

The GZ-27 Jagdpanzer Kuerassier is a light scout tank produced by the Sustala Motorenwerke Company based on Zuflucht. While a bit on the low tech side, even for the islands, it represents a very cost effective, if slightly less potent alternative, to those powers who cannot afford to produce or procure grav tanks. While less than fantastically armored, the GZ-27 sports a high top speed and a 120mm Albrecht Metallwarenfabrik KwK-12 main cannon, making it a favorite amongst guerilla factions as a "pocket tank-killer". It also mounts a light machinegun which can be actuated from the commander's cupola, though this exposes the gunner. The crew consists of a driver, gunner, and commander.

Poorer forces who cannot afford main tanks often augment the GZ-27's paper-thin armor with affordable upgrades, such as RPG fencing welded around the body and turret, or ablative/reactive armor bricks. Such moves can greatly increase the vehicles short-term survivability, but still leave it far short from the main tank role, and utterly unfit to engage higher TL grav armor.

Total M3: 36 (Base 40)

Total Structure: 7

Total Hull: 7

Total Mass: 10,889.1

Top Speed: 112 km/h

Cruising Speed: 84 km/h

Offroad Speed: 66 km/h

Ground Pressure: 1.36

Agility Modifier: +3

Total Cost: 645,000 Cr.

Weapons:

120mm Cannon (7.2 M3) (500,000 Cr.)(2,250kg)(Dorsal, Traversing, Internal, Powered, TL8 Stabilized)(10 shots) 10d6 Super-AP

Light Machinegun (0 M3) (Dorsal, External, Traversing, Unpowered)(7kg)(3,000 Cr.)

Material: Light Alloys (2,560kg)(33,750 Cr.)(Base Armor 2)

Configuration: Sloped

Qualities: Lightweight Construction, Sealed, Stealth

Propulsion: Tracked (8 M3)(4,000kg)(40,000 Cr.)(Base Speed 60 kp/h)(Max Speed 120 kp/h)(Base Agility Potential 1)

Power Plant: Internal Combustion-8 (15 M3)(1,050kg)(337.5HP)(22,500 Cr.)(20 litres per hour)

Fuel: 500 litres (0.5 M3) (25 hours) (500 kg)

3 Operator Stations (3.75 M3) (375 kg)

Basic Sensors, Compact (+1DM) (1km) (0.25 M3) (0.5 kg) (1,000 Cr.)

Radio-50 (0.25 M3) (1 kg) (750 Cr.)

Overpressure System (0.4 M3) (120 kg) (4,000 Cr.)

Upgrades:

Excellent Controls (0.4 M3) (25.6 kg) (40,000 Cr.) (+3 Agility Potential)
