INTRODUCTION

Field of Glory is a historical miniature tabletop wargaming rules system for anyone interested in recreating the battles of the ancient and medieval eras. This army list companion is designed to be used alongside the *Field of Glory* rulebook, and covers the armies of Rome and its enemies and allies from 280 to 25 BC. During this period, Rome expanded from Italy to gain an empire which included the whole of the Mediterranean and its surrounding regions.

As you look at each army, you will find the following sections:

- Brief historical notes on the army, its wars, its famous generals, weapons and/or troop types.
- A ready-to-play starter army – just put it together and play a balanced small game.
- Instructions for building a customized army using our points system.
- A table with the full list of compulsory and optional troops.
- Supporting illustrations to give you a flavour of the period.
- Miniatures photographs.

Antesignani in combat with Acheaen Cavalry, Acheaen War, 146 BC, by Angus McBride.
Taken from *Men-at-Arms 291: Republican Roman Army 200–104 BC*.

INTRODUCTION

By 280 BC, Rome had conquered its main Italian rivals, including the Etruscans and Samnites, controlling most of Italy by a network of forced alliances. The Greek city of Tarentum, in the heel of Italy, appealed to the Hellenistic king Pyrrhos of Epiros for aid against Rome. This was the first clash between the Roman legions and the Hellenistic pike phalanx. Although Pyrrhos won some hard-fought victories, he began to lose interest in the campaign and moved on elsewhere, allowing Rome to complete its control of southern Italy.

In 264 BC, a dispute between Rome and the Cathaginians over the city of Messina at the north-eastern tip of Sicily resulted in the First Punic War against Carthage. The war lasted until 241 BC, ending in Roman victory. Carthage was forced to surrender Sicily to Rome. In 237 BC, Corsica and Sardinia were also annexed by the Romans.

Carthage consoled itself by conquering a new empire in Spain. In 218 BC their general, Hannibal, instigated a Second Punic War. Hannibal invaded Italy and inflicted numerous severe defeats on the Roman armies. Things looked bleak for Rome. However, Hannibal never quite managed to capture Rome itself and the Romans fought back. They gradually managed to contain Hannibal in the far south of Italy, while in Spain their armies defeated other Carthaginians and conquered their Spanish empire. Eventually, the Romans invaded North Africa to threaten Carthage itself. Hannibal was recalled, but defeated at Zama in 202 BC. The former Carthaginian empire was reduced to modern Tunisia.

In 215 BC, during the Second Punic War, Rome first came into conflict with the Hellenistic kingdom of Macedon to the north of Greece, which led to four wars. After the fourth Macedonian war, in 148 BC, Macedon was annexed by Rome.

In 192 BC, an attempt by the eastern Hellenistic Seleucid kingdom to intervene in Greece provoked Roman intervention. The Seleucids were defeated

in two battles, and lost their territories in Asia Minor, which were parceled out amongst Rome's allies.

In 149 BC, Rome found pretexts to declare war against Carthage again, and after the short Third Punic War destroyed Carthage and annexed her remaining territories.

In 133 BC, King Attalos III of Pergamon bequeathed his kingdom in western Asia Minor to Rome. Then in 88 BC, an attempt to check the expansionist ambitions of Mithridates of Pontus resulted in initial disaster for the Romans with the loss of the whole of Asia Minor and much of Greece. However, the Roman counterattack swiftly defeated the Pontic armies and swept Mithridates out of his newly conquered territories. Two further wars led to the final defeat of Mithridates in 63 BC and further territorial gains for Rome and her client allied kingdoms. The Syrian remnants of the Seleucid kingdom were annexed at this time.

From 58 to 51 BC, the Romans, under Julius Caesar, went on to conquer Gaul (modern France). Britain was also invaded briefly, but to no lasting effect. In 53 BC, an attempt to invade the Iranian Parthian kingdom in the east resulted in disaster at the battle of Carrhae.

From 49 BC, a series of civil wars wracked the Roman Empire. In the last phase of the wars, the Hellenistic Ptolemaic kingdom of Egypt became involved on the losing side, with the result that Egypt was annexed in 30 BC. Following this, Octavian, great-nephew and adoptive heir of Julius Caesar, was in sole control of the Roman world, becoming the first emperor, under the name of Augustus. By this time the Roman Empire included Italy, Spain, Gaul, North Africa, Greece, Asia Minor, Syria and Egypt. A series of small client kingdoms in the east acted as buffers against Parthia.

We have organized the army lists in approximately the order the states they cover first came into military contact with Rome.

TOURNAMENT

MID-REPUBLICAN ROMAN

This list covers the armies of the Roman Republic from 280 to 105 BC – from the war against Pyrrhos of Epiros until the reforms of Marius. At the start of this period, Rome did not yet control the whole of Italy. By the end of the period, her empire had expanded to include not only the whole of Italy but also Sicily, Spain, Dalmatia, Greece and parts of Asia Minor and North Africa. In the meantime, epic wars had been fought and won against Epiros, Carthage, Macedon and the Seleucid Kingdom, as well as the Gallic, Spanish and Illyrian tribes.

THE LEGIONS

Rome's military success was based on her heavy infantry, the *legions*. According to Polybios, *legions* of this period were theoretically 4,200 strong, consisting of 1,200 *hastati*, 1,200 *principes*, 600 *triarii* and 1,200 lightly equipped *velites*. Each legion also had 300 cavalry. Allied *alae*, which were usually present in equal numbers to *legions*, were similarly organised but had three times as many cavalry. A legion would form up in three lines, the *hastati* in front, *principes* in the second line and *triarii* in the third. Each "line" consisted of

Roman Legionaries, Second Punic War, by Angus McBride © Osprey Publishing Ltd. Taken from Men-at-Arms 291: Republican Roman Army 200 – 104 BC.

MID-REPUBLICAN ROMAN

maniples of 120 men, separated by intervals large enough for a maniple of the line behind to fill. This is the famous chequerboard formation, which gave the legion much greater flexibility in the advance than a solid phalanx as used by the Carthaginians and the Hellenistic kingdoms. It is uncertain how this formation worked in practice on contact with the enemy, as the gaps would appear to be a liability. However, as a battle group of 4 bases would represent 8 maniples at the normal troop representation scale, we do not need to worry about this level of detail. Instead, each battle group of hastati and principes is assumed to represent a number of maniples of both types in chequerboard formation.

