INTRODUCTION

Welcome to *Imperial Armour – Index: Forces of the Adeptus Astartes*. This book is designed to update the rules for Forge World's current and recent ranges of models for use with the latest incarnation of the Warhammer 40,000 game. Inside you will find rules for Forge World's Space Marines, Grey Knights, Inquisition and Sisters of Battle units, including ancient relics from the age of the Horus Heresy for your Adeptus Astartes forces, as well as revisiting characters from Forge World's Badab Wars campaign.

This book and its contents are fully compatible with *Warhammer 40,000 – Index: Imperium 1* and *Warhammer 40,000 – Index: Imperium 2*, expanding on the range of datasheets to be found there and contain all the information which you will need to field your Forge World models in the new edition of the Warhammer 40,000 game. Also included are both Power Ratings and an appendix for their use in Battle-forged armies.

You will need copies of the *Warhammer 40,000* rulebook, *Warhammer 40,000 – Index: Imperium 1* and *Warhammer 40,000 – Index: Imperium 2* to make full use of this book and its contents.

ADDITIONAL RULES

While the majority of the rules found within this book should be familiar to you from *Warhammer 40,000 – Index: Imperium 1* and the *Warhammer 40,000* rulebook, owing to the sheer size and scale of some of the units we produce, we've had to create certain new overarching rules to encompass them, which you can find detailed here:

MACRO WEAPONS

This is an additional weapon type to the five types presented in the main *Warhammer 40,000* rulebook. Macro weapons are truly gigantic in proportion, often the size of armoured vehicles in their own right in many cases. Such mighty weapons are unwieldy and only able to be mounted on the largest of war engines such as Titans, but their power is enough to annihilate the most well-protected target and is particularly effective against fortifications and the largest war machines, against which their power can be fully spent.

A model armed with a Macro weapon may not fire it if it has moved previously in the turn, unless the firing unit also has the **TITANIC** keyword. No Macro weapon may be used to make Overwatch attacks. When used against units with the **TITANIC** or **BUILDING** keyword, the damage inflicted by a Macro weapon is doubled (this doubling takes place after any randomised damage has been rolled for).

RELIC

If your army is Battle-forged, no Detachment may contain more RELIC units than it does non-RELIC units of the same battlefield role.

In addition, as long as a Battle-forged army includes at least one **RELIC** unit, you gain access to the following Stratagem:

> **2CP**
>
> ### RELIC OF ANCIENT GLORY
> *Stratagem*
> This Stratagem is used at the beginning of your Fight phase. Choose a single friendly **RELIC** unit, all friendly **ADEPTUS ASTARTES** models within 6" of the chosen **RELIC** unit may re-roll the first failed hit roll of that phase.

DATASHEETS

1. Battlefield Role

This is typically used when making a Battle-forged army.

2. Power Rating

The higher this is, the more powerful the unit! You can determine the Power Level of your entire army by adding up the Power Ratings of all the units in your army.

3. Unit Name

Models move and fight in units, which can have one or more models. Here you'll find the name of the unit.

4. Profiles

These contain the following characteristics that tell you how mighty the models in the unit are:

Move (M): This is the speed at which a model moves across the battlefield.

Weapon Skill (WS): This tells you a model's skill at hand-to-hand fighting. If a model has a Weapon Skill of '-', it is unable to fight in melee and cannot make close combat attacks at all.

Ballistic Skill (BS): This shows how accurate a model is when shooting with ranged weapons. If a model has a Ballistic Skill of '-', it has no proficiency with ranged weapons and cannot make shooting attacks at all.

Strength (S): This indicates how strong a model is and how likely it is to inflict damage in hand-to-hand combat.

Toughness (T): This reflects the model's resilience against physical harm.

Wounds (W): Wounds show how much damage a model can sustain before it succumbs to its injuries.

Attacks (A): This tells you how many times a model can strike blows in hand-to-hand combat.

Leadership (Ld): This reveals how courageous, determined or self-controlled a model is.

Save (Sv): This indicates the protection a model's armour gives.

10 POWER — DEIMOS PATTERN VINDICATOR LASER DESTROYER

NAME	M	WS	BS	S	T	W	A	Ld	Sv
Deimos Vindicator	*	6+	*	6	8	12	*	8	3+

A Deimos Vindicator Laser Destroyer is a single model. It is equipped with a laser volley cannon and a storm bolter.

