

The diagram illustrates a 'Settled Star System'. At the top left, a red star is shown with a green planet orbiting it. Below the star, a green circle represents a 'Space Station / Human Outpost', and a brown circle represents an 'Uninhabited Star System'. A horizontal line separates these from the route types below. Three route types are listed: 'Main Route (Stellar Communication Network)' indicated by a thick red line, 'Secondary Route' indicated by a thick yellow line, and 'Dead-end Route' indicated by a thick blue line. Each route type has a small icon to its left: a red circle with a white dot for the Main Route, a yellow circle with a white dot for the Secondary Route, and a blue circle with a white dot for the Dead-end Route.