Roman legionaries of this period carried a large oval shield (scutum). The semi-cylindrical shield of the 1st and early 2nd century AD had not yet come into use, nor had the *lorica segmentata* (body armour). Instead those able to afford it wore chain mail, while the poorer men were issued a small square bronze breastplate by the state. The hastati and principes fought with a heavy throwing spear (pilum) and short sword (gladius). The triarii still

carried the old thrusting spear (hasta). The hastati were drawn from the youngest and fittest men, the principes were experienced men in their prime, and the triarii were the veterans – less active but steady, and the last hope if anything went wrong.

Triarius

GENERAL SCIPIO AFRICANUS (235 – 183 BC)

Publius Cornelius Scipio Africanus Major was the Roman general who finally defeated the Carthaginian general Hannibal at Zama in 202 BC. His victories over lesser Carthaginian commanders in Spain had paved the way for the Roman invasion of Africa. He is held by some to have been a greater general than Hannibal. Nevertheless it could be said that he learned his trade from the exploits of the great Carthaginian. However, unlike Hannibal, he never lost a battle.

BUILDING A CUSTOMISED LIST USING OUR ARMY POINTS

Choose an army based on the maxima and minima in the list below. The following special instructions apply to this army:

- Commanders should be depicted as cavalry.
- Hastati, principes and triarii must be organised as legions: hastati and principes are brigaded together as battle groups. Depending on the size of army represented, a legion could be organised as 2 battle groups, each of 4 hastati and principes, and 1 battle group of 2 triarii, or as 2 battle groups, each of 8 hastati and principes, and 1 battle group of 4 triarii.
- It is recommended that each legion be deployed with its hastati and principes in front and its triarii in support behind.

- If part of a legion is upgraded, the whole legion must be upgraded.
- If part of a legion is downgraded, the whole legion including leves/velites must be downgraded.
- Apart from Italian allied foot, no more than 8 bases can be used from the optional troops list.
- Aitolian and Pergamene allies can be used together, otherwise only one nationality of allies can be used.
- Ligurians, thureophoroi, elephants, Numidian allies, Aitolian allies and Pergamene allies cannot be used before 202 BC.

LATE REPUBLICAN ROMAN

This list covers Roman armies from 105 to 25 BC – from the reforms of Marius until the reforms of Augustus. During this period Gaul, Cyrenaica, Egypt, Syria and additional swathes of Asia Minor were added to the empire. A series of buffer client kingdoms were left in the east between the directly ruled territories and the Parthian kingdom, whose horse archers and cataphracts had proved a successful

counter to the otherwise all-conquering legions. A feature of this period, continued throughout the rest of Roman history, was a series of civil wars. These culminated in the victory of Octavian, great-nephew and adoptive heir of Julius Caesar. The Republic was replaced by the Principate, with Octavian becoming the first Roman emperor under the name of Augustus.

THE LEGIONS

After the reforms of Marius, legionaries were no longer divided into hastati, principes and triarii, but were uniformly equipped with oval shield, mail, pilum and sword.

Legionary

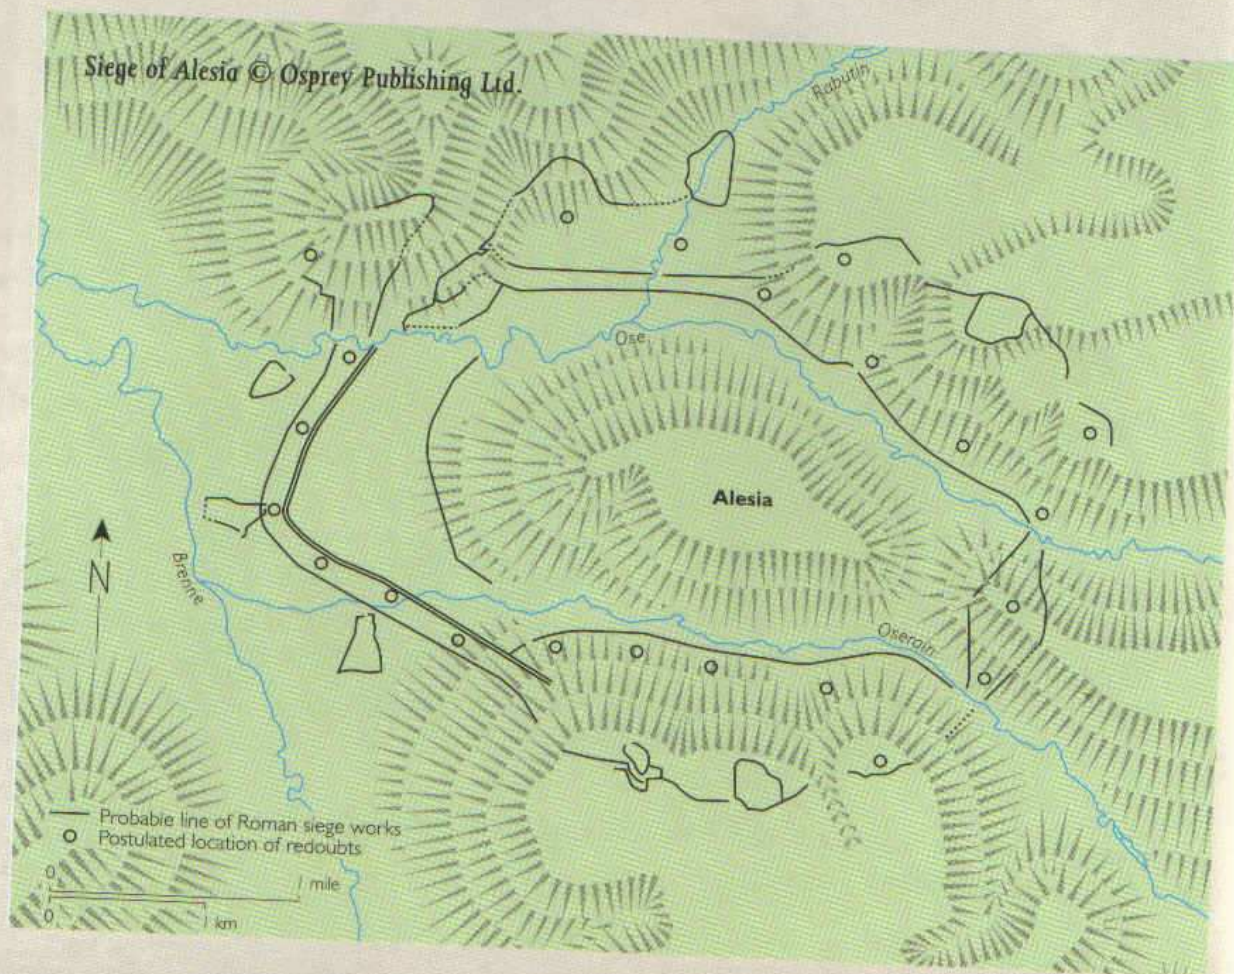

(As previously mentioned, the semi-cylindrical shield and lorica segmentata came into use later, in the 1st century AD). Maniples were replaced by larger tactical units called cohorts. Each legion had ten cohorts, each of 480 men at full strength. Later legions, though possibly not those of

this period, had one larger senior cohort of 800 men.

