Traveller Consolidated Equipment List (v.72) - Index

NOTES:

1) When corresponding with me about a problem with an entry please refer to the sequence number of the item, the version of the list and the date of the list. That way I can find the entry and make changes. Each version of the list will have new sequence numbers, as more stuff will be added continually
To report problems please send e-mail to :
pvernon2001@yahoo.com

2) The base lists were scanned from various sources and, as is the habit of such, there are spelling errors as a result. If you find any please report them to me. Thanks!

3)
A. The monetary conversion of the GURPS list is necessary as CT was published in 1977 and the Cr is based on the US dollar of that time, GURPS was published in about 1991 and uses dollars from that time. The conversion factor is about 2.248. I will be converting the item cost and then rounding to the nearest Credit.
B. As a convenience I have also converted CT Cr. To GT Cr. The conversion factor used was .445.
C. To convert US dollars of 2003 to CT Cr. multiply by .33.
D. The conversion factors were calculated using the "Consumer Price Index" figures for 1977 and 1991. Since these figures are not 100% accurate due to a variety of reasons it is suggested that you round the results to the first 3 significant digits or nearest 5 cr.

4) Remember to check the original source for how the item is used. All through these lists there are apparently identical items that appear in multiple books, (i.e. - you can have an item that has the same name, weight, cost, and volume) but when you go to the sources you discover that the descriptions and uses of the items are different.

5) A grey cell is calculated.
