BANNERS OF THE TOMB KINGS

Feel free to photocopy these banners for use on your own models. A good way to paint them is to use contrasting colours for the background and the image itself, as this makes the banner really stand out. For example, an image painted gold with a blue, black or red background works particularly well.

You could use these banners to represent unit standards or to represent a special magical banner carried by one of your elite units. You might like to use one of the larger banners for your army's Icon Bearer.

A small amount of converting is required to allow a Tomb Kings standard bearer model to carry one of the larger banners.