The general quality of the legions was high, but some veteran legions became renowned for their prowess. Others on long-term postings in peaceful areas sometimes lost their edge.

AUXILIARY TROOPS

Cavalry and light troops were recruited from conquered and adjacent areas, but not yet organised into regular units. They included Spaniards, Gauls, Germans, Macedonians, Numidians, Thracians, Illyrians, Greeks, Syrians and others. Check out the lists for these nations to see which nations could provide which types.

LATE REPUBLICAN ROMAN

GAIUS JULIUS CAESAR (100 – 44 BC)

Gaius Julius Caesar

Roman politician, general and dictator. His conquest of Gaul started in 58 BC and culminated in the epic siege of Alesia in 52 BC. This conquest gave him much political kudos and a loyal veteran army.

During intervals in the fighting, he found time to invade Britain (abortively) twice in 55 and 54 BC. In 49 BC he made his bid for ultimate power, moving his army from Cisalpine Gaul into Roman Italy. This was against Roman law and triggered an epic civil war against the followers of Pompeius Magnus. After the final defeat of the Pompeian faction in 45 BC, Caesar returned to Rome glorious as Dictator for Life of the Roman Republic. However, on 15th March, 44 BC he was assassinated by a group of senatorial conspirators.

LATE REPUBLICAN ROMAN STARTER ARMY

Commander-in-Chief	1	Inspired Commander (Caesar)

BITHYNIAN ALLIES

The small kingdom of Bithynia, in north-west Asia Minor, was an independent kingdom from 297 BC until 74 BC when the last king bequeathed his kingdom to Rome. The Bithynians were of Thracian origin. Bithynia allied with Rome against

Mithridates VI of Pontus. Not much is known about the composition of Bithynian armies, so the following list is highly speculative.

- The commander should be depicted as cavalry.

GALLIC

Gaesati Mercenary

This list covers Gallic armies from the beginning of the 4th century BC until 50 BC when Caesar's conquest was complete. Gauls mainly fought in close order, often with overlapping shields, and were disadvantaged in rough terrain, but some hill tribes probably fought in looser order in their familiar terrain. Gaesati were a Gallic warrior society. They fought naked, but with the usual Gallic shield and weapons. Large Gallic armies were usually coalitions of several tribes.

GAULS VS ROME

The history of the relationship between Gauls and Rome is one of conflict lasting centuries. In 387 BC the Senones under Brennus defeated the Roman army and sacked Rome itself. This trauma was forever to colour Roman relations with Gallic tribes. The Gauls in Northern Italy (Cisalpine Gaul) remained a danger, inflicting a number of defeats on the Romans until the Gallic defeat at Telamon in 225 BC. When Hannibal invaded Italy at the start of the Second Punic War seven years later the Gallic Boii and Insubres joined him and took part in his many victories over the Romans. In 121 BC, southern Gaul (Transalpine Gaul) was incorporated as a Roman province. In 58 BC, a mass migration by the Helvetii gave Julius Caesar the opportunity to commence his conquest of Gaul, culminating in the siege of Alesia in 52 BC, which represented the last effective defence of

the Gauls, under Vercingetorix, against their age-old enemies. Contrary to the popular view of Gauls as "wild barbarians", their infantry usually advanced in good order in close formation, the advance culminating in a fierce massed charge. The bravest warriors, such as the Gaesati, often fought naked apart from their shields and weapons.

Vercingetorix. Caesar said of Vercingetorix "he terrorised waverers with the rigours of an iron discipline". © R Sheridan/AAA Collection Ltd.

BUILDING A CUSTOMISED LIST USING OUR ARMY POINTS

Choose an army based on the maxima and minima in the list below. The following special instructions apply to this army:

- Commanders should be depicted as chariots (only before 100 BC) or cavalry (only from 300 BC).
- Before 250 BC, excluding commanders' bases, chariot bases must at least equal cavalry bases, afterwards cavalry bases must at least equal chariot bases.

Chariot

- Unless the C-in-C is of the same origin, troops only permitted to a certain origin can only be fielded under the command of an allied commander of that origin. All Gaesati must be under the command of one allied commander who can command only Gaesati. Other Gallic allied commanders' contingents must conform to the Gallic allies list below, but the troops in the contingent are deducted from the minima and maxima in the main list.
- Soldurii cannot be used with Gaesati, Germans or Ligurians.
 - Only one non-Gallic allied contingent can be used.
 - Plashed wood edge can only be used in plantations or forest.

PYRRHIC

This list covers the army of Pyrrhos of Epiros from 280 to 272 BC: from his landing in Italy until his death. During this time he campaigned in Italy, Sicily and Greece with mixed success. Cavalry could be Epirot, Macedonian, Greek, Thessalian, Oscan, Acarnanian, Aitolian or Athamanian. Hoplites could be mercenaries, or supplied by allied Greek or Italiot states.

GENERAL PYRRHOS OF EPIROS (318 – 272 BC)

Named by Hannibal as the second greatest general of all time after Alexander the Great, Pyrrhos is famous for his "Pyrrhic victories" against the Romans in which, although he won, his armies suffered exceptionally heavy casualties. As he was the only Hellenistic general to defeat a major Roman army in battle, his victories can nevertheless be regarded as great achievements. He also campaigned against the Carthaginians in Sicily and against various rivals in Greece and Macedonia. He was killed in a street battle in Argos in 272 BC, after being stunned by a roof tile thrown by an old woman.

The Macedonian phalanx formation, from T. A. Dodge's Alexander.

THE MACEDONIAN PHALANX

Developed by King Philip II of Macedon in the 4th century BC, used by his son Alexander the Great to conquer the Persian empire and by Alexander's successors (including Pyrrhos), the Macedonian phalanx was the invincible infantry of its day. Armed with the 18ft (5.5m) pike (sarissa), the spear points of the first 5 ranks projected beyond the front rank, forming an impenetrable wall of spears. The commonest formation was 16 ranks deep, although other formations were used at times. In a straight ahead fight, in good terrain, the phalanx was supreme, but it could come unstuck in less favourable circumstances. The Roman victories against Hellenistic armies were mostly a result of the Romans exploiting their more flexible formations to catch the phalanx at a disadvantage. For example, at Kynoskephalai (197 BC) they charged the engaged phalanx in the rear, and at Corinth (146 BC) in the flank. At Pydna (168 BC) the phalanx was disordered by uneven ground. At Magnesia (190 BC) the phalanx was forced to remain static due to the threat of outflanking cavalry until assorted missiles hurled at the elephants in the intervals between the phalanx blocks drove the elephants to panic and break up the phalanx formation.

