# Flight 101: Handwritten Objectives 1

Print this on the back of the Flight 101 Objective Lists for best effect

## Boxer

PUSH LITTLE CART!

## Cowboy

You've been working on your rope-tying skills. Trip wires anyone?

## Dropout

Remember that great Wikipedia article on Abkhazia discussing the finer points of the revolution and the repercussions thereof? This would be a great time to distract the hijackers by discussing it at length.

## Gadgeteer

There is a fire extinguisher below the seat in front of you along with some string. A trip wire should cause a bit of a distraction.

## Patriot

You've been waiting for this your whole life. Go kick some ass!

## Scalpel

Under your seat is a experimental type of chemical injector that can function through clothing. It is labeled "sodium pentothal", which will cause a heart attack. The dosage is designed to disable a grown man without killing him. Pretending to give first aid to a collapsed hijacker might get you a better position.

## Stuntman

Do you remember that stunt you did where the hero stuck a pen behind the trigger of an Uzi? Well, here is a pen!

## Wireman

Years of training in persuasion and subtle manipulation have served you well so far. Who doesn't need a new "friend" in a stressful situation? Conversely, use your finely honed verbal skills to shock and demoralize your opponents.