WEAPON	RANGE	TYPE	S	AP	D	ABILITIES
Laser volley cannon	When firing this weapon, choose one of the following profiles:					
- Volley fire	36"	Heavy 2	9	-3	3	–
- Overcharge fire	36"	Heavy 2	10	-5	6	If any hit rolls made for this weapon result in one or more results of a '1', the firing vehicle suffers 3 mortal wounds.
Storm bolter	24"	Rapid Fire 2	4	0	1	–
Hunter-killer missile	48"	Heavy 1	8	-2	D6	This weapon may only be fired once per game.

WARGEAR OPTIONS
- A Deimos Vindicator may also be equipped with a hunter-killer missile.

ABILITIES

Explodes: If this model is reduced to 0 wounds, roll a D6 before removing it from the battlefield; on a 6 it explodes and each unit within 6" suffers D3 mortal wounds.

Smoke Launchers: Once per game, instead of shooting any weapons in the Shooting phase, this model can use its smoke launchers. Until the controlling player's next Shooting phase, any enemy units targeting this unit subtract 1 from all hit rolls for Shooting attacks made against this unit.

Power Capacitor: On any turn in which the Deimos Vindicator does not move in the Movement phase, it may fire twice with its laser volley cannon, but may only use volley fire if it does so.

5. Unit Composition & Wargear

This tells you what models are in the unit and covers the basic weapons and equipment the models are armed with.

6. Weapons

The weapons that a unit comes equipped with are described using a set of characteristics as follows:

Range: How far the weapon can shoot. Weapons with a range of 'Melee' can only be used in hand-to-hand combat. All other weapons are referred to as ranged weapons.

Type: These are all explained under the Shooting and Fight phases of the core rules.

Strength (S): How likely the weapon is to inflict damage. If a weapon's Strength lists 'User', it is equal to the wielder's current Strength. If a weapon lists a modifier such as '+1' or 'x2', you should modify the user's current Strength characteristic as shown to determine the weapon's Strength. For example, if a weapon's Strength was 'x2', and the user had a Strength characteristic of 6, that weapon has Strength 12.

Armour Penetration (AP): How good it is at getting through armour.

Damage (D): The amount of damage inflicted by a successful hit.

7. Wargear Options

Some units have a number of choices as to which gear they take into battle – this section describes these options. Weapons which a unit may take as an optional choice are typically described in the Appendices.

8. Abilities

Many units have exciting special abilities that are not covered by the core rules; these will be described here.

9. Keywords

All datasheets have a list of keywords, sometimes separated into Faction keywords and other keywords. The former can be used as a guide to help decide which models to include in your army, but otherwise, both sets of keywords are functionally the same. Sometimes a rule will say that it applies to models that have a specific keyword. For example, a rule might say that it applies to 'all **ORKS** models'. This means it would only apply to models that have the **ORKS** keyword on their datasheet.

10. Damage

Some large models' characteristics can change as the model suffers damage, these characteristics are indicated with the '*' symbol instead of a number – here you will find a table that details how these characteristics change as wounds are lost. To determine the characteristics of a model with a Damage table, check the model's remaining wounds and consult the appropriate row of the chart on their datasheet. Not all units have Damage tables. If one is not included on a datasheet then that unit's characteristics do not change as it loses wounds.

Void Shields: A Relic Mastodon is protected by specialised void shield generators, near-impenetrable barriers of force projected out at a distance from its hull in layers, designed to deflect and absorb the impact of high-energy attacks and missiles against them. In game terms, void shields are represented by a unique kind of saving throw shown in the Damage box above, which the controlling player can opt to use instead of their normal save or invulnerable save against any form of attack except from weapons with the Melee type. Like invulnerable saves, void shield saves are unaffected by the AP of an attack, but unlike invulnerable saves they may also be used to negate mortal wounds. In this case however, roll one dice for each mortal wound that has been inflicted on the model, with the mortal wound being ignored if the save roll indicated in the Damage box is passed.