LATER CARTHAGINIAN

This list covers Carthaginian armies from 275 BC until 146 BC, from the aftermath of the war against Pyrrhos of Epiros until the Roman destruction of Carthage at the end of the Third Punic War.

At the start of the period, Carthage ruled a commercial empire in North Africa, Sicily, Sardinia, Corsica and southern Spain. After losing Sicily, Sardinia and Corsica to the Romans in and after the First Punic War, the Carthaginians concentrated on expanding their empire in Spain under the command of Hannibal's father Hamilcar Barca. After Hamilcar's death in 228 BC, his son-in-law Hasdrubal the Fair took command. He, however, was assassinated in 221 BC, following which Hannibal became command-in-chief. His siege and capture of Saguntum, a Roman ally in Spain, in 219 BC triggered the start of the Second Punic War.

GENERAL HANNIBAL (247 TO C.183 BC)

Carthaginian commander-in-chief and in large part instigator of the Second Punic War against Rome, Hannibal is famed as one of the greatest generals of all time. His march across the Alps in 218 BC to bring the war to the Romans at home is justly hailed as one of the outstanding feats of military history, though most of his elephants were so out of condition after the trek that they died after the Battle of Trebbia. He won victory after victory over the Roman armies whenever they were foolish enough to engage him in battle, the most famous being that of Cannae in 216 BC, but he never succeeded in capturing Rome itself. Eventually the Romans learned to avoid open battle and merely contain Hannibal in southern Italy. Meanwhile their armies conquered the

Carthaginian possessions in Spain. Eventually they landed in North Africa and threatened Carthage itself. Hannibal was recalled, but was defeated by Scipio Africanus at the Battle of Zama in 202 BC. He died in exile circa 183 BC – committing suicide rather than be handed over to the Romans.

WAR ELEPHANTS

Used by the Hellenistic kingdoms, the Carthaginians and even the Romans, war elephants were a major feature of warfare in this period. They were feared by all troops, but were particularly effective against cavalry whose horses they terrified. As well as being hard to obtain and expensive to maintain, they were something of a risky weapon. Notable successes include defeating the Roman cavalry at Heraclea (280 BC), routing the Galatian cavalry and chariots at "the Elephant Victory" (273 BC), trampling the Roman legions at Bagradas (255 BC) and breaking the Macedonian left wing at Kynoskephalai (197 BC) and Pydna (168 BC). Notable disasters include panicking and disrupting their own cavalry at Zama (202 BC) and their own phalanx at Magnesia (190 BC).

THE END OF CARTHAGE

After defeat in the Second Punic War, Carthage lost all its possessions outside modern Tunisia, was forced to pay enormous reparations, and effectively reduced to the status of a Roman vassal. In 149 BC the Romans, using an unsuccessful punitive action by Carthage against Numidian raiders as a

Hannibal

BATTLE OF TREBBIA © Osprey Publishing Ltd

LATER CARTHAGINIAN

pretext, declared war on Carthage again, starting the 3rd Punic War. In 146 BC, Carthage itself

African Veteran

was taken, following which the surviving citizens were sold into slavery, the city was razed to the ground and the surrounding fields sowed with salt.

LATER CARTHAGINIAN STARTER ARMY

LATE CAMPANIAN ALLIES

The Campani were an Oscan people who took over the Greek and Etruscan cities south of Latium in south-western Italy in the late 5th century BC. They were heavily influenced by Greek culture, fielding armies including both hoplites and Oscan-style javelinmen. This allied list only covers the period of the Second Punic War, however, by

which time they had probably adopted Roman military equipment and organization.

- The commander should be depicted as cavalry.
- Hastati & Principes: Triarii: Skirmishers quality must either be Average: Superior: Average, Average: Average: Average, Poor: Average: Poor or Poor: Poor: Poor.

ILLYRIAN

Illyria occupied the area east of the Adriatic Sea and north-west of Greece. The Illyrian tribes were fond of raiding by land and sea for slaves and loot. Unlike most ancient peoples they

Slinger

armed their slaves, who fought alongside them in battle. This list covers Illyrian armies from the later 4th century BC until the beginning of the 1st century AD. Prior to this period they had used mainly skirmishing tactics, but now they fought in formed bodies of spearmen. Rome fought a series of wars against the Illyrians from 229 BC onwards, the last tribes being subjugated in 9 AD.

ANCIENT SPANISH

This list covers the tribes of the Iberian peninsula from the mid-3rd century BC until the last rebellions were crushed by the Romans at the end of the 1st century BC. There were three main tribal groupings – Iberians, Lusitanians and Celtiberians.

SPANISH SCUTARII & CAETRATI

Called scutarii by the Romans because of their large oval shield (*scutum*), Spanish (Iberian) foot were much sought after as mercenaries or allies by the Carthaginians and Romans. Armed with heavy javelins and sword, their charge was fierce and hard to resist. They were undisciplined when victorious but resolute in defeat, often making desperate suicidal charges or even committing mass suicide rather than surrender when

besieged. They were famous for their mobility over the craggy wooded hills of Spain. They were fond of ambushes and all forms of guerrilla warfare – the Roman pacification of Spain was a long and painful process. Their skirmishers were called *caetrati* by the Romans after their smaller round shield (*caetra*).

Celtiberian scutarii were similarly equipped to Iberians, but less adept in rough and broken terrain. Lusitanian foot were all *caetrati* rather than scutarii, but a proportion at least were equipped for close combat, some even wearing mail.

Lusitanian

IBERIAN STARTER ARMY

Commander-in-Chief	1	Field Commander
Sub-commanders	2	2 x Troop Commander
Large shield cavalry	1 BG	4 bases of cavalry: Superior, Protected, Undrilled Cavalry – Light Spear, Swordsmen

BUILDING A CUSTOMISED LIST USING OUR ARMY POINTS

Choose an army based on the maxima and minima in the list below. The following special instructions apply to this army:

- Commanders should be depicted as large shield cavalry.
- Unless the C-in-C is of the same origin, troops only permitted to a certain origin can only be fielded under the command

of an allied commander of that origin. A Spanish allied commander's contingent must conform to the Ancient Spanish allies list below, but the troops in the contingent are deducted from the minima and maxima in the main list.

