

The background of the cover is a dark blue-grey color. It features a large, light blue-grey line-art illustration of a Starship's interior. In the upper right, there is a circular viewfinder or sensor display with a grid pattern. Below it, a vertical structure resembling a console or part of the ship's hull is visible. In the lower center, there is a rectangular structure with a semi-circular top, possibly a doorway or a piece of equipment. The overall style is technical and futuristic.

THE CREW OF THE U.S.S. ENTERPRISE NCC-1701

“ We didn’t set out to make history. I mean, I don’t suppose anybody really does, but the crew of the *Enterprise*? We were just doing our jobs. History just sort of found us.

Which is impressive, because space is big. It’s hard to find something as small as a starship, even a ship the size of a *Constitution*-class heavy cruiser, in something so big. But it found us anyway, and soon enough, there were stories about Captain Kirk and the rest of the crew. Some of the stories grew into tall tales and legends, of course, and some of them were thought to be nothing else from the beginning, but I was there. I saw what happened. In the former category, the captain didn’t take on a dozen Gorn warriors *mano a mano*; there was just the one, and that was enough. Commander Spock really did have his brain stolen, though, and the giant space amoeba? That one really happened, too.

Something else that’s not a tall tale? The relationship that Captain Kirk had with his crew. All of them. It’s customary for a captain to know his crew, of course, but Captain Kirk took it a little further than other captains I’ve served under. He took the time to at least ask how our families were back home when we’d meet in a corridor; not everybody does that. It made doing the job easier, knowing he cared about his crew.

His loyalty to the ship and the crew isn’t a tall tale, either; he risked his life more than once to save both.

We lost more than fifty crewmen over the course of those five years, and he took every one of those deaths personally. That kind of loyalty filters down, and I think that’s one of the reasons why history found us. We were tight. We worked well together, because we learned by the captain’s example. We would have fought the Devil for each other. Matter of fact, I think we actually did once, but that’s a different story.

That’s how we achieved so much, I suppose. I think the ship’s first contact record is still intact, for instance.

I know that where I was, down in engineering, the *Enterprise*’s speed records were something that all of us, not just Commander Scott, took immense pride in. Lieutenant Uhura practically created a whole new position because she wasn’t content to just sit there and open hailing frequencies; that’s going to change crew organization from now on.

It wasn’t all about Starfleet records, though; the *Enterprise* wound up helping the entire Federation. Doctor McCoy developed dozens of medicines and medical procedures, for example, which have already saved countless lives. Commander Spock and the Science division made breakthroughs in more scientific disciplines than I care to count, which have gone on to revolutionize everything from computer design to crop fertilization.

I’m on the *Kongo* now, but I’ve already put in to be reassigned to the *Enterprise* after her refit. I want to be a part of what she does next!

”

THE ORIGINAL SERIES CHARACTERS

CAPTAIN JAMES T. KIRK

COMMANDING OFFICER

“Captain Kirk didn’t demand perfection, but he did require you to give as much to the job as he did: everything. If you could do that, he stayed out of your way. He expected every crew member to do their job. If you didn’t, he let you hear about it. If you did it well, he let your supervisor hear about it. And there was no one – no one – he wouldn’t face down in defense of his crew.”

So yes, he was a hard man to serve under. And I’d go back in a second if I had the chance.

COMMANDER SPOCK

FIRST OFFICER / CHIEF SCIENCE OFFICER

“ I know Spock considered his Human heritage a weakness, but I always considered it a hidden strength, something that tempered the rigidity of his Vulcan upbringing. In a crisis, most Vulcans are models of stoic calm, before, during, and after. They are unable or unwilling to present any other demeanor. Spock was like that during emergencies, but afterwards – not always, just every now and then, mostly when he thought no one else was looking – he might let the Human out. His shoulders would relax, there might be a barely audible exhalation. Then the Vulcan would re-emerge, but stronger for having taken that brief respite. Most Vulcans never learn to do that. ”

DOCTOR LEONARD MCCOY

CHIEF MEDICAL OFFICER

“ I was on shore leave and wandered off. Not my brightest decision; some of the local fauna took exception to my being there. Staggered, bleeding, back to the camp site, my group beamed up, and there's Dr. McCoy, waiting for me. 'You just relax, son' he said, 'you're going to be fine.' Something about the way he said it ... you knew it was true.

