THETA BOREALIS SECTOR

\$6.95

#113

GROUP ONE

JOHNSON '91

Introduction

Welcome to Theta Borealis Sector, an area of space with great opportunities and even greater hazards. The Theta Borealis Sector lies eight sectors directly spinward of the Imperial Capital sector. The sub-sectors of Theta Borealis are called quadrants, however the terms are interchangeable. Worlds are represented on the map by large white dots. Political bounderies are represented by white irregular lines. The thick red lines represent regular Korsumug shipping routes. The thick white lines represent the routes of Polygram Shipping. The white lines of alternating small squares and circles represent the routes of Baylor-Ator Lines. The red lines of alternating small squares and circles represent the routes of Continental Lines Limited. The G after a planet in the quadrant listings indicates the presence of a gas giant for the purposes of refuelling starships.

This playaid is designed for use with, and approved for use with, Traveller. Traveller is Game Designers' Workshop's role-playing game of science-fiction adventure in the far future. The trademark is used with permission.

We wish to thank Marc Miller and the staff of Game Designers' Workshop for their help and cooperation.

Library Data

Korsumug Empire - The Korsumug Empire was formed 3,500 standard years ago, when the planet Korsu was united. Shortly after this unification, Korsu's race known as the Zerp, attained faster than light drive. The rulers of the Korsumug Empire realized the vast riches the stars held and began expanding outward. This expansion has only been interrupted by the civil wars that occurred whenever a new ruler or Zhan came to power. The Korsumug Empire will use any means to conquer a planet and then will ruthlessly exploit it.

Zerp - The race Zerp are omnivores that stand up to 2 meters tall and range in weight from 40 kg. to 150 kg. They have two visual organs in the front of their heads and an audio organ mounted above them. Their mouth has many teeth and it is located below the eyes. The Zerp are bipedal and have two arms that end in taloned hands. They are very warlike in nature and if food is in short supply, cannibalistic. Zerp can see in the normal light spectrum and in infrared.