Cretan Archer

Following the death of Alexander the Great, Macedon, north of Greece, was one of the three main kingdoms into which Alexander's empire was divided after the initial round of civil wars between

his successors. (The others were the Seleucid kingdom in the east, and the Ptolemaic kingdom in Egypt). This list covers the armies of the Kingdom of Macedon from about 260 BC. Until the advent of Rome, the Kingdom of Macedon was the dominant force in Greece. Between 215 and 148 BC, Macedon fought a series of wars against the expanding Roman Republic. After the fourth Macedonian war, in 148 BC, Macedon was annexed by Rome.

LATER MACEDONIAN STARTER ARMY

ATTALID PERGAMENE

The Attalid dynasty began with Philetaeros (son of Attalos), Lysimachos' governor of the great city of Pergamon in western Asia Minor. He switched sides to Seleukos in 282 BC. His nephew and successor, Eumenes I, declared independence in 262 BC. This list covers Pergamene armies from that date. Pergamon was allied with Rome against Macedon in the First, Second and Third Macedonian wars, and against the Seleucid kingdom in the Syrian war. After the Roman and Pergamene victory over the Seleucids at Magnesia in 190 BC, Eumenes II was granted all the Seleucid territories west of the Taurus. The

kingdom was bequeathed to Rome by Attalos III on his death in 133 BC. His illegitimate half brother, Aristonikos, rebelled but was suppressed by 129 BC.

NUMIDIAN OR EARLY MOORISH

The ancient Numidians and Moors were semi-nomadic Berber tribes living in North West Africa. The Numidian kingdom was west of Carthage and the Moorish kingdom beyond that. This list covers Numidian and early Moorish armies from the late 3rd century BC to the early 1st century AD.

Numidian and Moorish cavalry and foot fought mainly as javelin skirmishers, in which role they

were expert, harassing the enemy with javelins but using superior speed and agility to evade their charges. The Carthaginians made much use of Numidian cavalry and foot during the Punic Wars against Rome. At the Battle of Cannae in 216 BC, the Numidian cavalry on the Carthaginian right wing skirmished with the opposing Roman cavalry and kept them out of the battle long

NUMIDIAN OR EARLY MOORISH

Numidian Warrior, by Richard Hook. Taken from *Men-at-Arms 121: Armies of the Carthaginian Wars 261 – 146 BC*.

enough for the Spanish and Gallic cavalry on the Carthaginian left to be able to defeat the Roman cavalry facing them, ride round the Roman rear, and attack the cavalry of the other Roman wing before falling on the rear of the Roman infantry. They were fond of ambushes and other tricks, and made excellent use of terrain. They were at their best in pursuit of fleeing enemy, but when put to flight themselves would flee for two or three days before risking stopping.

Under the influence of the Romans, various attempts were made to develop drilled close

fighting foot. King Juba I of Numidia was allied to the Pompeian side in the Roman Civil War. Bogud (Bogus) of Mauretania was allied to Caesar.

LATER SELEUCID

The Seleucid Kingdom was the largest in land area of the Hellenistic Successor kingdoms that formed after the death of Alexander the Great. At its height it stretched from the eastern shores of the Aegean Sea to India. This list covers Seleucid armies from 205 BC. At this stage, the kingdom still reached from western Asia Minor to India, but had lost Bactria in the north-east to local Greek rebels. About this time, the Seleucid cavalry were upgraded to fully armoured cataphracts –

probably following Antiochos III's eastern campaigns against the Graeco-Bactrian kingdom. In 192 BC, he invaded Greece, but was defeated by the Romans at Thermopylae in 191 BC and again at Magnesia in Asia Minor in 190 BC.

Following these defeats, the kingdom lost most of Asia Minor. Soon after, the Parthians,

Armoured Elephant

under King Mithridates I (170–138 BC), took over most of the eastern Seleucid provinces, leaving only Syria and Mesopotamia. Constant civil wars took further toll, and in 63 BC, the Romans deposed the last Seleucid princes and made the remnants of the kingdom into a Roman province.

SCYTHED CHARIOTS AT MAGNESIA

Bristling with razor-sharp blades, scythed chariots were designed to strike fear into the hearts of the enemy. When successful, their effect could be devastating. Appian describes the result of a Pontic scythed chariot charge at the Battle of the River Amnias in 88 BC: "The scythed chariots were driven at great speed against the Bithynians, cutting some of them in two instantaneously, and tearing others to pieces. The army of Nicomedes was terrified at seeing men cut in halves and still breathing, or mangled in fragments, or hanging on the scythes. Overcome rather by the hideousness of the spectacle than by loss of the fight, fear disordered their ranks."

However, scythed chariots were fairly easy to counter with light foot archers, slingers and javelinmen, who could shoot at the horses while

dodging out of the way of the chariots. This happened at the Battle of Magnesia. The Seleucid chariot horses, maddened by their wounds, stampeded through their own cataphracts and camelry. The Pergamene cavalry (allied to the Romans) following closely behind were able to sweep away the Seleucid wing and threaten the

flank of the phalanx. Unable to safely advance, the phalanx had to stand under a hail of missiles from the Roman foot until the elephants in the intervals between the phalanx blocks panicked and broke up the phalanx, completing the Seleucid defeat.

LATER PTOLEMAIC

The Ptolemaic kingdom in Egypt was one of the three major Hellenistic kingdoms into which Alexander the Great's empire was divided after the initial wars of his successors. (The others being Macedon, north of Greece, and the Seleucid kingdom in the east). As well as Egypt, the early Ptolemies used their substantial fleet to control much of the eastern Mediterranean coast. By 166 BC, when this list starts, their territories had been reduced to Egypt and Cyprus. About this time, a reorganisation of the army has been postulated in which infantry drilled in Roman legionary tactics were introduced. The list ends with the annexation of the kingdom by Rome in 30 BC after the defeat and death of Marcus Antonius and Cleopatra.