I woke up a little later and he asks me how I'm feeling. I tell him I'm okay, he says, 'Good,' and then chews me out like one of my uncles would for doing something stupid. I never did that again, I'll tell you.

LT. CMDR. MONTGOMERY SCOTT

CHIEF ENGINEER

“That infamous brawl with the Klingons on the K-7 space station? Nothing about that surprises me at all. It could have been Klingons, it could have been Nausicaans, it could have been the crew of the Lexington. I believe that anyone saying that sort of thing about the Enterprise would have roused his ire (though, admittedly, it might not have come to blows had it not been Klingons). With no family of his own, Scott had poured all his paternal instinct into that ship, especially her engines, and no one at all was going to insult his children like that and get away with it.”

LIEUTENANT HIKARU SULU

FLIGHT CONTROLLER

“People called him a dilettante, but that wasn’t right. He didn’t dabble. You only had to know Lieutenant Sulu for five minutes to realize that he didn’t do things halfway. He could change directions in his hobbies – and the rest of his life, really – with virtually no effort, but whatever he was doing, that’s what he was doing. Time in the botany lab? He was working with his plants. Sitting at the helm? He was flying the ship. Sulu did so many things that we occasionally wondered when he had the chance to try something new ... like sleep.”

LIEUTENANT NYOTA UHURA

CHIEF COMMUNICATIONS OFFICER

“She could do just about anything on the bridge of a starship. I saw her fill in at navigation more than once. Saw her cover for Mr. Spock, too. But the communications console... that was where Lieutenant Uhura really made things sing, if you'll pardon the expression. Sitting there, she was the ship's guardian angel. All hell would be breaking loose, the ship shaking itself to pieces, the compartment filling up with smoke... and out of all the chaos came that sweet, steady voice. 'Hang on, boys,' she'd say. 'Help is on the way.' That voice saved us, every bit as much as Kirk or Sulu did.”

ENSIGN PAVEL A. CHEKOV

NAVIGATOR

“Ensign Chekov? He was a hard kid to nail down, those first couple of years he was on board. There was a part of him that was this wide-eyed 22-year-old kid saying, ‘Bozhe moi, look at me, I’m on the bridge of a starship!’ But there was another side of him that was meticulous, diligent. He wanted to be a good officer, to learn everything, even if he did try to learn it all at once. He was sharp and he paid attention. I think that’s the thing that Captain Kirk noticed in him, the thing he tried most to nurture.”

“To this day, I don’t understand how she went from being a promising biofeedback researcher at Johns Hopkins to being McCoy’s nurse on the Enterprise without feeling like she’d taken a huge step backward ... but she did it. For love, of all things. But that was quintessentially Christine Chapel. She loved, sometimes specifically, like Korby or Spock ... but more often, and most importantly, very broadly. She cared deeply about everybody, even though it might be to her detriment. It was her compassion, which many see as a weakness, that was actually the core of her strength.”

U.S.S. ENTERPRISE NCC-1701

FEDERATION STARSHIP

One of only a few *Constitution*-class starships commissioned by Starfleet, the *Enterprise* was undoubtedly one of the most successful ships of her class, serving with distinction under the commands of Robert April, Christopher Pike, and, most famously, James Kirk, whose triumphant five-year mission became the stuff of legend.

At the end of Kirk's five-year mission, the *Enterprise* underwent a massive refit program, essentially building an entirely new ship upon her aging spaceframe. However, no vessel holds a place in history quite like Kirk's *Enterprise* in the years before this refit.