Zerp Ability Chart

Strength: 3-18

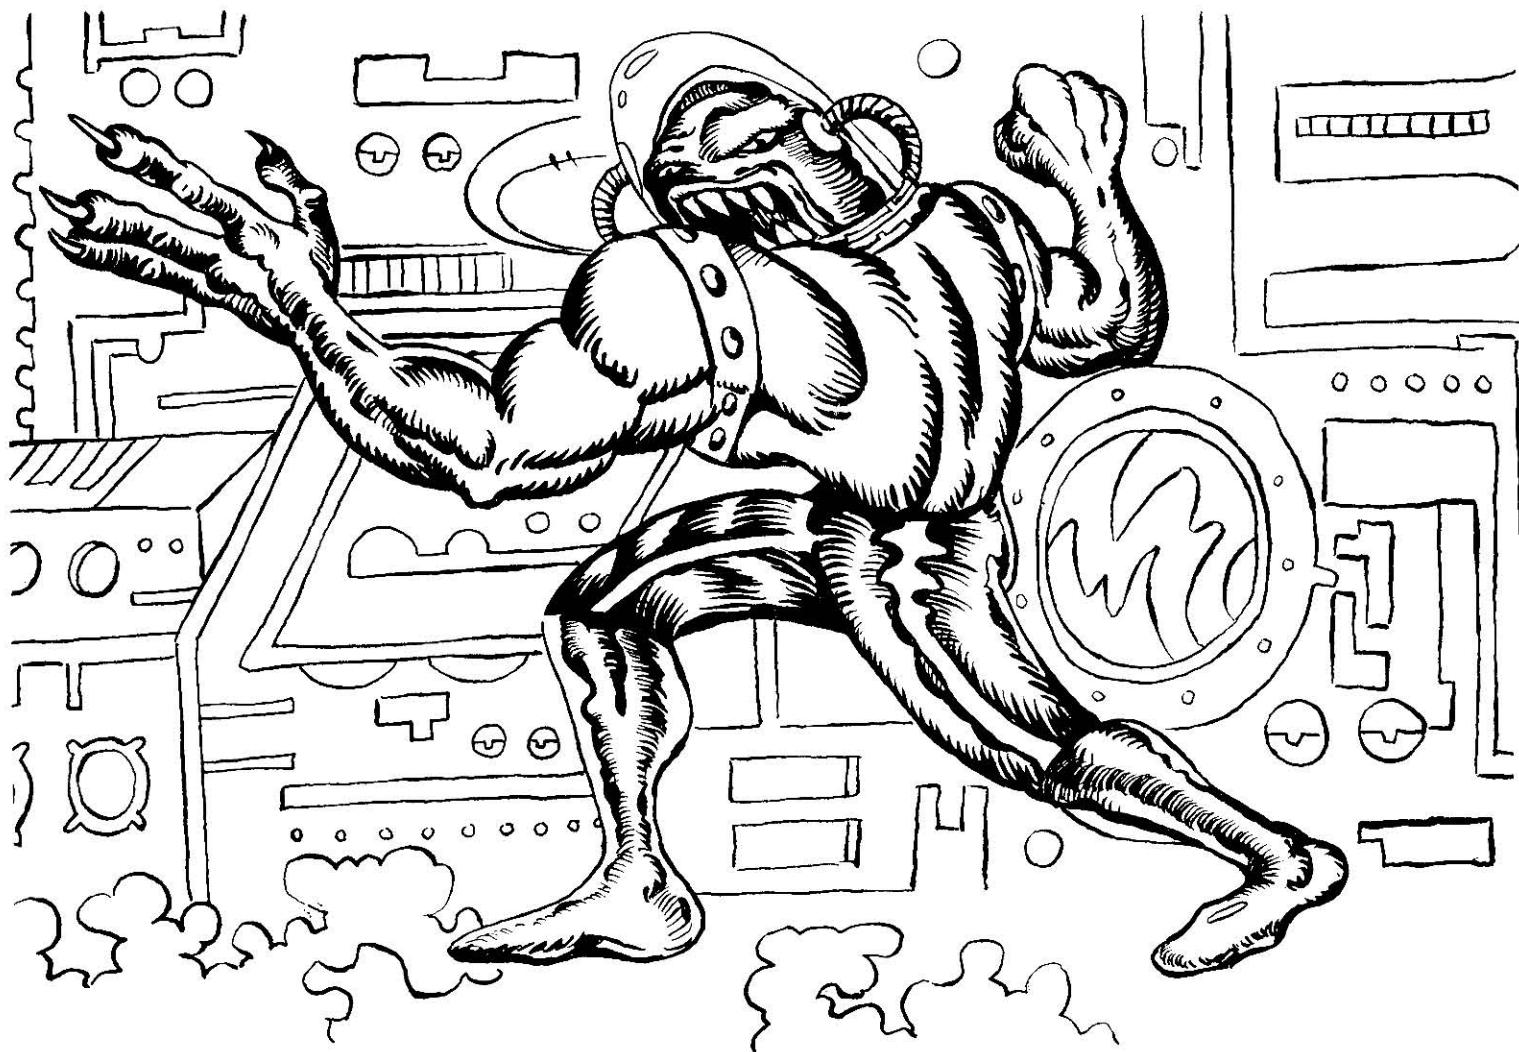

Dexterity: 2-12

Endurance: 3-18

Intelligence: 2-12

Education: 2-12

Social Standing: 2-12

JOHNSON!

Kingdom of Peladon - The Kingdom of Peladon is a human constitutional monarchy that has peacefully settled a small group of stars around the Peladon. The kingdom has had faster than light travel for 800 standard years. All has been peaceful for the kingdom until the Korsumug Empire began fomenting rebellion within the kingdom. The Korsumug Empire has also began making territorial demands on the kingdom; even going so far as to invade some of the border worlds. As of this time the fate of the kingdom of Peladon is still up for grabs. Peladon will welcome any and all aid in resisting the Korsumug Empire.