CLEOPATRA VII (69 – 30 BC)

Cleopatra VII was the last Ptolemaic ruler of Egypt, at various times as co-ruler with her father Ptolemy XII Auletes (until 51 BC), and her brothers/husbands Ptolemy XIII (from 51–47 BC) and Ptolemy XIV (from 47–44 BC). The Macedonian Ptolemaic dynasty, descended from Alexander the Great's general Ptolemy, continued the Pharaonic Egyptian tradition of brother-sister marriages. From 48 BC Cleopatra was in a state of civil war with her 14-year-old brother/husband Ptolemy XIII. This coincided with the defeat of

Pompey by Julius Caesar in the Roman civil war. Pompey fled to Egypt, but was murdered by Ptolemy in the hope of gaining Caesar's good will. Caesar, however, sided with Cleopatra, restored her to power, and became her lover. Ptolemy was drowned while crossing the Nile. Cleopatra then married her 12-year-old younger brother Ptolemy XIV as co-ruler, though she retained the real power and continued her liaison with Caesar. She bore him a son, his only known male issue, known popularly as Caesarion (little Caesar). In 44 BC, after the death of Ptolemy XIV – probably poisoned by Cleopatra – Caesarion was appointed co-ruler at the age of 3 as Ptolemy XV Philopator Philometor Caesar. After Caesar's assassination, Cleopatra became the lover of Marcus Antonius (Mark Anthony) and bore him three children. When he fell out with Octavian, Caesar's heir, Cleopatra supported him in the ensuing civil war. Their fleet was defeated at Actium in 31 BC. They fled back to Egypt, where they committed suicide in 30 BC. Caesarion was captured by Octavian and murdered as a threat to his claim to be Julius Caesar's sole heir. Egypt became a Roman province. Despite the legend of Cleopatra's great beauty, Cleopatra's coins indicate that she was, in fact, rather plain. Contemporary writers admire her intelligence, charisma and seductive voice, but tactfully omit mention of her looks.

PONTIC

PONTIC

This list covers Pontic armies from 110 BC to 47 BC: The reigns of Mithridates the Great (Mithridates VI Eupator) and his son Pharnaces II.

MITHRIDATES VI (THE GREAT) OF PONTUS (132 – 63 BC)

Mithridates the Great of Pontus was one of the expanding Roman empire's most formidable and persistent foes. Starting with the small Kingdom of Pontus on the south coast of the Black Sea, he

conquered the Kingdom of Bosphorus on the north coast and expanded his borders in Anatolia at the expense of the neighbouring kingdoms. When these called on Rome for help, Mithridates' forces defeated the armies sent against him in 88 BC by the local Roman commander Manius Aquilius and the King of Bithynia, and surged on into Greece where they were welcomed by many cities, including Athens. Manius Aquilius was captured and molten gold

RISE OF ROME

was poured down his throat as a fitting punishment for his notorious greed. This marked the apogee of Mithridates' success. A new Roman army, under the famous general Sulla, was sent to Greece and defeated the Pontic armies. Mithridates sued for peace. He then converted his army from a pike phalanx-based Hellenistic army to Roman style legions. Over the next 25 years, Mithridates fought two more wars against the Romans, sometimes successful, more

often defeated. Never one to give up hope, he ultimately fled to the Bosphorus, where he started to raise a new army. This was too much for his long-suffering subjects, however, who finally revolted. Mithridates committed suicide with the help of a loyal soldier's sword – after famously taking antidotes throughout his life, he proved immune to self-administered poison.

After Mithridates' death his son Pharnaces II ruled in Bosphorus. Seizing the opportunity presented by the Roman Civil War, he re-invaded Pontus, defeating the local Roman forces. However, when Caesar arrived in 47 BC he swiftly defeated Pharnaces at Zela. So short was the campaign that Caesar uttered his famous dictum "veni, vidi, vici" (I came, I saw, I conquered). Pharnaces fled back to the Bosphorus but was soon deposed.

SPARTACUS SLAVE REVOLT

This list covers the slave armies of the Third Servile War.

In 73 BC, Spartacus was one of 70 gladiators who broke out of the school of Lentulus Batiatus in Capua. The rebels initially used kitchen implements to break out but obtained several carts of gladiatorial equipment during their escape. They then defeated a small force sent to recapture them, taking their arms and armour to add to their arsenal. Over the next few weeks, the rebels moved to a more defensible position on the slopes of Mount Vesuvius and many more escaped slaves swelled their ranks. A larger Roman militia force besieged the slaves but by using vines and ladders some of the slave force made its way down the impassable slopes and attacked the Roman camp from the rear. The resulting battle saw the Romans comprehensively defeated.

The army of Spartacus continued to grow and defeated yet another Roman force under Publius Varinius. By the end of 73 BC, the total size of the slave army was 70,000 men, women and children. In 72 BC, the slaves moved north and their still growing force split into at least two.

The smaller portion, led by Crixus, was caught and defeated by a regular Roman army under Lucius Gellius Publicola.

Spartacus, however, was by now rather too near Rome for the comfort of the Senate. Several more hastily raised legions were sent to bar Spartacus' route to Rome while Gellius moved to trap the slave army. Spartacus then split his army, a small force kept the main Roman force busy while he turned on and defeated Gellius before returning with his whole force to defeat the blocking force as well.

At this point Spartacus declined to attack Rome and instead headed back to the south with his total force now numbering 120,000 or more. The following year, with the revolt now recognised as a serious issue, a force of eight legions under Marcus Licinius Crassus was sent after the slaves. The slave army was trapped in the toe of Italy. Crassus sent two of his legions under Mummius to try to get behind Spartacus with orders not to engage. Seeing an opportunity for glory Mummius disobeyed and attacked, only to be defeated. Crassus then attacked with his main force and for the first time the main slave army was beaten with several thousand casualties.

Spartacus then tried to find ways to escape by sea to Sicily but was unable to do so. The slaves retreated towards Rhegium, in the toe of Italy, followed by Crassus whose legions built a line of fortifications across the isthmus to pen the slaves in. With further veteran Roman troops under Pompey approaching, the slaves made a desperate break out but were caught by Crassus' legions and defeated in detail in two further battles. Spartacus is believed to have died fighting. 5,000 fleeing slaves were caught by Pompey and slaughtered, the 6,000 slaves captured by Crassus were crucified along the road between Capua and Rome.

EARLY ARMENIAN

The mountains of Armenia allowed the kingdom to maintain its independence from the great empires throughout this period. This list covers Armenian armies from the declaration of independence by Ervand (Orontes) II of the House of Ervand in 331 BC until the overthrow of Trdat II by the Sassanids in 252 AD.

TIGRAN THE GREAT (RULED 95 BC – 55BC)

During the reign of Tigran the Great, Armenia filled a power vacuum left by the weakening of the Parthian kingdom by nomad invasions and the collapse of the Seleucids, gaining a short-lived empire including Mesopotamia, Syria and Media-Atropatene. Allied with Mithridates VI of

Pontus, whose daughter, Cleopatra, he married, Tigran allowed Mithridates to seek refuge in Armenia after his defeat by the Romans under Lucullus in 70 BC. The Romans demanded that Mithridates be handed over to them. Tigran refused. The following year Lucullus invaded. He defeated the Armenian army twice, at Tigranocerta and Artaxata, but failed to capture Tigran or Mithridates and was recalled. Mithridates returned to Pontus with 8,000 men. In 66 BC, with a new Roman army under Pompey the Great advancing into Armenia, Tigran capitulated. He was forced to give up his empire, but was allowed to keep his original kingdom, and ruled it as a Roman client until his death in 55 BC at the age of 85.

