## Preface

### Corporate Babble Generator

Anyone who has worked in the corporate world for long enough will know that there is a certain type of person who likes to be...creative...with their language. Rather than saying something simple, they seem to insist on coming up with a string of words that sounds like babble and nonsense to anyone listening, yet these types lap it up. What they actually mean is up for debate...

There are several hundred million possible combinations in this generator, so there is sure to be something that helps sparks your imagination and impresses your corporate managers.
