of damage. Percentage chance of falling in pit is same as 30% minus AGL rating.

*** PROB shown is chance of finding a dry route. Players attempting to swim in 50 degree or colder water must Save vs. Hypothermia by rolling CON or less on 1D20. Players failing their Saving Roll lose 10 HTK per hour until dry clothing and/or a heat source is found.

A PROB shown is chance that a branch tunnel joins tunnel or passageway instead of intersecting (as in a 4-way intersection). Roll random direction for new tunnel as in •.

B Tunnel or passageway ends, or cavern, vault, room, or lake has no exit besides the original entrance through which the players entered; stream or river disappears into fissure. Tunnel end can be caused by fallen rubble, impassable thicket or plant growth, thick lava seal, or siphon (cave roof descends temporarily to water level).

C Tunnel or passageway ending at this point assumes cut through obstacle completed (or, optionally, river disappears into limestone or sea cave types).

Random Occupants for Furnished Caverns

The Judge is advised to use discretion when using this table because some highly improbable results could be obtained, such as four Cyclopi shacking up next door to a clan of Dwarves. The table is intended to be used as a general guide to what could be found in furnished caverns as a whole rather than for room by room generation, but it could be used to generate random rooms in this manner. Please note that some stats represent the average score for that particular creature (such as INT, AGL, PSY, etc.).