PARTHIAN

The Parthian Kingdom at its height covered the whole of modern Iran as well as parts of the surrounding regions. Founded in the pre-existing province of Parthia south-east of the Caspian sea circa 250 BC by the nomadic Parni, the kingdom was ruled by the Arsacid dynasty. Parthia expanded east, south and west, taking over the eastern provinces of the Hellenistic Seleucid Kingdom. Eventually it came into conflict with the expanding Roman empire. The Parthians successfully halted Roman expansion in the east, their combination of light horse archers and heavily armoured cataphracts proving more than a match for the legions. The two empires continued as uneasy neighbours until the Parthian kingdom was overthrown by its Sassanid Persian vassals in 225 AD.

This list covers the Parthian kingdom from its foundation until its overthrow by the Sassanids. It also covers the Suren secessionist state in the east. Adiabene, Edessa, Elymais, Hatra and Media-Atropatene were vassal states.

THE BATTLE OF CARRHAE 53 BC

In this epic battle, approximately 35,000 Romans under Crassus were defeated by 9,000

Parthian horse archers and 1,000 cataphracts under Surena (Rustaham Suren-Pahlav). The outnumbered Roman cavalry were drawn off by the Parthian horse archers and defeated by the cataphracts. The unsupported Roman infantry were then subjected to a constant shower of arrows by the Parthian horse archers. Though well-armoured and protected by large shields, the Romans were unable to take any effective offensive action against the swift horse archers, and began to suffer severely from heat and thirst as well as lucky arrow shots. An attempt to advance against the Parthians achieved nothing. Eventually 20,000 Romans were killed and 10,000 more were later captured. They were relocated as military settlers in the east of the Parthian empire. There is a legend that they were later captured by the Han Chinese, and re-settled in China. There have been recent attempts to prove the truth of this legend using genetic testing.

	Medium Foot	Unprotected	Average	Undrilled	Bow	—	5	6-8	

COMMAGENE ALLIES

Commagene, north east of Cilicia and Syria, was a kingdom in its own right from 162 BC, when the Seleucid governor Ptolemy declared independence, until 72 AD, with brief interruptions during Tigran the Great's short-lived Armenian

empire, and a period as a Roman province from 17 AD to 38 AD. After final annexation by Rome in 72 AD, the ruling family retired to Greece.

- The commander should be depicted as cataphracts.

RISE OF ROME

LATER SKYTHIAN OR SAKA ALLIES

The nomadic Scyths/Saka occupied much of the steppe from north of the Black Sea to north of

Bactria. They have their own list in our book *Field of Glory Companion 4: Immortal Fire: Greek, Macedonian and Persian Wars*. This list covers Skythian or Saka allied contingents from 300 BC.

LATER JEWISH

In 167 BC, Mattathias the Hasmonean, a Jewish priest, began a revolt against the Seleucid king Antiochos IV Epiphanes in response to decrees banning Jewish religious practice. His son Judah Maccabee led the Jewish rebels to victory over the Seleucid forces on several occasions, but was killed in the defeat of Elasa in 160 BC. His brothers Jonathan and Simon continued the fight, eventually securing Judaeen independence and establishing the Hasmonean dynasty of Priest Kings. Civil wars and Roman intervention resulted in the replacement of the Hasmoneans by the Idumaeen Herod the Great, who gained full control by 37 BC. He ruled as a Roman client until his death in 4 BC. The emperor Augustus divided his kingdom between his three sons: Herod Antipas in Galilee, Philip in the Golan heights region; and Herod Archelaus in Judaea (including Samaria and Idumaea). The latter ruled so badly that he was deposed by the Romans in 6 AD at the request of his subjects. Judaea became an autonomous part of the Roman province of Syria.

This list covers Jewish armies from 167 BC to 6 AD.

Emperor Augustus, Caesar's adopted heir.

THE WAR OF THE SONS OF LIGHT AGAINST THE SONS OF DARKNESS

This is the title of one of the Dead Sea Scrolls, also sometimes called the Rule of War. It describes an ideal army for an apocalyptic war against the unbelievers. The text has an obsession with the number 7, but describes the infantry as equipped with (7 cubit = approx 3 metres) long spear and (2.5 x 1.5 cubits = approx 1 metre x 0.67 metres) oval shield, forming up 7 ranks deep. Allowing for some adjustment to fit the magic number 7, this corresponds to the normal equipment and formation of Hellenistic thureophoroi. Slingers are also mentioned – they are expected to shoot 7 times then retire through the phalanx at a trumpet signal. The text concerning the cavalry is corrupt. There were clearly two types of cavalry, the older men (cavalry of the army) forming up in two large bodies (each of 700 men in 7 ranks) on each flank of the army, the younger (cavalry of the phalanx) in larger numbers but smaller squadrons (200 men) closely supporting the

infantry. The cavalry of the phalanx wear helmet and greaves, carry a round shield and an 8-cubit (3.5 metre) lance. Bow and javelins are also mentioned, but due to the corruption of the text it is not clear which cavalry carry them. It could be that the Rule advocates the cavalry of the army carrying all these weapons, but it would be a reasonable assumption that bow and javelins might represent the (ideal) equipment of the cavalry of the phalanx.

Foot and Cavalry of the Phalanx with Cavalry of the Army

LATER JEWISH STARTER ARMY

BUILDING A CUSTOMISED LIST USING OUR ARMY POINTS

Choose an army based on the maxima and minima in the list below. The following special instructions apply to this army:

- Commanders should be depicted as cavalry of the army or cavalry of the phalanx.

- Non-upgraded foot of the phalanx or thureophoroi can be graded as Medium Foot or Heavy Foot, but all must be graded the same.
- Thracian horse must all be graded the same.
- The minimum marked * only applies if any cavalry other than commanders are used.

NABATAEAN ALLIES

The Nabataean kingdom in western Arabia became wealthy from trade. Its capital at Petra was (re)built in the latest Hellenistic style in the 1st century BC. The Nabateans fought both on the

side of and against the Judaeans at various times, and also supplied client forces to the Romans.

- The commander should be depicted as Cavalry.