Steel Behemoth: This model may Fall Back in the Movement phase and still shoot and/or Charge during the controlling player's turn. ~~It may fire its weapons if enemy units are within 1" of it (but only its heavy flamers and lascannon can target units that are within 1" of it – its other guns must target other units).~~ In addition, this model only gains a bonus to its save in cover if at least half of the model is obscured from the bearer. |

Colossal Flyer: When targeting this unit with Shooting attacks and psychic powers, always measure to the model's hull where it would be at tabletop level, even if it is on a flying base. In addition, unless the attacking unit has the FLY keyword, add 12" to the measured distance to determine the range when making shooting attacks against the Thunderhawk Gunship. Note that this means many short-ranged shooting weapons will not be able to hit this model. Your opponent must also subtract 1 from hit rolls for attacks that target this model in the Shooting phase.

Supersonic: Each time this model moves, first pivot it on the spot up to 90° (this does not contribute to how far the model moves) and then move the model straight forwards. Note that it cannot pivot again after the initial pivot. When this model Advances, increase its Move characteristic by 20" until the end of the phase – do not roll a dice.

Void-hardened Hull: The Thunderhawk Assault Gunship has a 5+ invulnerable save.

Crash and Burn: If this model is reduced to 0 wounds, roll a D6 before removing the model from the battlefield and before any embarked models disembark; on a 6 it crashes and explodes and each unit within 6" suffers 2D6 mortal wounds.

Hover Jet: Before this model moves in your Movement phase, you can declare it will hover. Its Move characteristic becomes 20" until the end of the phase, and it loses the Airborne, Colossal Flyer and Supersonic abilities until the beginning of your next Movement phase.

Power of the Machine Spirit: This model does not suffer the penalty to hit rolls for moving and firing Heavy weapons.

Thunderhawk Cluster Bombs: Once per battle, a Thunderhawk Gunship with this ability can make a bombing run against a single enemy unit it has moved over during one of its Movement phases. After the Thunderhawk Gunship has moved, pick an enemy unit that it flew over. Roll 3D6 for every VEHICLE or MONSTER, or a D6 for every other model, up to a maximum of 12D6. For each roll of a 5+, the unit suffers a mortal wound. Units consisting of only CHARACTERS may not be targeted by this ability.

TRANSPORT

The Sokar Pattern Stormbird can transport 50 **<CHAPTER> INFANTRY** models. Each **JUMP PACK** or **TERMINATOR** model takes the space of two other **Infantry** models and each **CENTURION** takes the space of three other **INFANTRY** models. It may also transport **<CHAPTER> BIKER** models who take up the place of three **INFANTRY** models each. The Sokar Pattern Stormbird may also transport a single **<CHAPTER> RHINO**, including its own transported models, occupying 25 models' worth of space. When disembarking, the Rhino may only exit via the rear of the Sokar Pattern Stormbird.

ABILITIES

Airborne: This model cannot charge, can only be charged by units that can **FLY**, and can only attack or be attacked in the Fight phase by units that can **FLY**.

Colossal Flyer: When targeting this unit with Shooting attacks and psychic powers, always measure to the model's hull where it would be at tabletop level, even if it is on a flying base. In addition, unless the attacking unit has the **FLY** keyword, add 12" to the measured distance to determine the range when making shooting attacks against the Sokar Pattern Stormbird. Note that this means many short-ranged shooting weapons will not be able to hit this model. Your opponent must also subtract 1 from hit rolls for attacks that target this model in the Shooting phase.

Supersonic: Each time this model moves, first pivot it on the spot up to 90° (this does not contribute to how far the model moves) and then move the model straight forwards. Note that it cannot pivot again after the initial pivot. When this model Advances, increase its Move characteristic by 20" until the end of the phase – do not roll a dice.

Void-hardened Hull: The Sokar Pattern Stormbird has a 5+ invulnerable save.

Crash and Burn: If this model is reduced to 0 wounds, roll a D6 before removing the model from the battlefield and before any embarked models disembark; on a 6 it crashes and explodes and each unit within 6" suffers 2D6 mortal wounds.

Hover Jet: Before this model moves in your Movement phase, you can declare it will hover. Its Move characteristic becomes 20" until the end of the phase, and it loses the Airborne, Colossal Flyer and Supersonic abilities until the beginning of your next Movement phase.

Power of the Machine Spirit: This model does not suffer the penalty to hit rolls for moving and firing Heavy weapons.