Percavid Marches - This small group of planets have been conquered by the Korsumug admiral called Percavid. They have not been fully converted to the Korsumug Empire and many guerrilla bands still actively resist the Zerp. The worlds within the Marches are ruled with an iron hand and mass executions are commonplace. The guerrilla bands, if contacted, will pay well for arms and mercenaries for the fight against the Korsumug Empire. Many pirates roam this area and there is a general air of lawlessness. Humans working for Admiral Percavid as a secret police employ any method against their brothers and sisters for profit.

Trooles Confederation - The Trooles Confederation is a small group of planets bound together by a fear of the Korsumug Empire. The relationship between the planets is a democratic one although some of the planets do not have democratic governments. The confederation was formed 60 years ago when a badly damaged ship from a planet conquered by the Zerps landed. The crew told such horrible tales of Korsumug atrocities that the planets banded together. The defense forces of the confederation are composed of the member planets' navies and armies. Trade is open with very little restriction, however strangers are treated with some suspicion.

Baylor-Ator Lines - Established in 941, Baylor-Ator Lines is a well established shipping company. It serves only in the Sibgil Quadrant. The corporate headquarters for the Baylor-Ator Lines are located on Hertansi. Baylor-Ator Lines are controlled by two companies, Baylor Enterprises and Ator Inc. Registration for the lines is also on Hertansi. Stock ownership is: Baylor Ent. 41%; Ator Inc. 41%; investment trusts 7%; corporate employees 6%; public 5%.

Polygraham Shipping - Established in 1012, this small shipping line operates in the Phoenix Quadrant. Based on the planet Conacus, the corporate headquarters are on Hufkin. Polygraham Shipping is solely owned by Wilford Zachret. If Polygraham does not start breaking even or showing a profit, Zachret has publicly announced he will be forced to sell the operation.

Continental Lines Limited - Established in 806, this shipping transport line was begun by a small band of pirates which have turned itself into a legitimate business. Based on the planet Isbelra in the Festab Quadrant, the Continental Lines Limited also serve the Corelian and Monway Quadrants.

Theta Borealis Sector Encounter Charts

As player characters travel in the Theta Borealis Sector, they will encounter a variety of hazards and events. For each quadrant or sub-sector that is traveled in, the referee should roll one die and on a roll of one consult that quadrant's encounter chart.

<u>Event</u>	<u>Die Roll</u>
Pirates	1
Korsumug Fleet	2-5
Asteroids	6

Peladons' Fleet - One to six warships of the Peladons' Fleet have been encountered. These warships range in size from 200 - 1200 tons and are armed up to Tech Level A. The ships will allow the players to pass so long as they are not known pirates or allies of the Korsumug Empire. Otherwise they will attack and show no mercy.

Merchant Ships - One or two merchant ships have been encountered. They range in tonnage from 100 - 600 tons and will attempt to evade the players.

Pirates - One to six pirate ships have been encountered and will at first appear to be merchantmen. They will range in tonnage from 100 - 600 tons and are armed up to Tech Level B. They will flee from a superior force.

Korsumug Fleet - One to six warships of the Korsumug Fleet have been encountered. These ships will attack any and all ships they encounter, save those from the Korsumug Empire. These ships range in size from 200 - 1200 tons and are armed up to Tech Level A.

Trooles Fleet - One to three warships of the Trooles Fleet have been encountered. The Trooles warships range in size from 300 - 1800 tons and are equipped up to Tech Level B. They will react as the Peladons' Fleet.

Asteroids - One to six asteroids have been encountered by the players. The referee should roll two dice for each asteroid and on a roll of 10+ that asteroid contains 5,000 credits worth of ore.

Ironhoof Highlands

An Adventure Campaign

Set in a Fantasy World

Add zest to any fantasy-role-playing-game with Group One's new adventure campaign system. The first release, Ironhoof Highlands, sets the stage for a world-wide campaign that offers adventure in the same epic style as the great fantasy novels.

1-16 page book containing town and temple, maps and descriptions.
1-20 page book covering the historical and geographical areas of the Ironhoof Highlands.

With your purchase of Ironhoof Highlands you get:
1-17"x22" full color map of the Ironhoof Highlands.

1-16 page book of over 40 new creatures.