Fortified camp								24	0–1
Allies									
Sarmatian allies – Early Sarmatian – see Field of Glory Companion 4: <i>Immortal Fire: Greek, Persian and Macedonian Wars</i>									
Skythian allies (Only before 11 AD) – Early Skythian or Saka allies – see Field of Glory Companion 3: <i>Immortal Fire: Greek, Persian and Macedonian Wars</i> – or Later Skythian or Saka allies									
Roman allies (Only from 42 AD) – Principate Roman or Dominate Roman – see Field of Glory Companion 5: <i>Legions Triumphant: Imperial Rome At War</i>									

APPENDIX 1 – USING THE LISTS

To give balanced games, armies can be selected using the points system. The more effective the troops, the more each base costs in points. The maximum points for an army will usually be set at between 600 and 800 points for a singles game for 2 to 4 hours play. We recommend 800 points for 15mm singles tournament games (650 points for 25mm) and 1000 points for 15mm doubles games.

The army lists specify which troops can be used in a particular army. No other troops can be used. The number of bases of each type

in the army must conform to the specified minima and maxima. Troops that have restrictions on when they can be used cannot be used with troops with a conflicting restriction. For example, troops that can only be used "before 235 BC" cannot be used with troops that can only be used "from 235 BC". All special instructions applying to an army list must be adhered to. They also apply to allied contingents supplied by the army.

All armies must have a C-in-C and at least one other commander. No army can have more

*Thracian King Kotys and his bodyguards at the battle of Kallinikos, 171 BC, by Angus McBride.

APPENDIX 1 – USING THE LISTS

than 4 commanders in total, including C-in-C, sub-commanders and allied commanders.

All armies must have a supply camp. This is free unless fortified. A fortified camp can only be used if specified in the army list. Field fortifications and portable defences can only be used if specified in the army list.

Allied contingents can only be used if specified in the army list. Most allied contingents have their own allied contingent list, to which they must conform unless the main army's list specifies otherwise.

BATTLE GROUPS

All troops are organized into battle groups. Commanders, supply camps and field fortifications are not troops and are not assigned to battle groups. Portable defences are not troops, but are assigned to specific battle groups.

Battle groups must obey the following restrictions:

- The number of bases in a battle group must correspond to the range specified in the army list.
- Each battle group must initially comprise an even number of bases. The only exception to this rule is that battle groups whose army list specifies them as $\frac{2}{3}$ of one type and $\frac{1}{3}$ of another, can comprise 9 bases if this is within the battle group size range specified by the list.

- A battle group can only include troops from one line in a list, unless the list specifies a mixed formation by specifying fractions of the battle group to be of types from two lines. e.g. $\frac{2}{3}$ spearmen, $\frac{1}{3}$ archers.
- All troops in a battle group must be of the same quality and training. When a choice of quality or training is given in a list, this allows battle groups to differ from each other. It does not permit variety within a battle group.
- Unless specifically stated otherwise in an army list, all troops in a battle group must be of the same armour class. When a choice of armour class is given in a list, this allows battle groups to differ from each other. It does not permit variety within a battle group.

EXAMPLE LIST

Here is a section of an actual army list, which will help us to explain the basics and some special features. The list specifies the following items for each historical type included in the army:

- Troop Type – comprising Type, Armour, Quality and Training.
- Capabilities – comprising Shooting and Close Combat capabilities.
- Points cost per base.
- Minimum and maximum number of bases in each battle group.
- Minimum and maximum number of bases in the army.

BOSPORAN
APPENDIX 1 – USING THE LISTS
APPENDIX 2 – THE TOURNAMENTS

RISE OF ROME

Troop name		Troop Type				Capabilities		Points per base	Bases per BG	Total bases	
		Type	Armour	Quality	Training	Shooting	Close Combat				
Xystophoroi	Only before 274 BC	Cavalry	Armoured	Superior	Drilled	–	Lancers, Swordsmen	18	4–6	4–6	
Javelin-armed heavy cavalry	Before 274 BC	Cavalry	Armoured	Superior	Drilled	–	Light Spear, Swordsmen	17	4–6	4–6	
				Average				14			
	From 274 BC	Cavalry	Armoured	Superior	Drilled	–	Light Spear, Swordsmen	17	4–6	6–12	
				Average				14			
Hoplites		Heavy Foot	Protected	Average	Drilled	–	Offensive Spearmen	8	6–8	0–18	
		Heavy Foot	Protected	Average	Undrilled	–	Offensive Spearmen	7			
				Poor				5			
Archers		Light Foot	Unprotected	Average	Drilled	Bow	–	5	6–8	0–12	6–18
Slingers		Light Foot	Unprotected	Average	Drilled	Sling	–	4	6–8	0–12	
Javelinmen		Light Foot	Unprotected	Average	Undrilled	Javelins	Light Spear	4	6–8	0–12	

Special features:

- Xystophoroi can only be used before 274 BC. Javelin-armed heavy cavalry can be used before or after 274 BC but the minimum and maximum numbers permitted change. Thus before 274, the army can and must include from 4 to 6 bases of xystophoroi and from 4 to 6 bases of javelin-armed heavy cavalry. From 274 BC the army cannot include any bases of xystophoroi but can and must include from 6 to 12 bases of javelin-armed heavy cavalry.
- Javelin-armed heavy cavalry can either be Superior or Average. The list specifies the different points costs. All the bases in a battle group must be of the same quality.
- Hoplites can be Average Drilled, Average Undrilled or Poor Undrilled. All the bases in a battle group must be of the same quality and training. The total number of hoplite bases in the army cannot exceed 18.
- The army is allowed from 0 to 12 bases each of archers, slingers and javelinmen. However, the total number of archers, slingers and javelinmen bases must be at least 6 and cannot exceed 18. Each battle group must have from 6 to 8 bases of one type – a battle group cannot include a mixture of archers and slingers or javelinmen.

APPENDIX 2 – THEMED TOURNAMENTS

A tournament based on the “Rise of Rome” theme can include any of the armies listed in this book.

It can also include the following armies from our other army list books. These can only use options permitted between 280 BC and 25 BC:

- Thracian
- Syracusan
- Galatian
- Hellenistic Greek
- Ancient British
- Early German

IN PEACE PREPARE FOR WAR

Do battle with the Roman Republic and its enemies with *Rise of Rome*, the *Field of Glory* gaming companion. From the war against Pyrrhos of Epirus until the victory of Augustus, the Roman legions fought for their republic, their commanders and themselves. Enhance your gameplay with this addition to the original rulebook, complete with the organization of hundreds of accurately researched troop types, detailed historical overviews and supporting maps and artwork.

Rise of Rome is a companion to *Field of Glory*, the historical miniatures tabletop wargaming rules system for ancient and medieval wargaming. To play the rules you will need a copy of *Field of Glory*.

Visit www.fieldofglory.com for the latest releases including companion army lists, hints and tips, discussion forums and more.