Projected Void Shields: The Sokar Pattern Stormbird is protected by specialised void shield generators. In game terms, these void shields are represented by a unique kind of saving throw which the controlling player can opt to use instead of their normal save or invulnerable save against any form of attack except from weapons with the Melee type. Like invulnerable saves, void shield saves are unaffected by the AP of an attack, but unlike invulnerable saves, they may also be used to negate mortal wounds. In this case however, roll one dice for each mortal wound that has been inflicted on the unit, with the mortal wound being ignored if the save roll is passed. Void shields must be continuously re-energised and renewed in combat operations and so as the unit is damaged, the defensive potential of its void shields is reduced (see the Damage table for the Sokar Pattern Stormbird).

Shield Projection: As long as the Sokar Pattern Stormbird's controlling player has chosen to make it hover (as described previously) and does not move at all during the turn, you may declare that the Sokar Pattern Stormbird is projecting its void shields beyond its hull at the start of the Movement phase. If this is the case, the void shields' save is extended to all models and **BUILDINGS** within 8" of the Sokar Pattern Stormbird's hull and wings.

A Grey Knights Thunderhawk Gunship is a single model. It is equipped with a Thunderhawk heavy cannon, four twin heavy bolters, and two lascannon.

WEAPON	RANGE	TYPE	S	AP	D	ABILITIES

Turbo-laser destructor	96"	Heavy D3	16	-4	2D6	Any wound roll of a 6 made with this attack automatically inflicts an additional D3 mortal wounds on the target.

WARGEAR OPTIONS	
	• This model may replace its Thunderhawk heavy cannon with a turbo-laser destructor.
	• This model may replace all its twin heavy bolters with twin psycannon.
	• This model may take a Hellstrike missile battery. If this option is chosen then the Grey Knights Thunderhawk loses the Thunderhawk Cluster Bombs ability.

TRANSPORT	The Grey Knights Thunderhawk Gunship can transport 30 **GREY KNIGHTS** and/or **INQUISITION INFANTRY** models. Each **TERMINATOR** model takes the space of two other **INFANTRY** models.

ABILITIES	**Airborne:** This model cannot charge, can only be charged by units that can **FLY**, and can only attack or be attacked in the Fight phase by units that can **FLY**.
	Colossal Flyer: When targeting this unit with Shooting attacks and psychic powers, always measure to the model's hull where it would be at tabletop level, even if it is on a flying base. In addition, unless the attacking unit has the **FLY** keyword, add 12" to the measured distance to determine the range when making shooting attacks against the Thunderhawk Gunship. Note that this means many short-ranged shooting weapons will not be able to hit this model. Your opponent must also subtract 1 from hit rolls for attacks that target this model in the Shooting phase.
	Supersonic: Each time this model moves, first pivot it on the spot up to 90° (this does not contribute to how far the model moves), and then move the model straight forwards. Note that it cannot pivot again after the initial pivot. When this model Advances, increase its Move characteristic by 20" until the end of the phase – do not roll a dice.
	Void-hardened Hull: The Grey Knights Thunderhawk Assault Gunship has a 5+ invulnerable save.
	Crash and Burn: If this model is reduced to 0 wounds, roll a D6 before removing the model from the battlefield and before any embarked models disembark; on a 6 it crashes and explodes and each unit within 6" suffers 2D6 mortal wounds.
	Hover Jet: Before this model moves in your Movement phase, you can declare it will hover. Its Move characteristic becomes 20" until the end of the phase, and it loses the Airborne, Colossal Flyer and Supersonic abilities until the beginning of your next Movement phase.
	Power of the Machine Spirit: This model does not suffer the penalty to hit rolls for moving and firing Heavy weapons.
	Thunderhawk Cluster Bombs: Once per battle, a Grey Knights Thunderhawk Assault Gunship equipped with Thunderhawk cluster bombs can make a bombing run against a single enemy unit it has moved over during one of its Movement phases. After the Thunderhawk Gunship has moved, pick an enemy unit that it flew over. Roll 3D6 for every **VEHICLE** or **MONSTER**, or a D6 for every other model, up to a maximum of 12D6. For each roll of a 5+, the unit suffers a mortal wound. Units consisting of only **CHARACTERS** may not be targeted by this ability.
